II. SB 1EX and HB 1EX defy this Court's ruling by denying minority electoral opportunities elsewhere in Georgia. 13

CONCLUSION 18

INTRODUCTION

The Court's detailed ruling gave the General Assembly straightforward guidance on how to remedy the Section 2 violations in Georgia's state legislative maps: (1) create two additional majority-Black state senate districts from an explicitly defined vote-dilution area, and (2) create five additional majority-Black state house districts from an explicitly defined vote-dilution area. The Court was very clear that the "State cannot remedy the Section 2 violations described herein *by eliminating minority opportunity districts elsewhere in the plans*." Doc. 294 at 509–10 (emphasis added).

Rather than follow this Court's clear guidance, the General Assembly did exactly what the Court said it could not do in the remedial process: it reached *outside* of the vote-dilution areas to draw new majority-Black districts to the exclusion of Black voters *within* the vote-dilution areas, and in the process *eliminated* performing minority crossover districts. This leaves many of the Black voters who this Court found had suffered a Section 2 violation without a Section 2 remedy. Under the General Assembly's 2023 Plans, the pursuit for Black equal opportunity is a zero-sum game.

The General Assembly's state legislative plans fail to remedy the Section 2 violations found by this Court—as the Court expressly warned they would, if the General Assembly proceeded as it now has. This Court must accordingly enjoin the

new maps and proceed to adopt lawful state House and Senate plans in time for the 2024 elections.

BACKGROUND

I. This Court struck down Georgia's state legislative plans and provided the State with clear guidance on proper remedies.

On October 26, 2023, the Court found that Georgia's 2021 enacted state legislative plans violate Section 2 of the Voting Rights Act. Order at 493, *Grant v. Raffensperger*, No. 1:21-CV-05339-SCJ (Oct. 26, 2023), Doc. 294. With respect to the Senate plan, the Court found that Georgia's Black population is sufficiently large and geographically compact to constitute a majority in two additional majority-Black Senate districts in south-metro Atlanta, and that such districts could be drawn while adhering to traditional redistricting principles (*Gingles* 1). *Id.* at 309–27. As for the House plan, the Court found that Georgia's Black population is sufficiently large and geographically compact to constitute a majority in two additional majority-Black House districts in south-metro Atlanta, an additional majority-Black House district in west-metro Atlanta, and two additional majority-Black House districts in the Macon-Bibb region (*Gingles* 1). *Id.* at 327–46, 382–96, 405–06.

The Court also found that the Black population was politically cohesive in each of these areas. Specifically, relying on the analysis of Plaintiffs' expert Dr. Maxwell Palmer and concessions from Defendant's expert Dr. John Alford—the Court found that "Black voters in south-Metro and west-Metro Atlanta support the

same candidate more than 98% of the time and in the Macon-Bibb region, Black voters supported the same candidate 98.1% of the time" and thus were very politically cohesive (*Gingles* 2). *Id.* at 414–16. The Court also determined that in each legislative district examined and in the focus areas as a whole, white voters "were highly cohesive in voting in opposition to the Black-preferred candidate" (*Gingles* 3). *Id.* at 421. The Court concluded that there was "'very clear' evidence of racially polarized voting" in the focus areas. *Id.* at 425–26 (*quoting Allen v. Milligan*, 599 U.S. 1, 22 (2023)).

In finding that the totality of the circumstances demonstrates that the political process is not currently equally open to Black Georgians in the focus areas, the Court endorsed Plaintiffs' expert Dr. Vernon Burton's observation "of a historical pattern that following an election, the General Assembly responsively passes voting laws that disproportionately impact Black voters in Georgia"—a pattern that continues to the present with the recent passage of SB 202. Doc. 294 at 230, 483 (Court incorporating *in toto* its analysis in the *Pendergrass* case above with respect to Senate Factors Three, Five, Six, Seven, and Eight). The Court observed that "[d]espite the growth in the Black population in the affected areas and the voter polarization between white and Black Georgians," the plans "did not increase the number of majority-Black districts" in the focus areas, which "in effect dilutes and diminishes the Black population's voting power in that area of the State." *Id.* at 272.

Based on the well-established legal standard, the Court concluded that "SB 1EX violates Section 2 of the Voting Rights Act as to the following districts/areas: Enacted Senate Districts 10, 16, 17, 25, 28, 30, 34, 35, 43, and 44." *Id.* at 514. And it concluded that "HB 1EX violates Section 2 of the Voting Rights Act as to the following areas/districts: Enacted House Districts 61, 64, 74, 78, 117, 133, 142, 143, 145, 147, and 149." *Id.* The Court provided the General Assembly more than six weeks to adopt remedial legislative plans "consistent with[its] Order." *Id.* at 510; *see also id.* at 508–09 ("[T]he parameters and the instructions around what the State of Georgia is supposed to do to comply with Section 2 of the VRA is a critical part of this Court's order."). The Court held that an appropriate remedy involves "two additional majority-Black Senate districts in south-metro Atlanta; two additional majority-Black House districts in south-metro Atlanta, one additional majority-Black House district in west-metro Atlanta, and two additional majority-Black House districts in and around Macon-Bibb." Doc. 294 at 509. The Court further instructed that the "State cannot remedy the Section 2 violations described herein by eliminating minority opportunity districts elsewhere in the plans." *Id.* at 509–10.

II. The Georgia General Assembly adopted remedial plans that defy this Court's ruling.

On December 8, 2023, Georgia enacted proposed remedial plans SB 1EX and HB 1EX. Doc. 312 at 2. SB 1EX includes two additional majority-Black Senate districts in the Atlanta metropolitan area (new SD 17 and SD 28) and HB 1EX

contains five additional majority-Black House districts: one in the western Atlanta metropolitan area (new HD 64), two in the southern Atlanta metropolitan area (new HD 74 and HD 117), and two anchored near Macon-Bibb County (new HD 145 and HD 149). *See* Remedial Expert Report of Blakeman Esselstyn ("Esselstyn Remedial Rep.") ¶¶ 11, 31. However, many of the Black voters that make up the new majority-Black districts are from *outside* the vote dilution areas identified by this Court. For example, 43.18% of the Black voting-age population of the new majority-Black SD 28 was previously assigned to districts outside the Court's vote dilution area. *Id.* ¶ 13. The same is true for new HD 64 (67.45%), HD 74 (6.71%), HD 117 (65.86%), and HD 145 (22.57%). *Id.* ¶¶ 34–37.

Further, the maps dismantle existing minority-opportunity districts, such as old SD 42, which under the previous plan performed for Black-preferred candidates. *See* Remedial Expert Report of Dr. Maxwell Palmer ("Palmer Remedial Rep.") ¶ 17. In fact, the bill's sponsor admitted that new SD 42 encompasses "much of the territory of the prior District 17"—an area this Court found to be a Section 2 violation just weeks prior. Hr'g on SB 1EX Before the Georgia Senate on December 1, 2023 at 1:51:06, Gen. Assemb. (Ga. 2023) (statement of Senator Shelly Echols).[1] The same is true for new HD 40 and HD 81. Palmer Remedial Rep. ¶ 17.

[1] Available at https://vimeo.com/showcase/9076378?video=890053539 (last accessed Dec. 12, 2023).

The General Assembly was well aware that these maps unnecessarily eliminated minority-opportunity districts elsewhere in the state, in conflict with this Court's directive. *See, e.g.*, Hr'g on HB 1EX, Ga. House of Reps. on Dec. 1, 2023 at 2:25:44, Gen. Assemb. (Ga. 2023) (statement of Rep. Sam Park) ("The Republican map creates 5 new majority-Black districts, but it takes away two majority-minority districts in fast growing Dekalb and Gwinnett counties" including House District 81).[2]

LEGAL STANDARD

Section 2 violations require relief that "completely remedies the prior dilution of minority voting strength and fully provides equal opportunity for minority citizens to participate and to elect candidates of their choice." *United States v. Dall. Cnty. Comm'n*, 850 F.2d 1433, 1442 (11th Cir. 1988) (quoting S. Rep. No. 97-417, at 31 (1982)); *see also White v. Alabama*, 74 F.3d 1058, 1069 n.36 (11th Cir. 1996) (same). "This Court cannot authorize an element of an election proposal that will not with certitude *completely* remedy the Section 2 violation." *Dillard v. Crenshaw County*, 831 F.2d 246, 252–53 (11th Cir. 1987). "This will require the Court to evaluate a remedial proposal under the *Gingles* standard to determine whether it provides Black voters with [] additional opportunity district[s]." Doc. 294 at 511.

[2] Available at https://vimeo.com/showcase/8988696?video=889952451 (last accessed Dec. 12, 2023).

ARGUMENT

Because SB 1EX and HB 1EX unnecessarily reach outside of the vote-dilution areas to create the new majority-Black districts—excluding tens of thousands of Black Georgians with a Section 2 right from a Section 2 remedy—the General Assembly failed to adequately remedy the Section 2 violations identified by the Court. The plans should be enjoined and this Court should proceed to draw compliant plans to be used in the coming 2024 election.

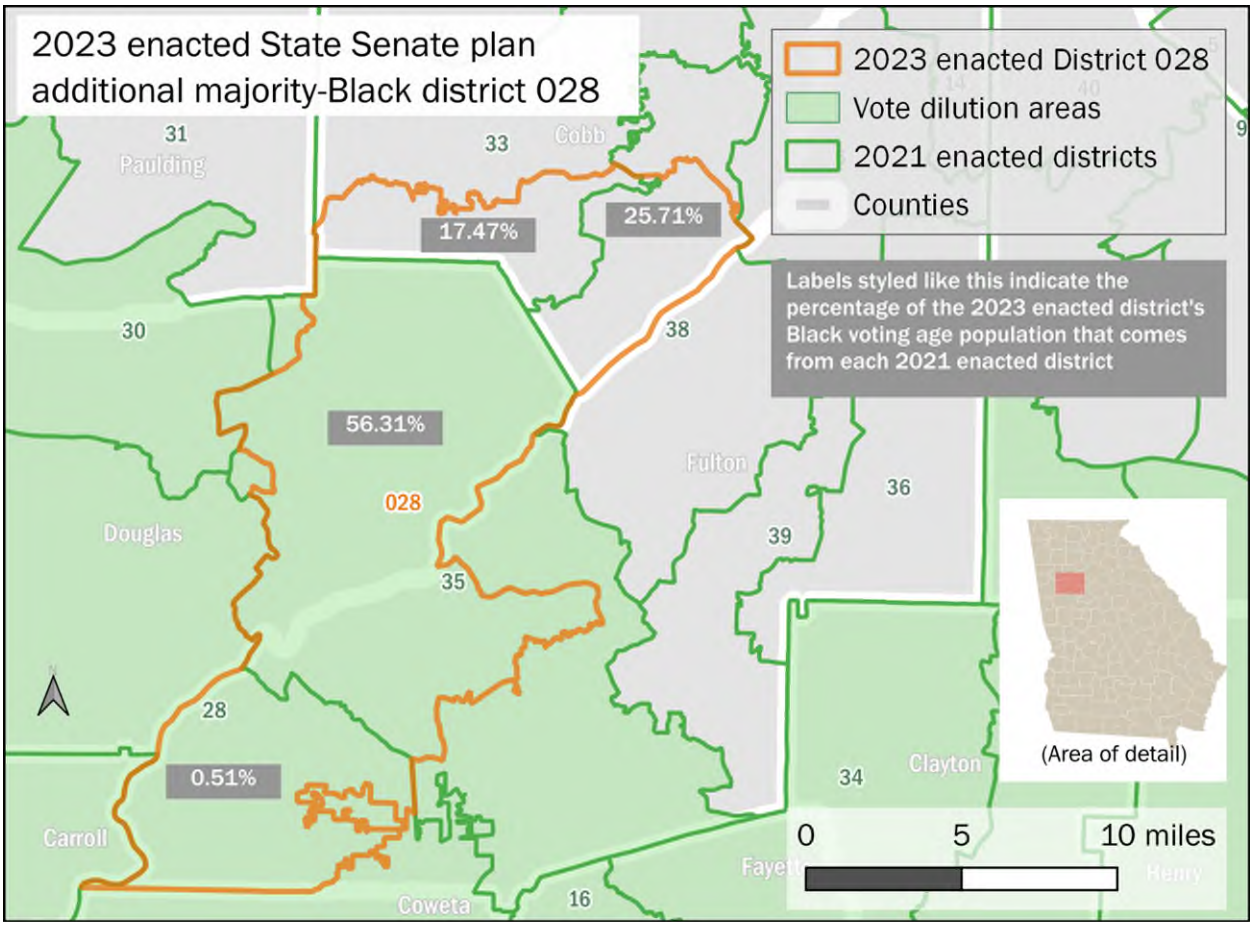
I. SB 3EX does not sufficiently cure the vote dilution identified by the Court.

Despite this Court's detailed ruling specifying the precise locations of the Section 2 violations—and thus the Section 2 remedies—the new majority-Black state legislative districts at best only partially remedy the vote dilution, failing to provide an opportunity district for those with a Section 2 right by drawing in voters outside of the vote-dilution areas, many of whom already had an opportunity to elect their preferred candidates.

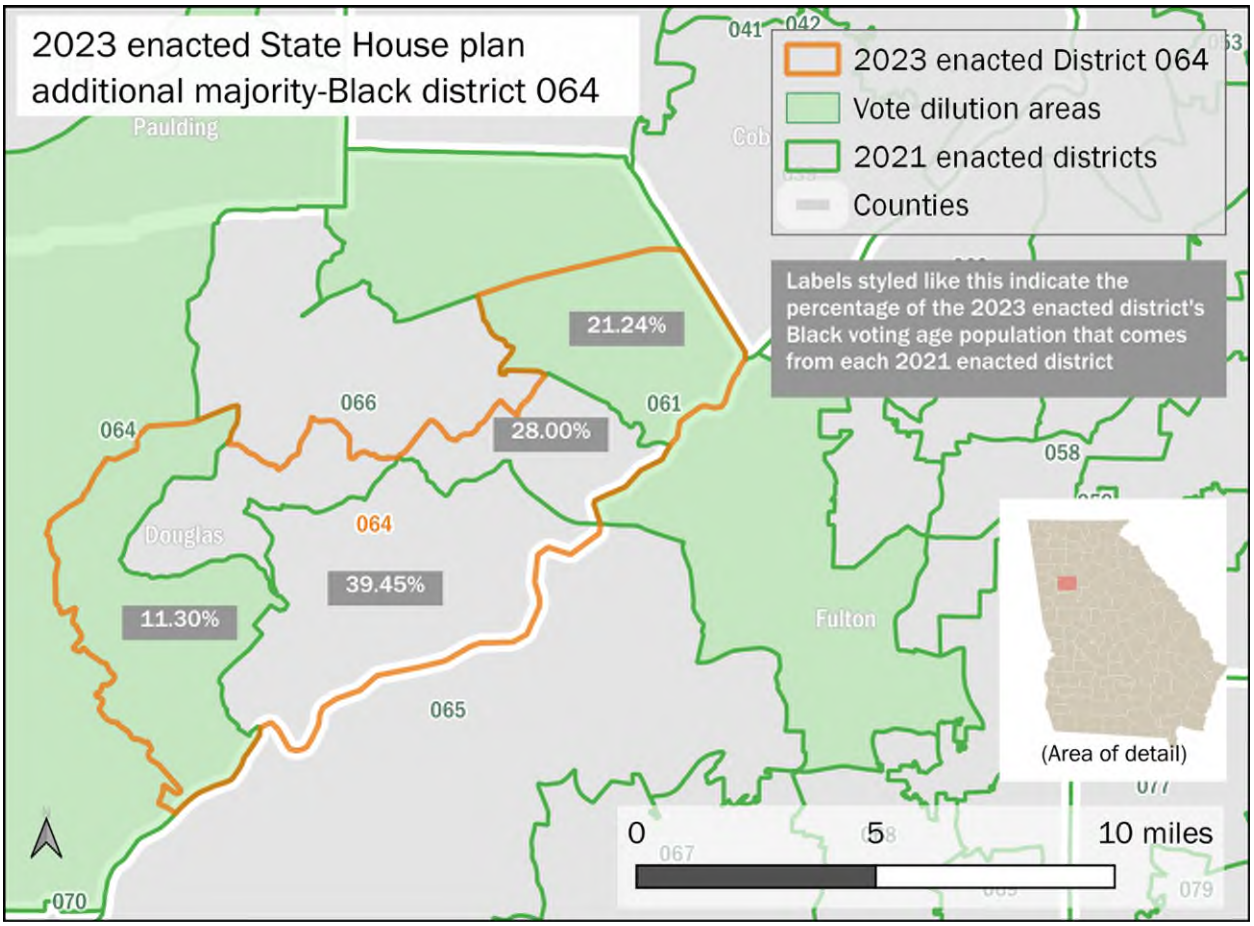
This Court specifically defined the area of Georgia where the Section 2 violations occurred in the previous plans: (1) "Enacted Senate Districts 10, 16, 17, 25, 28, 30, 34, 35, 43, and 44"; and (2) "Enacted House Districts 61, 64, 74, 78, 117, 133, 142, 143, 145, 147, and 149." Doc. 294 at 514. The new majority-Black districts in SB 1EX and HB 1EX, however, only partially draw from these specified areas where unlawful vote dilution occurred and needed to be cured. Most of the new

majority-Black districts in the plans have large numbers of Black Georgians who lived *outside* of the vote dilution areas identified by the Court. In particular:

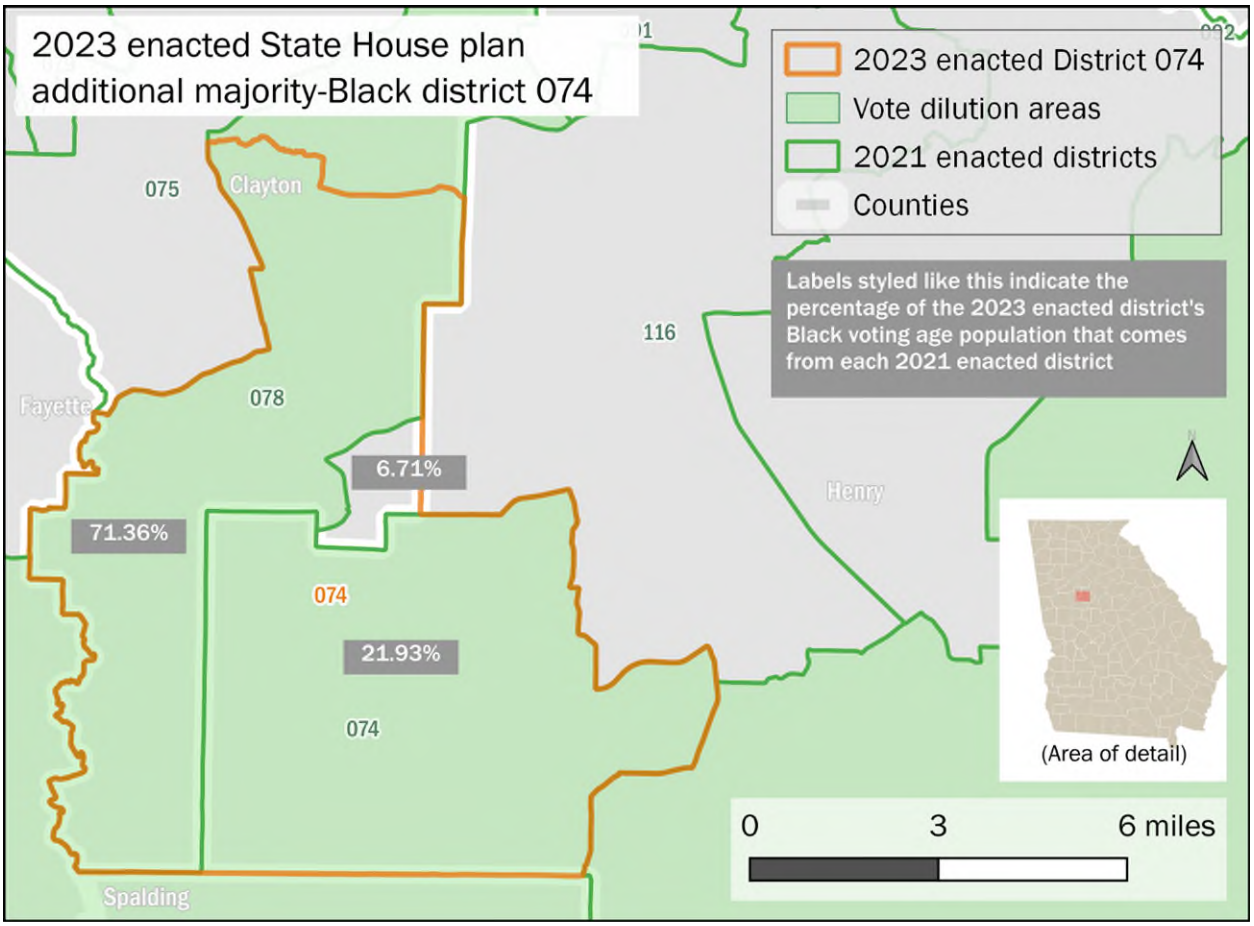
In the new Senate plan, 43.18% of Senate District 28's Black voting-age population lives outside of the vote-dilution area. Esselstyn Remedial Rep. ¶ 13.



Similar patterns are seen in four of the five new majority-Black House districts. In the new House plan, 67.45% of House District 64's Black voting-age population lives outside of the vote-dilution area. *Id.* ¶ 33.

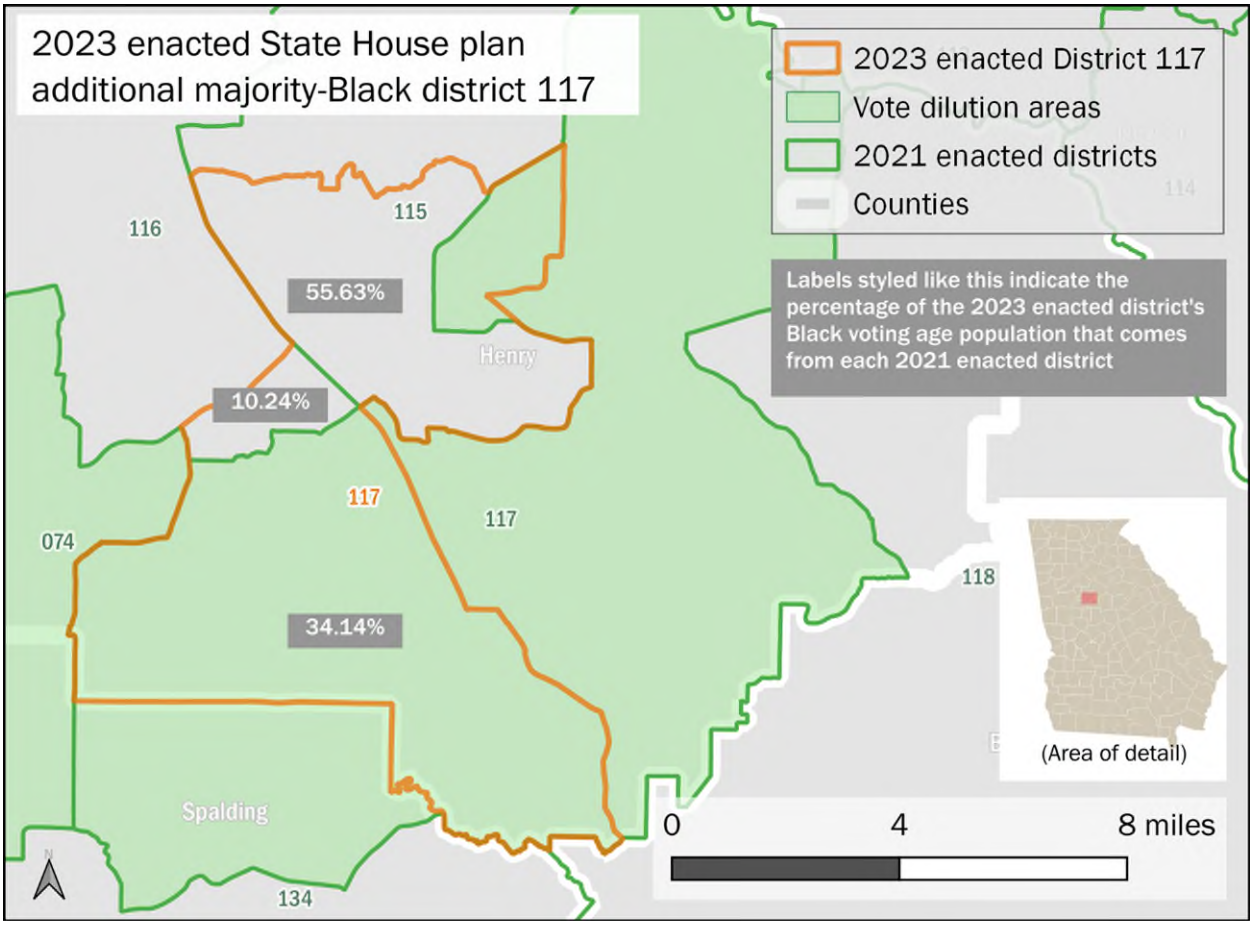


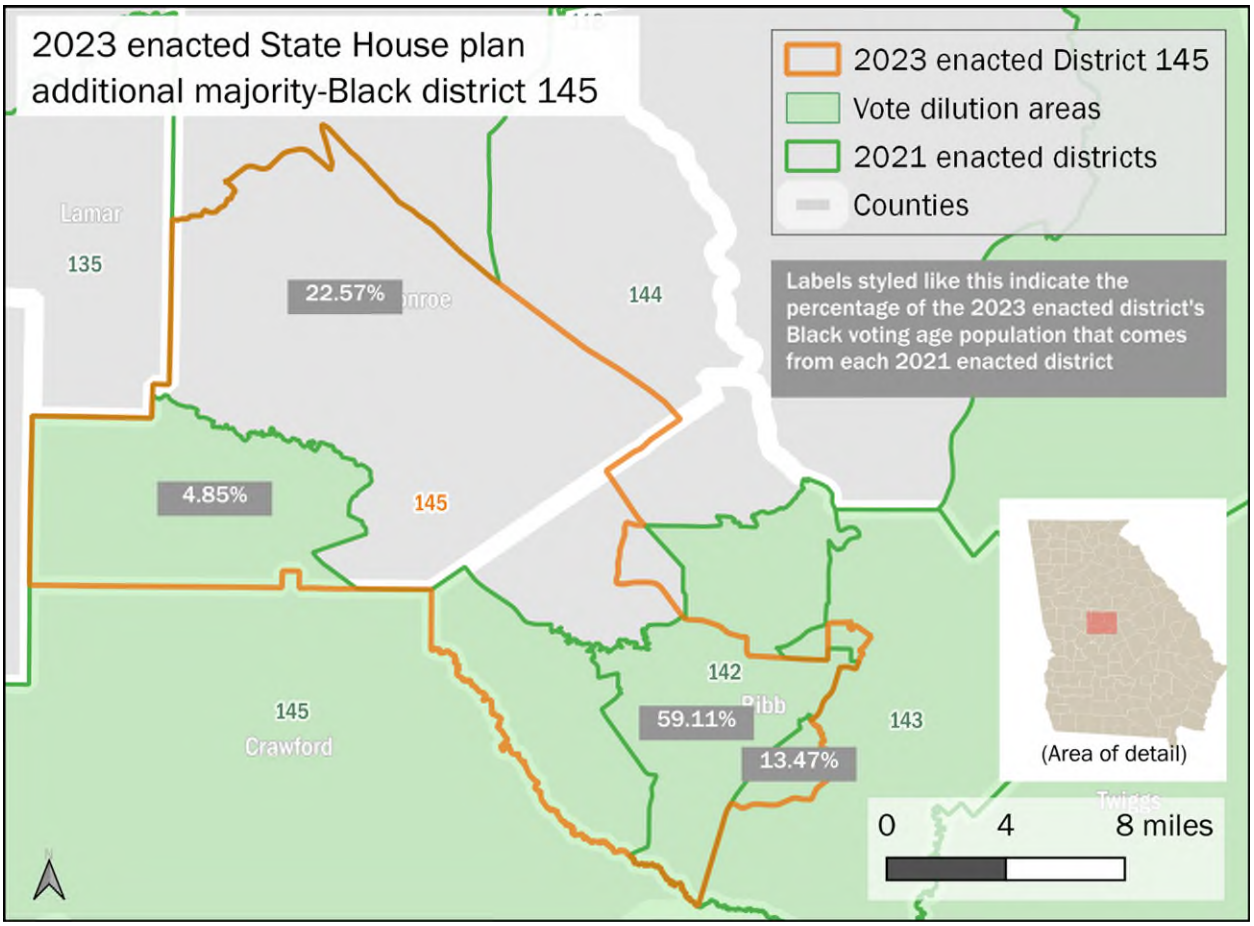
6.71% of House District 74's Black voting-age population lives outside of the vote-dilution area. *Id.* ¶ 35.



65.86% of House District 117's Black voting-age population lives outside of the vote-dilution area. *Id.* ¶ 36.

22.57% of House District 145's Black voting-age population lives outside of the vote-dilution area. *Id.* ¶ 37.





In reaching outside the vote-dilution area to assemble new majority-Black districts, hundreds of thousands eligible Black voters who actually reside in the vote-dilution areas continue to reside in districts in which they have no opportunity to elect their preferred candidates. *Id.* ¶¶ 14, 35. The end result is the creation of "new" majority-Black districts that provide a "remedy" for those who do not need one and deprive those whose Section 2 rights have been violated from the Section 2 remedy to which they are entitled.

Thus, rather than "*completely* remed[ying] the prior dilution of minority voting strength," *Dall. Cnty. Comm'n*, 850 F.2d at 1442 (emphases added), SB 1EX

and HB 1EX are at best *partial* remedies to the "significant harm" suffered by those Black voters in Georgia "whose voting rights have been injured by the violation of Section 2." Doc. 294 at 510. This Court should reject the General Assembly's state Senate and House plans for failing to fully remedy the Section 2 violations in the prior maps. *See, e.g.*, *Cane v. Worcester County*, 35 F.3d 921, 927 (4th Cir. 1994) (affirming rejection of Section 2 remedy that perpetuated challenged vote dilution).

II. SB 1EX and HB 1EX defy this Court's ruling by denying minority electoral opportunities elsewhere in Georgia.

This Court's ruling specified that "the State cannot remedy the Section 2 violation[]" identified in the state House and Senate plans "by eliminating minority opportunity districts elsewhere in the plans." Doc. 294 at 509–10. This instruction is consistent with "controlling precedent," which makes clear that the "appropriate remedy" in a Section 2 redistricting case "is a [legislative] redistricting plan that includes either an *additional* majority-Black [legislative] district, or an *additional* district in which Black voters otherwise have an opportunity to elect a representative of their choice." *Singleton v. Allen*, Nos. 2:21-cv-1291-AMM, 2:21-cv-1530-AMM, 2023 WL 6567895, at *1 (N.D. Ala. Oct. 5, 2023) (per curiam) (three-judge court) (emphases added) (citing *Bartlett v. Strickland*, 556 U.S. 1, 24 (2009) (plurality op.); *see also, e.g.*, *Wright v. Sumter Cnty. Bd. of Elections & Registration*, 979 F.3d 1282, 1309 (11th Cir. 2020) (affirming Section 2 remedy that included "one more" minority opportunity district than afforded by the previous plan).

Rather than heed the Court's direction, however, the General Assembly adopted new state legislative plans that take electoral opportunities away from minority voters by eliminating several effective crossover districts across the state. Put differently, rather than create "*additional* legislative districts in which Black voters have a demonstrable opportunity to elect their candidates of choice," Doc. 294 at 510 (emphasis added), the General Assembly chose to remedy the vote dilution identified by the Court by limiting Black voting strength statewide.

The Supreme Court has instructed that "a 'crossover' district," is one "in which members of the majority help a 'large enough' minority to elect its candidate of choice." *Cooper v. Harris*, 581 U.S. 285, 287 (2017) (quoting *Bartlett*, 556 U.S. at 13 (plurality op.)). The new state Senate and House plans eliminate five crossover districts—Senate Districts 6 and 42 and House Districts 40, 81, and 82—largely through a wholesale restructuring of each district that increases the percentage of white voters in each:

- Under the 2021 Plan, Senate District 6's voting-age population was 57.79% white and 23.90% Black. Under the 2023 Plan, the district's voting-age population is 72.32% white and 17.28% Black. The old Senate District 6 performed for Black-preferred candidates, but the new Senate District 6 does not. Palmer Remedial Rep. ¶¶ 17–18.

- Under the 2021 Plan, Senate District 42's voting-age population was 51.39% white and 30.78% Black. Under the 2023 Plan, the district's voting-age population is 59.13% white and 32.56% Black. The old Senate District 42 performed for Black-preferred candidates, but the new Senate District 42 does not. Palmer Remedial Rep. ¶¶ 17–18.

- Under the 2021 Plan, House District 40's voting-age population was 51.14% white and 32.98% Black. Under the 2023 Plan, the district's voting-age population is 62.93% white and 26.41% Black. The old House District 40 performed for Black-preferred candidates, but the new House District 40 does not. Palmer Remedial Rep. ¶¶ 17–18.

- Under the 2021 Plan, House District 81's voting-age population was 47.01% white and 21.83% Black. Under the 2023 Plan, the district's voting-age population is 65.85% white and 25.18% Black. The old House District 81 performed for Black-preferred candidates, but the new House District 81 does not. Palmer Remedial Rep. ¶¶ 17–18..

- Under the 2021 Plan, House District 82's voting-age population was 62.46% white and 16.83% Black. Under the 2023 Plan, the district's voting-age population is 65.28% white and 25.46% Black. The old House District 82 performed for Black-preferred candidates, but the new House District 82 does not. Palmer Remedial Rep. ¶¶ 17–18..

To be sure, Section 2 does not *require* crossover districts. *See Bartlett*, 556 U.S. at 19 (plurality op.); *but see Concerned Citizens of Hardee Cnty. v. Hardee Cnty. Bd. of Comm'rs*, 906 F.2d 524, 526 (11th Cir. 1990) (recognizing that Section 2 does protect *coalition* districts). But that does not mean that crossover districts are not "minority opportunity districts." After all, crossover districts are by definition districts in which a minority group, "if receiving help from some white [voters], could elect their candidates of choice." *Cooper*, 581 U.S. at 305; *see also Bartlett*, 556 U.S. at 13 (plurality op.) ("[I]n a crossover district, the minority population, at least potentially, is large enough to elect the candidate of its choice with help from voters who are members of the majority and who cross over to support the minority's preferred candidate.").

Indeed, the elimination of performing crossover districts not only defies this Court's instruction at 509–10, but also undermines the purpose of the Voting Rights Act, *see Bartlett*, 556 U.S. at 25 ("Crossover districts are, by definition, the result of white voters joining forces with minority voters to elect their preferred candidate. The Voting Rights Act was passed to foster this cooperation."), and raises serious constitutional concerns, *see id.* at 24 ("[I]f there were a showing that a State intentionally drew district lines in order to destroy otherwise effective crossover districts, that would raise serious questions under both the Fourteenth and Fifteenth Amendments."). The Court should not sanction the General Assembly's willful disregard of the Court's order, particularly in the context of a purported "remedy" to voting discrimination.

There is no credible argument that destroying these crossover districts was in service of or at all necessary to remedy the identified Section 2 violations. Mr. Esselstyn's illustrative House plan, for instance, created a new majority-Black district in west-metro Atlanta, two new majority-Black districts in south-metro Atlanta, and two majority-Black districts in Macon-Bibb without making any changes to House Districts 40, 81, or 82. *See* Rebuttal Expert Report of John B. Morgan ("Morgan Rebuttal Rep."), Ex. 15 (Def's. Tr. Ex. 3). By contrast, under the new House plan, none of these districts retain any of their population. Esselstyn Remedial Rep. ¶ 46. And although Mr. Esselstyn's illustrative Senate plan made

changes to Senate Districts 6 42, they were minimal. Senate District 6 retained more than 97% of its population under the 2021 plan and Senate District 42 retained over 94%. Morgan Rebuttal Rep. at Ex. 15 at Ex. 8. By contrast, under the new plan, Senate District 42 retains none of its population.

Moreover, the redrawing of these districts disserves the General Assembly's own stated criteria. Mr. Esselstyn's remedial report demonstrates that in the Senate plan, SB 1EX, the "[m]ean Reock and Polsby-Popper scores in the 15 changed districts each drop by 20%" relative to the prior Senate plan, and that two districts, Senate Districts 38 and 39, become less compact than the least compact district in the previous plan. *Id.* ¶¶ 15, 16. In the House plan, HB 1EX, over 93% of the districts' Reock scores are lower than they were in the previous plan. *id.* ¶ 39, and over 87% of the districts' Polsby-Popper scores are lower in the new plan, *id.* ¶ 40. The changed districts in Mr. Esselstyn's illustrative Senate plan "solidly outperform" the changed districts in the new plans on compactness measures. *Id.* ¶ 18. The changed districts in Mr. Esselstyn's illustrative House plan outperform the changed districts in the new plans according to their mean Reock scores. *Id.* ¶ 41.

Mr. Esselstyn's illustrative plans also outperform the new plans on core retention. The new House plan reassigns 1,684,564 Georgians to new House districts—more than twice the 695,686 Georgians assigned to new House districts under Mr. Esselstyn's illustrative plan. *Id.* ¶¶ 44, 45. The new Senate plan reassigns

1,539,468 Georgians to new Senate districts, whereas Mr. Esselstyn's illustrative Senate plan—which included a *third* new majority-Black Senate district— would have reassigned just 1,122,851 Georgians to new districts. *Id.* ¶¶ 23, 24. Many of the reshuffled voters in the new plans live in DeKalb and Gwinnett Counties, both of which are majority-minority counties that lie almost entirely outside of the vote-dilution areas. *Id.* ¶¶ 21, 47. The illustrative plans demonstrate that these changes were unnecessary: the General Assembly could have added the new majority-Black districts with "far less disruption" to the old plans. *Id.* ¶¶ 25, 48. But the General Assembly's continued insistence on diluting the votes of Black voters led it to create new plans that perform worse than both the illustrative plans and the plans struck down by this Court.

* * *

In short, the General Assembly's purported remedial plans continue to dilute Black voting strength and fail to fully remedy the Section 2 violation found by this Court.

CONCLUSION

The General Assembly's task was clear: it must provide Black Georgians in the areas identified by the Court additional opportunities to elect their candidates of choice while preserving all existing minority opportunity districts. It has failed. Plaintiffs respectfully ask the Court to enjoin HB 1EX and SB 1EX for failing to

remedy the Section 2 violations. Because the State has proven "unwilling to enact remedial plans . . . that satisfy [the Court's] requirements," this Court should "proceed to draw or adopt remedial plans," Doc. 294 at 511, to ensure Plaintiffs obtain relief in time for the 2024 election.

Expert Report of Mr. Blakeman B. Esselstyn

Pendergrass v. Raffensperger, No. 1:21-CV-05339-SCJ (N.D. Ga.)

December 12, 2023

Blakeman B. Esselstyn

Expert Report of Blakeman B. Esselstyn

I. INTRODUCTION

1. My name is Blakeman B. Esselstyn. I am the founder and principal of a consultancy called Mapfigure Consulting. A previous report that I submitted on December 5th, 2022 includes information about my qualifications.

2. In both the preliminary injunction hearing and the trial in this matter, I served as a testifying expert. I was accepted by the Court as an expert in redistricting, demographics, and census data, and my expert testimony was credited by the Court.

3. Plaintiffs' counsel has asked me to review the newly enacted Georgia General Assembly electoral district plans for each of the state legislature's two chambers. The analysis that I undertook included comparisons to the previously enacted plans and to the two illustrative redistricting plans, also for the Georgia State Senate and House of Representatives, that I presented in my December 5th, 2022 report.

4. This report will present my findings about the Georgia State Senate plan, followed by findings related to the plan for the Georgia State House. Background information about relevant demographic changes disclosed by the 2020 census, the number of seats and ideal total population counts for districts in each chamber, and compactness measures can also be found in my December 5th, 2022 report.

5. Unless otherwise specified, all map images in the report are ones that I created (though they may be maps showing redistricting plans I did not create).[1]

6. More detailed information about the sources of data, the software, and my methodology can be found in **Attachment A**.

7. My conclusions can be summarized as follows: the newly enacted plans for the State Senate and House both include additional majority-Black[2] districts (two and five respectively) compared to the previously enacted 2021 plans, however, five of the seven additional majority-Black districts contain significant portions of their Black voting age population from areas outside the vote dilution areas specified by the Court. The new plans also depart from their predecessors in other substantive ways, including less adherence to traditional redistricting principles. The illustrative plans that I created in 2022 generally exhibit more adherence to traditional redistricting principles than do the 2023 enacted plans. Further, the new plans include significant—and in the case of the State House, surprisingly extensive—changes that cannot be explained by the requirement to include additional majority-Black districts.

II. Georgia State Senate redistricting plan enacted in December 2023

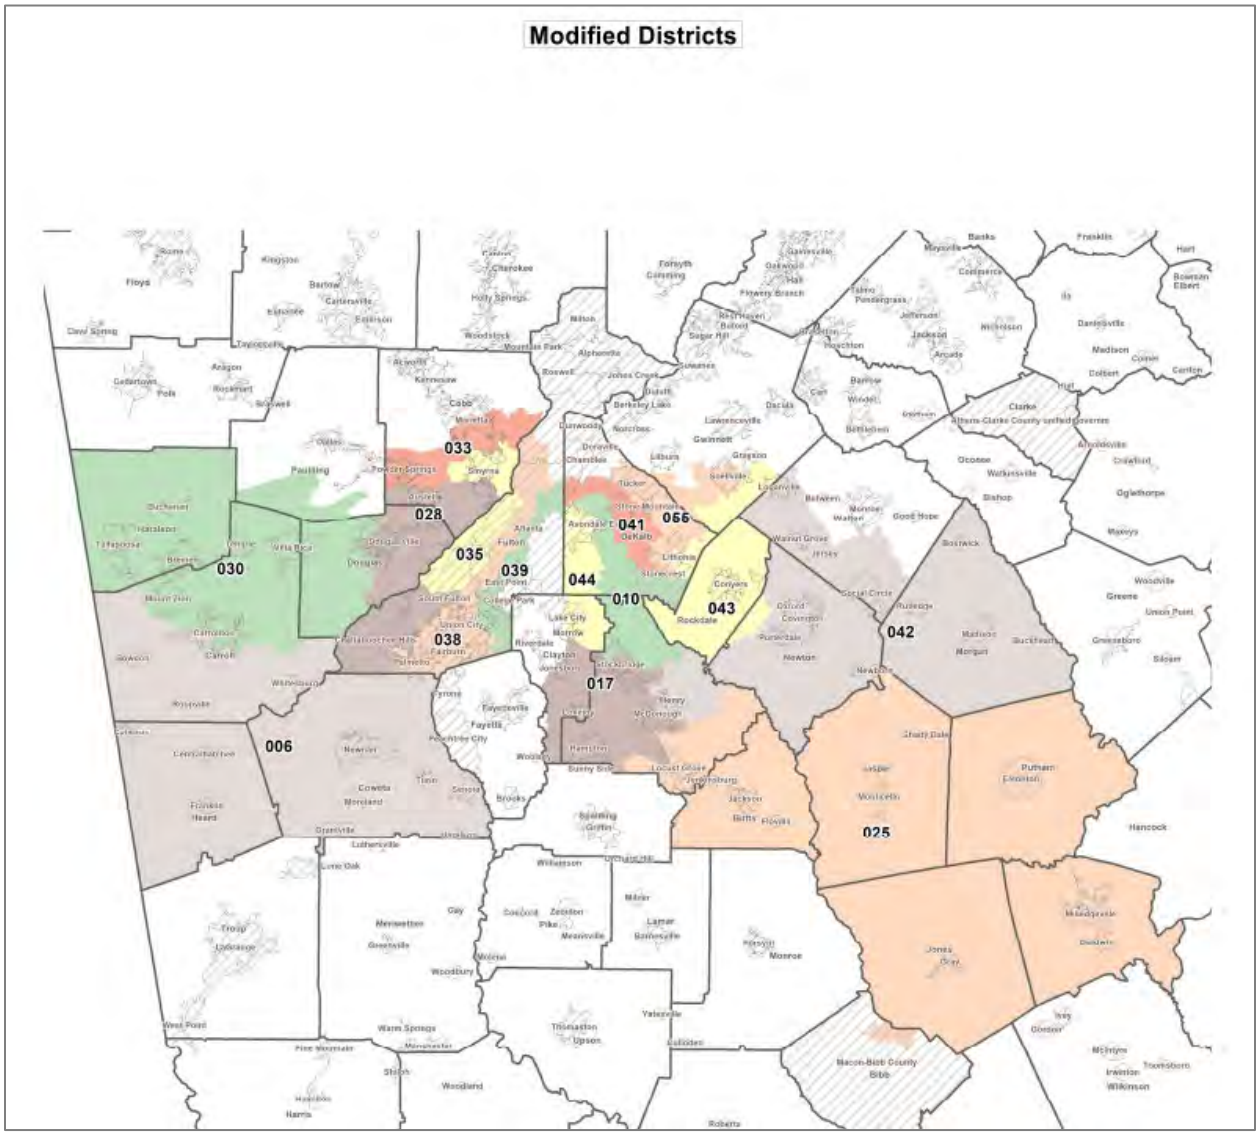
8. On December 8th, 2023, Georgia Governor Brian Kemp signed new State Senate districts into law. As shown in the Maps and Population Report Packet published

[1] Some maps deliberately do not show the State of Georgia in its entirety, as the districts in large areas of the northern and southern parts of the state are unchanged in the 2023 enacted plans. Focusing in on affected portions of the State's geography allows for more clarity and higher level of detail in the map figures.

[2] Per convention in Section 2 cases, "majority-Black" is taken to indicate that the district's *voting age* population that identifies as Black (alone or in combination) constitutes more than 50% of the district's voting age population.

on the Georgia General Assembly website, the plan modified 15 of the 56 districts relative to the plan enacted in 2021. See Figure 1. The packet is appended to this report as **Attachment B**.

Figure 1: Map of modified districts in enacted State Senate plan



9. Some of my analysis will focus on the 15 out of 56 (26.8%) of districts that were modified, as the statistics and characteristics of other districts in the plan are unchanged from the previously enacted plan that was used in the 2022 elections. But

comparisons with the December 5th, 2022 illustrative plan do not lend themselves to a focus on solely those 15 districts, since the illustrative plan changed different districts and also made more changes in the Black Belt area.

A. Population deviation

10. Population deviation in the 2023 enacted State Senate plan is comparable to both population deviation in the 2021 enacted plan and in the illustrative plan. In all three plans, most district populations are within ±1% of the ideal, and a small minority are within between ± 1 and 2%. None has a deviation of more than 2%. For the 2023 enacted plan the relative average deviation is 0.56%, for the 2021 enacted plan, the relative average deviation is 0.53%, and for the illustrative plan the relative average deviation is 0.67%. Population summary reports for the plans other than the 2023 enacted plan are provided as **Attachment C**.

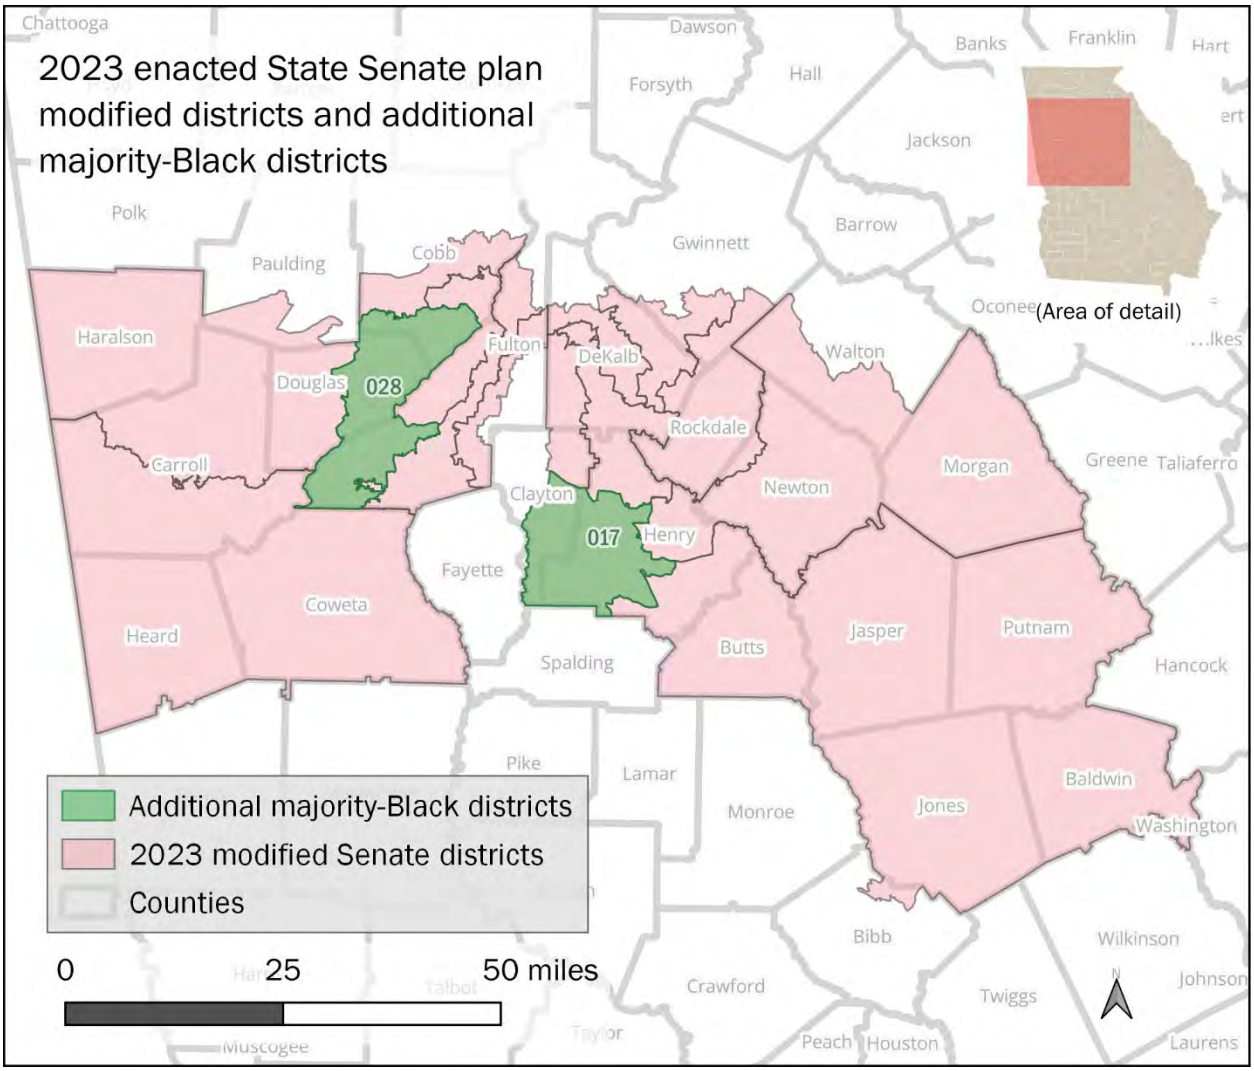
B. Majority-Black districts

11. Of the 56 districts in the 2023 enacted plan, 16 are majority-Black. This number is two higher than the number in the 2021 enacted plan.[3] The two districts that were not majority-Black districts in the 2021 plan that are majority-Black in the 2023 plan, namely Senate Districts 017 and 028, are both in the Metro Atlanta area, as can be seen in Figure 1 above. The four majority-Black districts that are south of Metro Atlanta in the Black Belt region were not changed by the 2023 Senate plan and thus will not be a

[3] District demographic statistics in the 2023 Maps and Population Report Packet did not include the APBVAP, or "any part Black" voting age population statistics, but I've included them as part of **Attachment D**.

focus of this report. The additional majority-Black districts in the 2023 enacted plans can be seen in the context of all the changed districts for the plan in Figure 2 below.

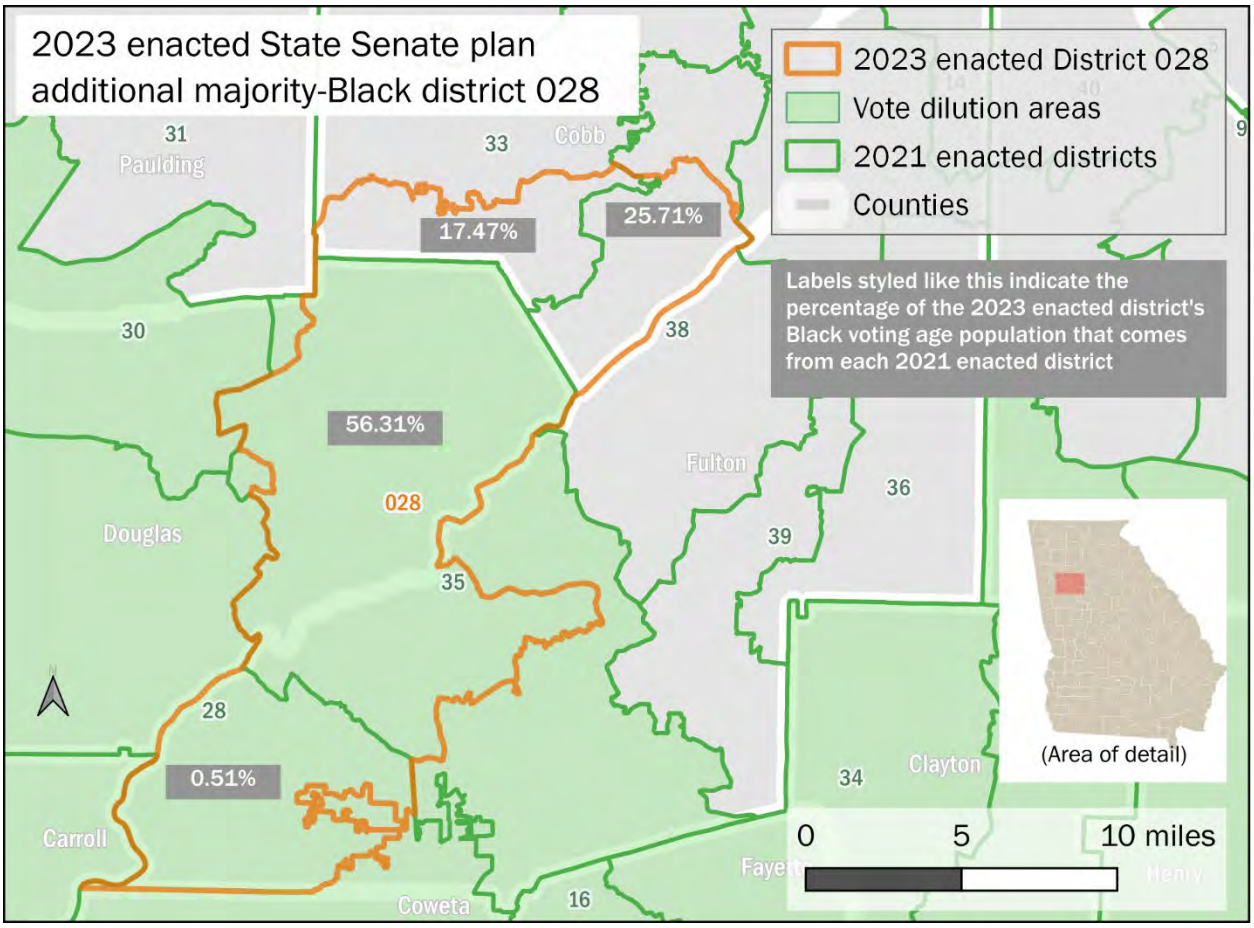
Figure 2: Map of additional majority-Black districts' locations in the context of all the modified districts in 2023 enacted State Senate plan



12. The Court's order from October 26th, 2023 identifies the following districts from the 2021 enacted plan as being in violation of Section 2 of the Voting Rights Act: 10, 16, 17, 25, 28, 30, 34, 35, 43, and 44. In this report, I will refer to those districts' geographies as the vote dilution areas.

13. Senate district 028, one of the two additional majority-Black districts in the enacted 2023 plan, only partially overlaps with the vote dilution areas. In fact, 43.18% of the Black voting age population of the district comes from areas outside the vote dilution areas. See Figure 3. The core constituency report, which indicates the "source" districts for the newly enacted districts (and their relative populations), from which the preceding percentage statistic and the statistics in Figure 3 are derived, is provided in **Attachment E**.

Figure 3: Map showing the relative location of 2023 enacted State Senate District 028 and vote dilution areas



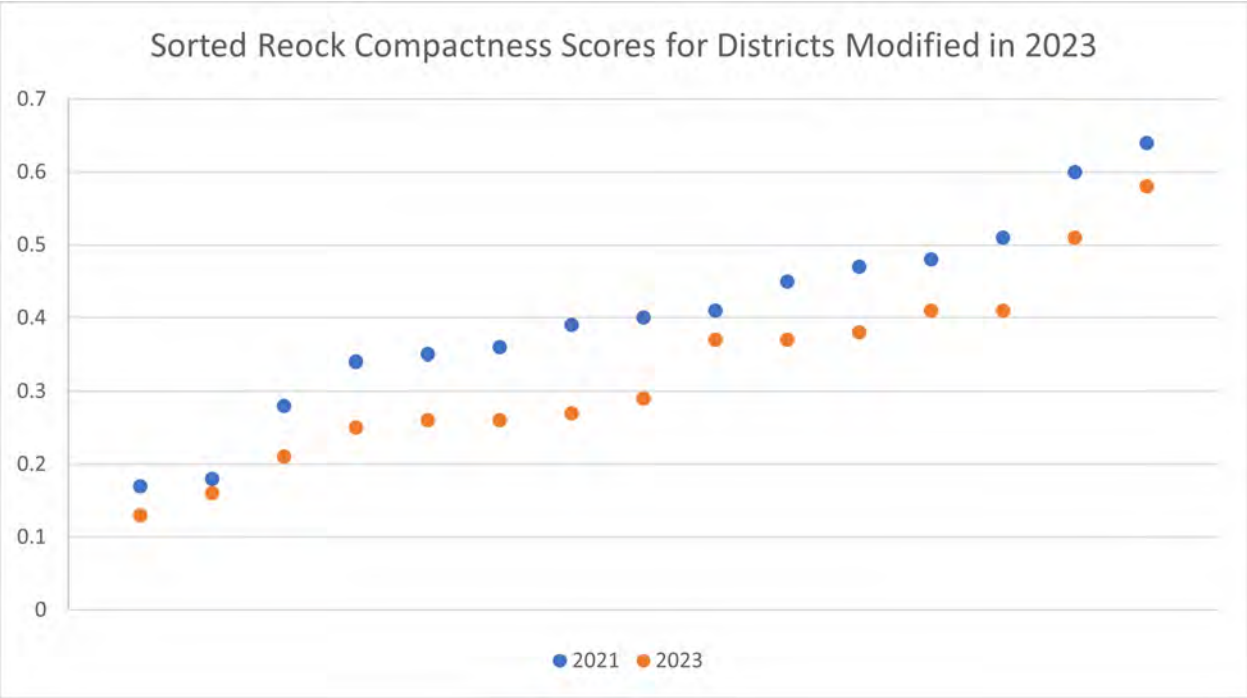
14. The total Black voting age population in the vote dilution areas that is *not* located in a majority-Black district in the 2023 enacted plan numbers 185,186.

C. Compactness

15. Compactness scores in the 2023 plan's modified districts diminish significantly relative to the same districts in the 2021 plan. Mean Reock and Polsby-Popper scores in the 15 changed districts each drop by 20% (from 0.40 to 0.32 and 0.25 to 0.20 respectively). Two districts (038 and 039) become even less compact on Reock and Polsby-Popper scores than what had been the least compact district in the 2021 enacted plan. Reports on measures of compactness for entire plans and changed districts can be found in **Attachment F**.

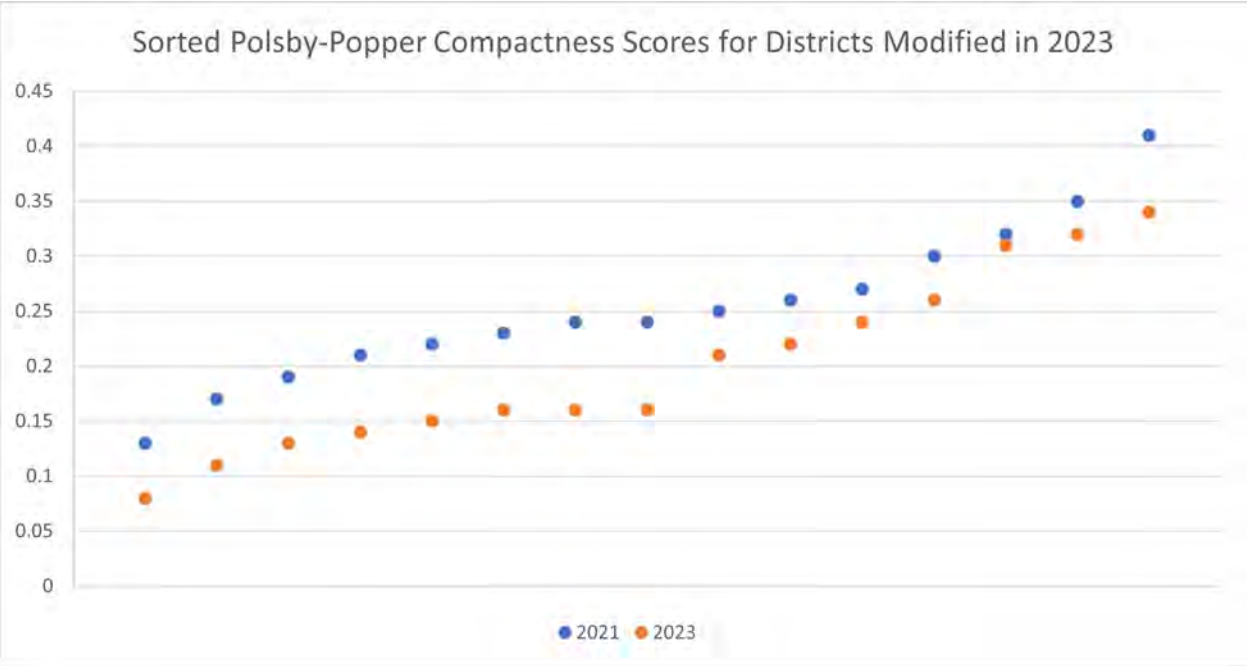
16. The chart below in Figure 4 shows the Reock scores from the 2021 and 2023 plans for the 15 districts that were modified in the latter, sorted in ascending order. This graphic illustrates that all of the modified districts in the 2023 plan score as less compact than their sorted counterparts in the 2021 plan and shows how much lower the districts in the 2023 plan perform on these metrics.

Figure 4: Chart of sorted compactness scores (Reock)



17. The chart in Figure 5 below, showing a similar graphic for the sorted Polsby-Popper scores, reveals a similar pattern, with all of the 2023 scores beneath the 2021 scores. Here more than half of the relevant 2023 districts score worse than the second-worst score from the same 2021 districts.

Figure 5: Chart of sorted compactness scores (Polsby-Popper)



18. Comparing the modified districts from the 2023 enacted plan to the changed districts in the illustrative plan is a less well-ordered undertaking, because (unlike the previous comparison), the districts are drawn from different areas, and there are a different number of changed districts.[4] That said, comparisons of the summary statistics of the changed districts in each plan show that the illustrative ones solidly outperform the 2023 enacted ones (mean Reock 0.38 vs. 0.32 and mean Polsby-Popper 0.25 vs. 0.20).[5]

[4] As mentioned earlier, the illustrative plan sought to illustrate a changed configuration in the Black Belt as well as Metro Atlanta, unlike the 2023 enacted plan.

[5] Even when looking at the summary scores for the entire plans, the illustrative Reock and Polsby-Popper scores are higher than the 2023 enacted ones.

D. Political subdivision splits

19. The newly enacted plan splits one county more than the 2021 plan, and—surprisingly—splits 18 more VTDs, an increase of 38.3% over the previous plan's total of 47.[6] The newly enacted plan splits four fewer counties than the illustrative plan, but as John Morgan pointed out in his January 23, 2023 report, four of the county splits in the illustrative plan were related to changes made in the eastern Black Belt area. The newly enacted plan splits 16 more VTDs than the illustrative plan. Relevant reports can be found in **Attachment G**.

E. Core retention

20. As mentioned previously, the newly enacted plan modified 15 districts, which is comparable to the number of districts changed in the illustrative plan outside of the Black Belt. A closer look at the areas impacted, however, indicates that the changes in the newly enacted plan would be significantly more disruptive.

21. Even though the new majority-Black Senate District 017 is in Clayton and Henry Counties, the plan makes surprisingly substantial changes to the arrangements of districts in DeKalb and Gwinnett Counties. One striking example is that Senate District 042 is relocated from western DeKalb, where it included part of the City of Atlanta, to the eastern edges of the Metro area, east of Rockdale County.

[6] While local election precincts in Georgia can and do change throughout the decade, the U.S. Census Bureau uses a similar entity called "voting districts" (also referred to as "VTDs") that are set at the time of each decennial census and do not change in between. The VTD geographies provided by the U.S. Census Bureau in 2020 as part of the P.L. 94-171 geographic support products were designed to match the precinct geographies in Georgia at the time of that census. Most redistricting software uses the VTD geographies instead of precincts, as those are political subdivision units to which the population counts are designed to be reliably assigned. In practice, the terms "precincts" and "VTDs" often are used interchangeably.

22. In another example from the western side of Atlanta, Senate District 006 goes from being in Fulton and Cobb Counties, also including part of the City of Atlanta, out to the western edge of the state, in Heard, Carroll, and Coweta Counties.

23. Analysis of the modified districts reveals that 1,539,468 people, or 14.4% of the entire state population would be assigned to a new district under this plan. Remarkably, this number of people, when divided by the number of affected districts, yields 102,631 people, 53.7% of a typical district population—in other words, on average, in the affected districts, well over half of the population would be re-assigned.[7]

24. In stark contrast, the illustrative Senate plan, which modified 47% *more* districts (22 instead of 15, as it was illustrating a changed configuration in the Black Belt as well), would have changed the assignments of 1,122,851 (a reduction of 416,617 people, or 27%, *even with seven more* affected districts). When expressed as a per-district reassignment, the number turns out to be 51,039, less than half of the per-district disruption in the newly enacted plan.

25. The illustrative plan shows that this extent of disruption is by no means a required consequence of creating additional majority-Black districts, and also that it is not necessary to relocate entire districts to distant areas where they will retain none of the population from their previous configuration.

[7] The core constituencies reports, which yielded these numbers, can be found in **Attachment E**, as has been mentioned earlier.

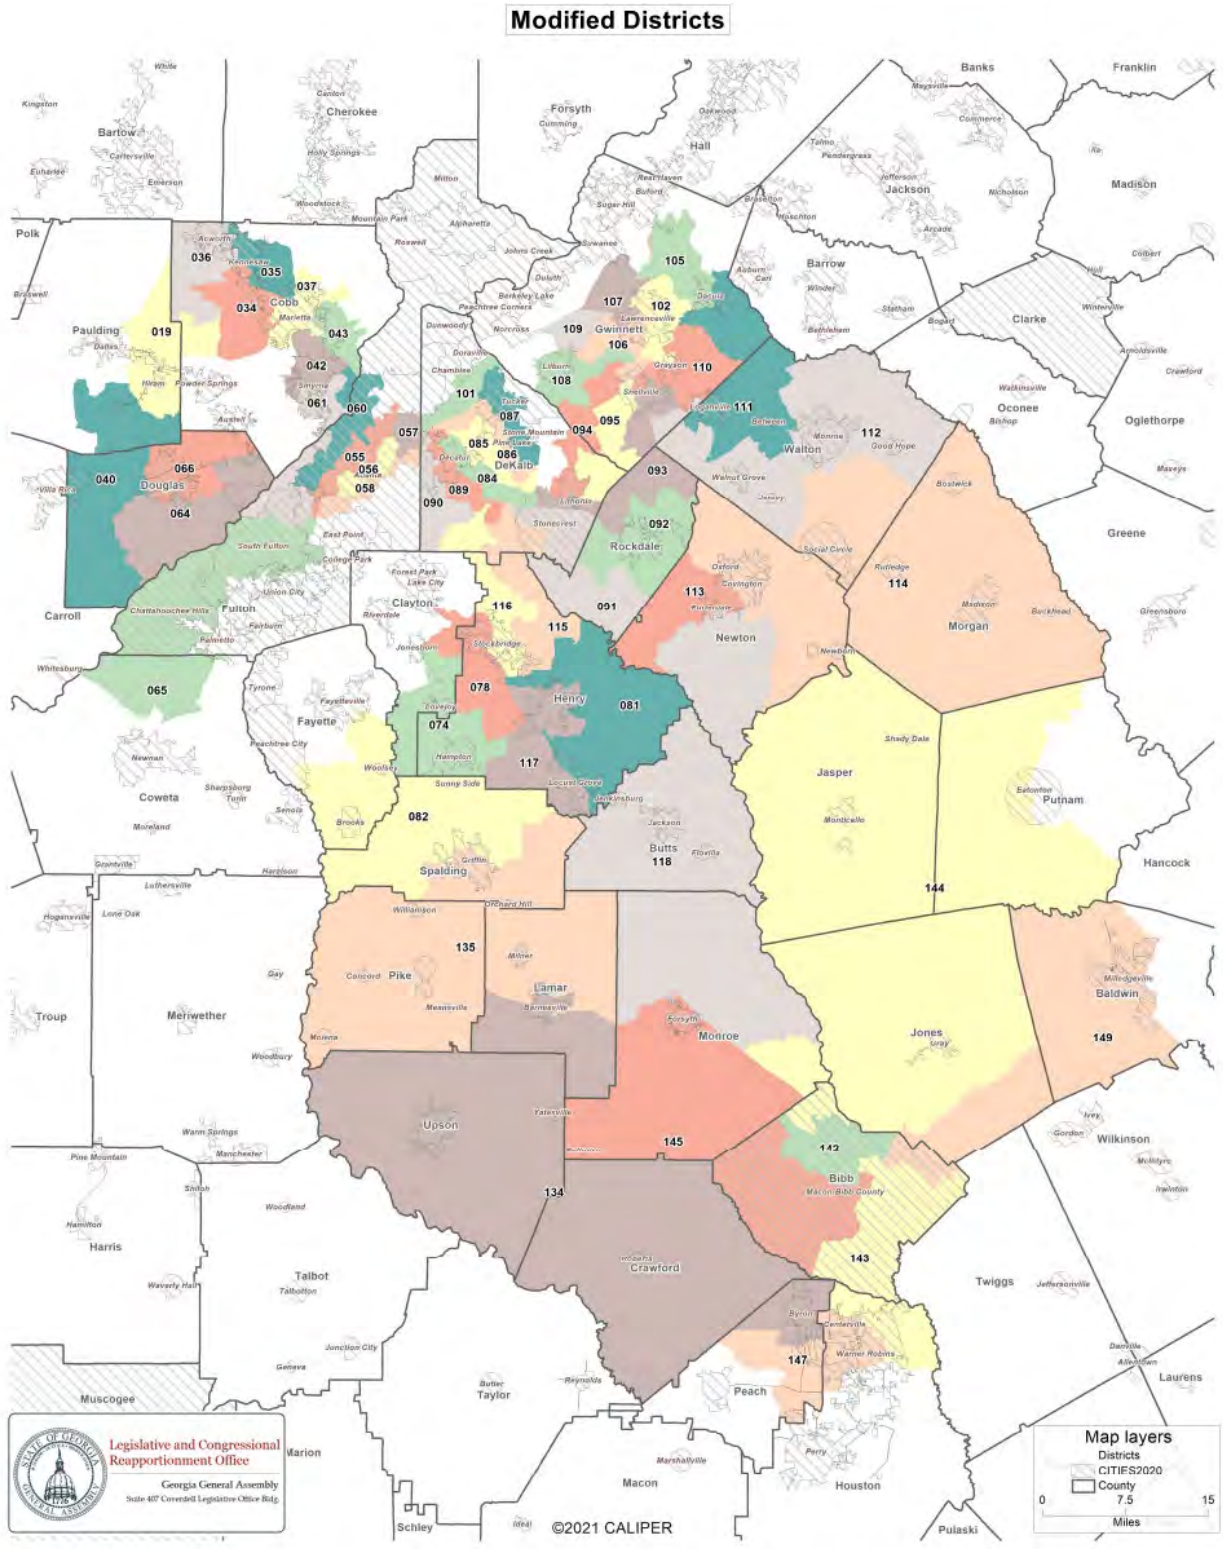
F. Incumbents

26. Based on my analysis using the incumbent addresses provided by counsel shortly after the 2022 general elections, the changed districts in the proposed plan appear to pair no incumbents. The analysis for my illustrative plan also showed that no incumbents would be paired.

III. Georgia House redistricting plan enacted in December 2023

27. On December 8th, 2023, Georgia Governor Brian Kemp signed new State House districts into law. The Maps and Population Report Packet published on the Georgia General Assembly website suggests that the plan modified 56 of the 180 districts relative to the plan enacted in 2021. See Figure 6. The packet is appended to this report as **Attachment H**.

Figure 6: Map of modified districts in enacted State House plan



28. Interestingly, the packet's delineation of "Modified Districts" does not include House District 133. The shape and location of House District 133 have changed significantly from the 2021 plan to the 2023 plan. The 2023 incarnation of House District 133 contains none of the same population as the 2021 incarnation.[8]

29. Much of my analysis will thus focus on the 57 out of 180 (31.7%) of districts that were modified, as the statistics and characteristics of other districts in the plan are unchanged from the previous plan that was used in the 2022 elections.

A. Population deviation

30. Population deviation in the 2023 enacted State House plan is comparable to both population deviation in the 2021 enacted plan and in the illustrative plan. In all three plans, most district populations are within ±1% of the ideal, and a small minority are within between ± 1 and 2%. None has a deviation of more than 2%. For the 2023 enacted plan the relative average deviation is 0.63%, for the 2021 enacted plan, the relative average deviation is 0.61%, and for the illustrative plan the relative average deviation is 0.64%. Population summary reports for the plans other than the 2023 enacted plan are provided in **Attachment I**.

B. Majority-Black districts

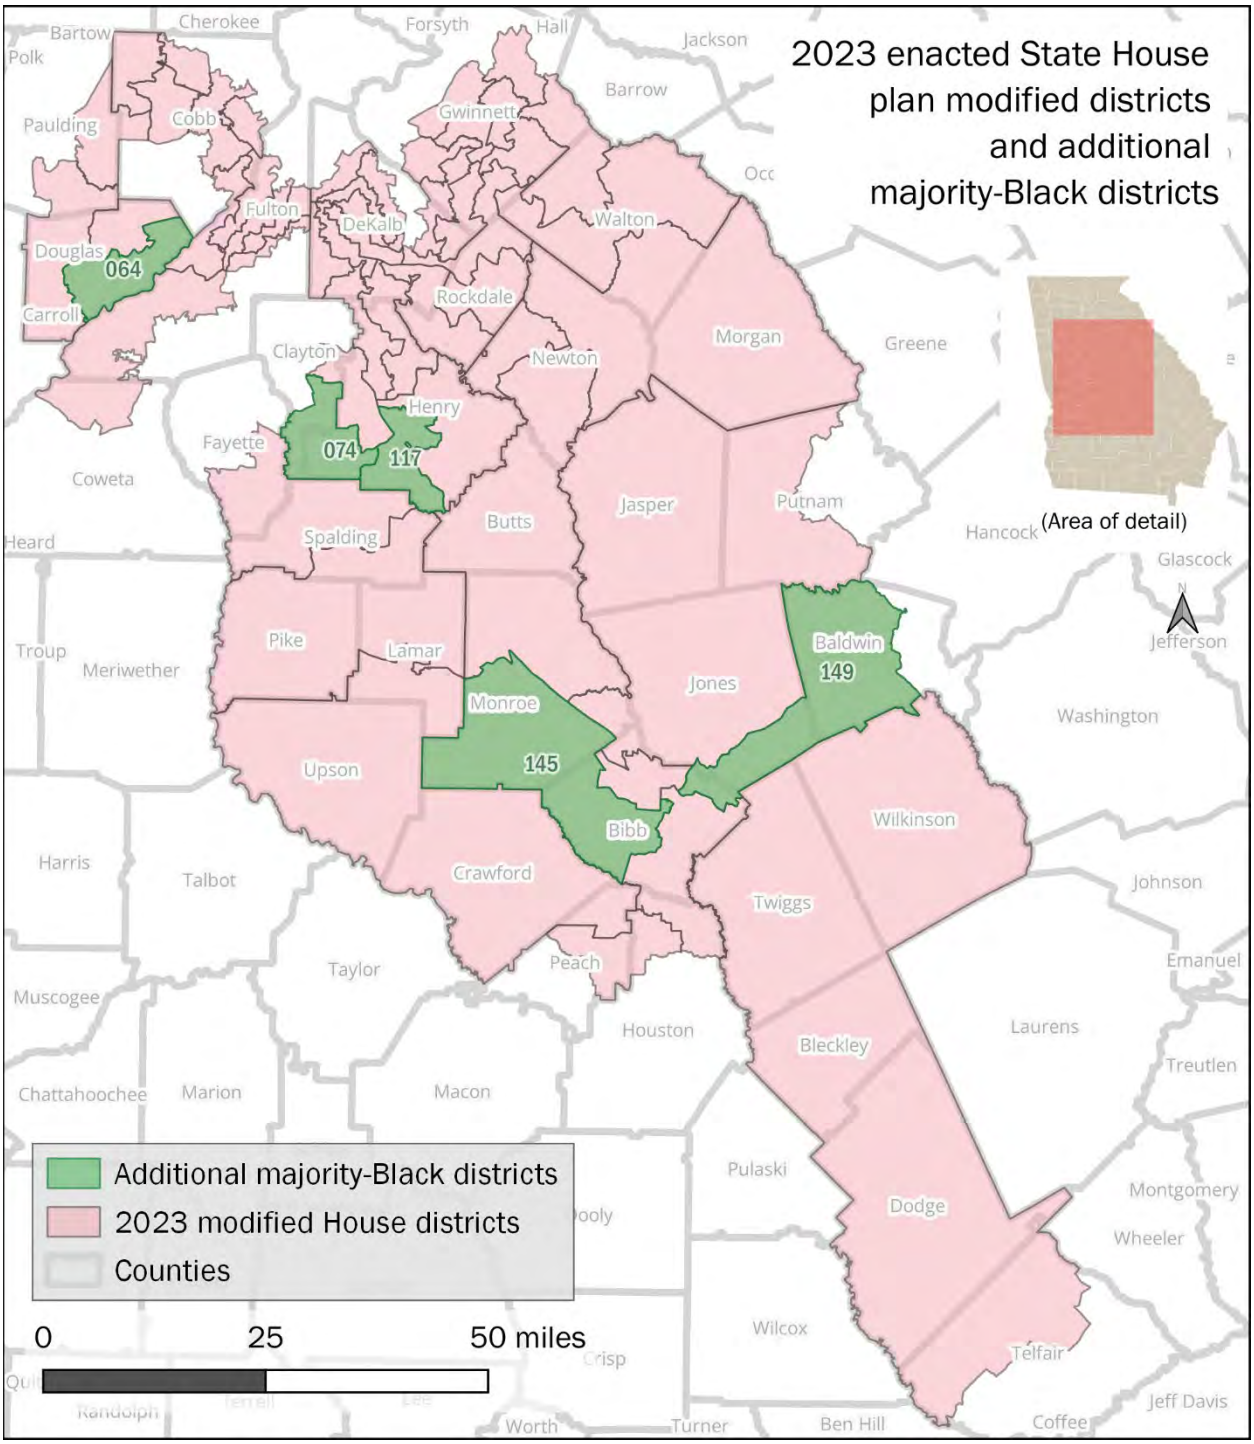
31. Of the 180 districts in the 2023 enacted plan, 54 are majority-Black. This number is five higher than the equivalent number for the 2021 enacted plan. The five

[8] My presumption is that the General Assembly packet's assertion that District 133 was not modified is because its geography matches the geography of House District 149 from the 2021 plan. However, in my opinion, to omit any mention of District 133 from the map of modified districts gives an incomplete picture of the extent of change.

districts that were not majority-Black districts in the 2021 plan that are majority-Black in the 2023 plan are 064, 074, 117, 145, and 149. The first three in that list are in the Metro Atlanta area, and the last two are in the Macon-Bibb general area, as can be seen in Figure 6.

32. Below, Figure 7 shows the locations of the five additional majority-Black districts in the context of the 57 modified districts.

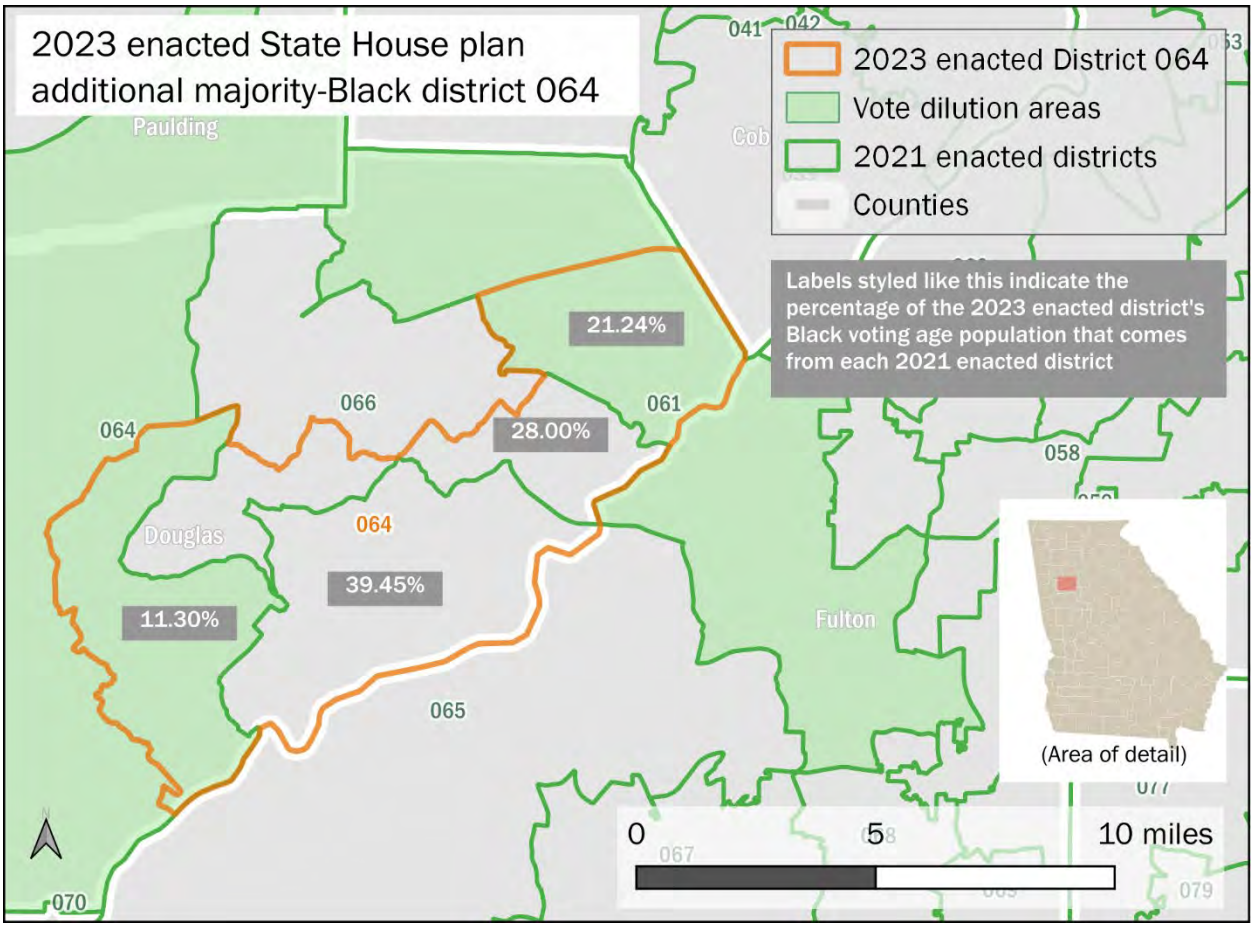
Figure 7: Map of additional majority-Black districts' locations in the context of all the modified districts in the 2023 enacted House plan



33. The Court's order from October 26th, 2023 identifies the following districts from the 2021 enacted plan as being in violation of Section 2 of the Voting Rights Act: 61, 64, 74, 78, 117, 133, 142, 143, 145, 147, and 149. In this report, I will refer to those districts' geographies as the vote dilution areas.

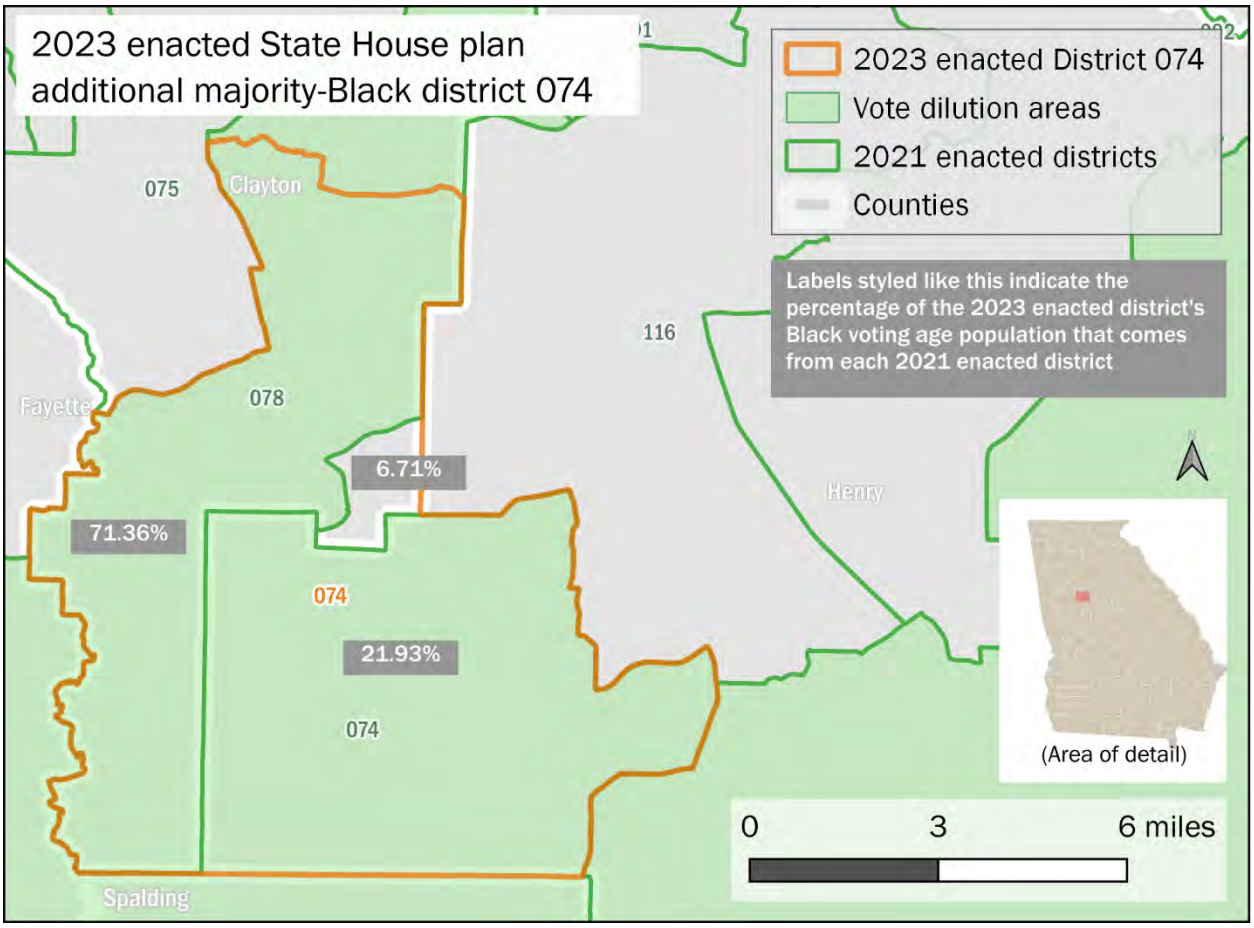
34. House District 064, one of the five additional majority-Black districts in the enacted 2023 plan, only partially overlaps with the vote dilution areas. In fact, 67.45% of the Black voting age population of the district comes from areas outside the vote dilution areas. See Figure 8. The core constituency report, which indicates the "source" districts for the newly enacted districts (and their relative populations), from which the preceding percentage statistic and the statistics in the following three paragraphs and in Figure 8, Figure 9, Figure 10, and Figure 11 are derived, is provided in **Attachment J**.

Figure 8: Map showing the relative location of 2023 enacted State House District 064 and vote dilution areas



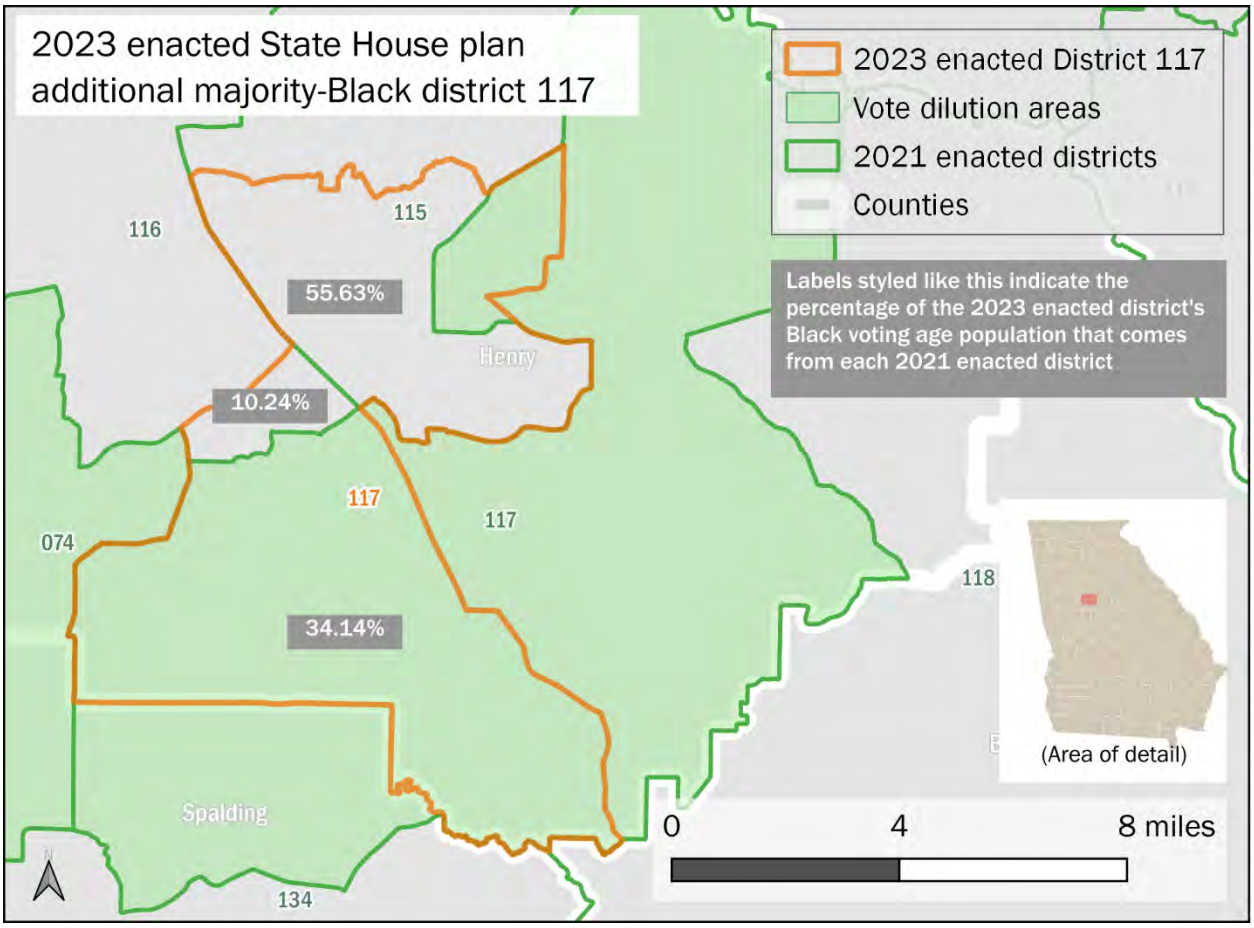
35. House District 074, another of the five additional majority-Black districts in the enacted 2023 plan, only partially overlaps with the vote dilution areas. 6.71% of the Black voting age population of the district comes from areas outside the vote dilution areas. See Figure 9.

Figure 9: Map showing the relative location of 2023 enacted State House District 074 and vote dilution areas



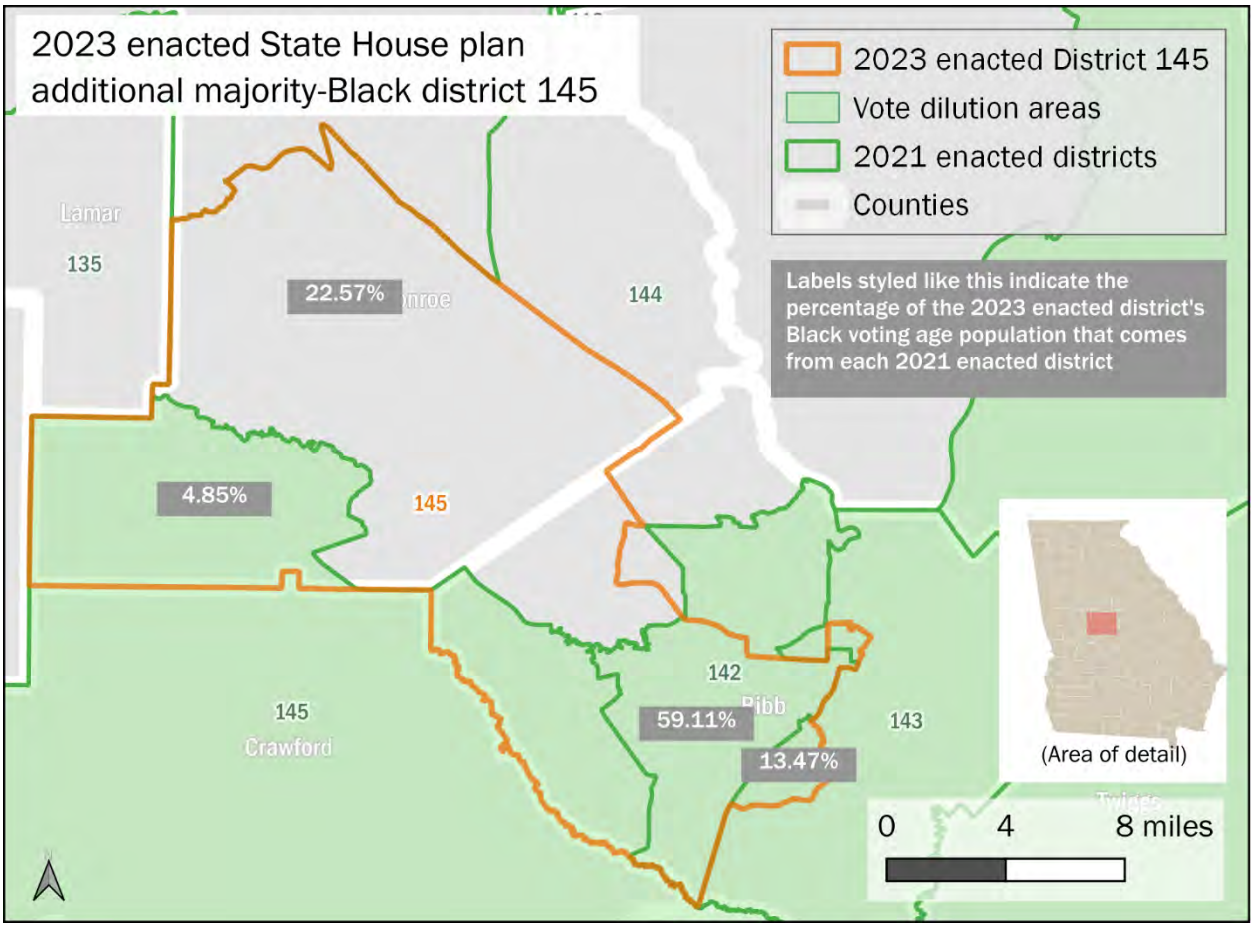
36. House District 117, another of the five additional majority-Black districts in the enacted 2023 plan, only partially overlaps with the vote dilution areas. In fact, 65.86% of the Black voting age population of the district comes from areas outside the vote dilution areas. See Figure 10.

Figure 10: Map showing the relative location of 2023 enacted State House District 117 and vote dilution areas



37. House District 145, another of the five additional majority-Black districts in the enacted 2023 plan, only partially overlaps with the vote dilution areas. In fact, 22.57% of the Black voting age population of the district comes from areas outside the vote dilution areas. See Figure 11.

Figure 11: Map showing the relative location of 2023 enacted State House District 145 and vote dilution areas



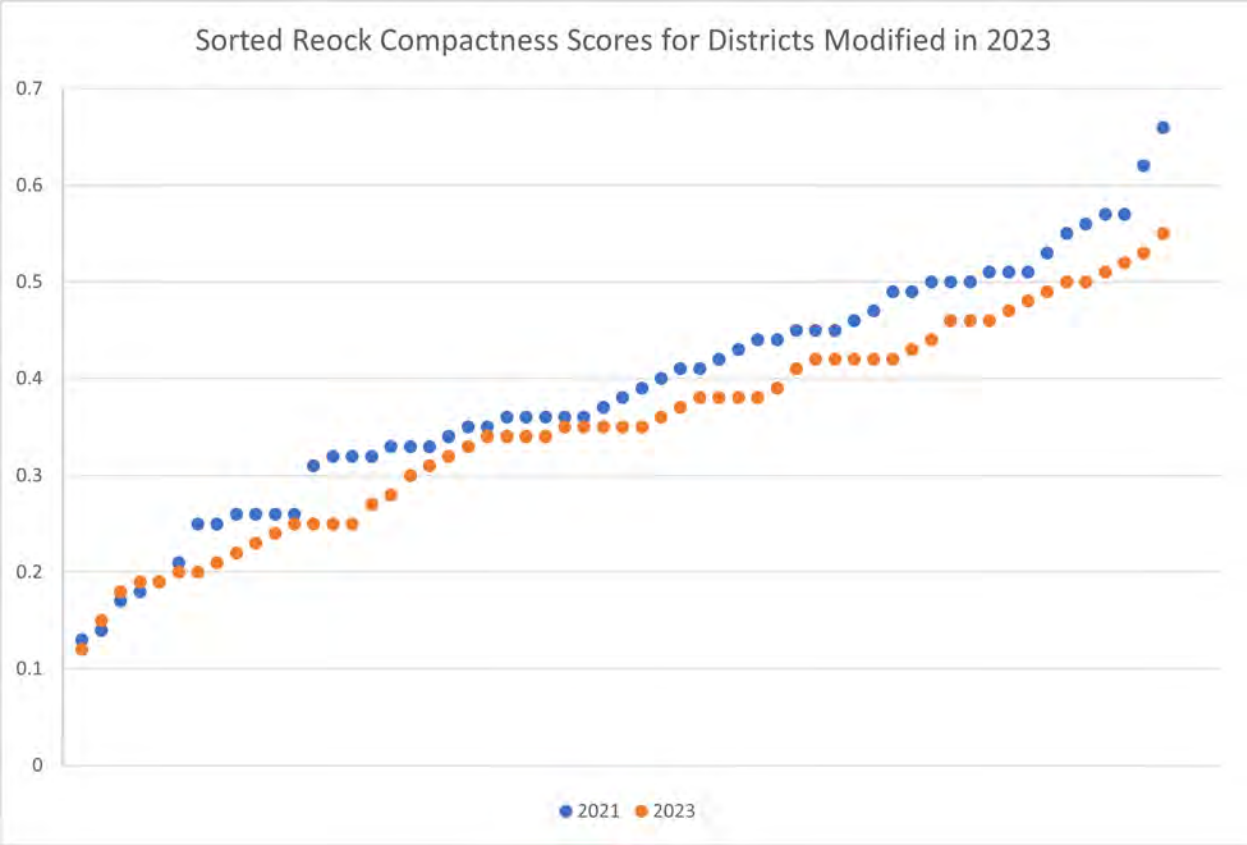
38. The total Black voting age population in the vote dilution areas that is *not* located in a majority-Black district in the 2023 enacted plan numbers 57,630.

C. Compactness

39. Comparing the 57 modified districts' average Reock and Polsby-Popper compactness scores shows that for the 2023 plan the former is lower by 0.04 (0.35 vs. 0.39) and the latter by 0.02 (o.25 vs. 0.27) than in the 2021 plan. Another way of viewing these relationships is in Figure 12 below, which shows that when the Reock scores are in sorted order, 93% of the 2023 scores are lower than their 2021

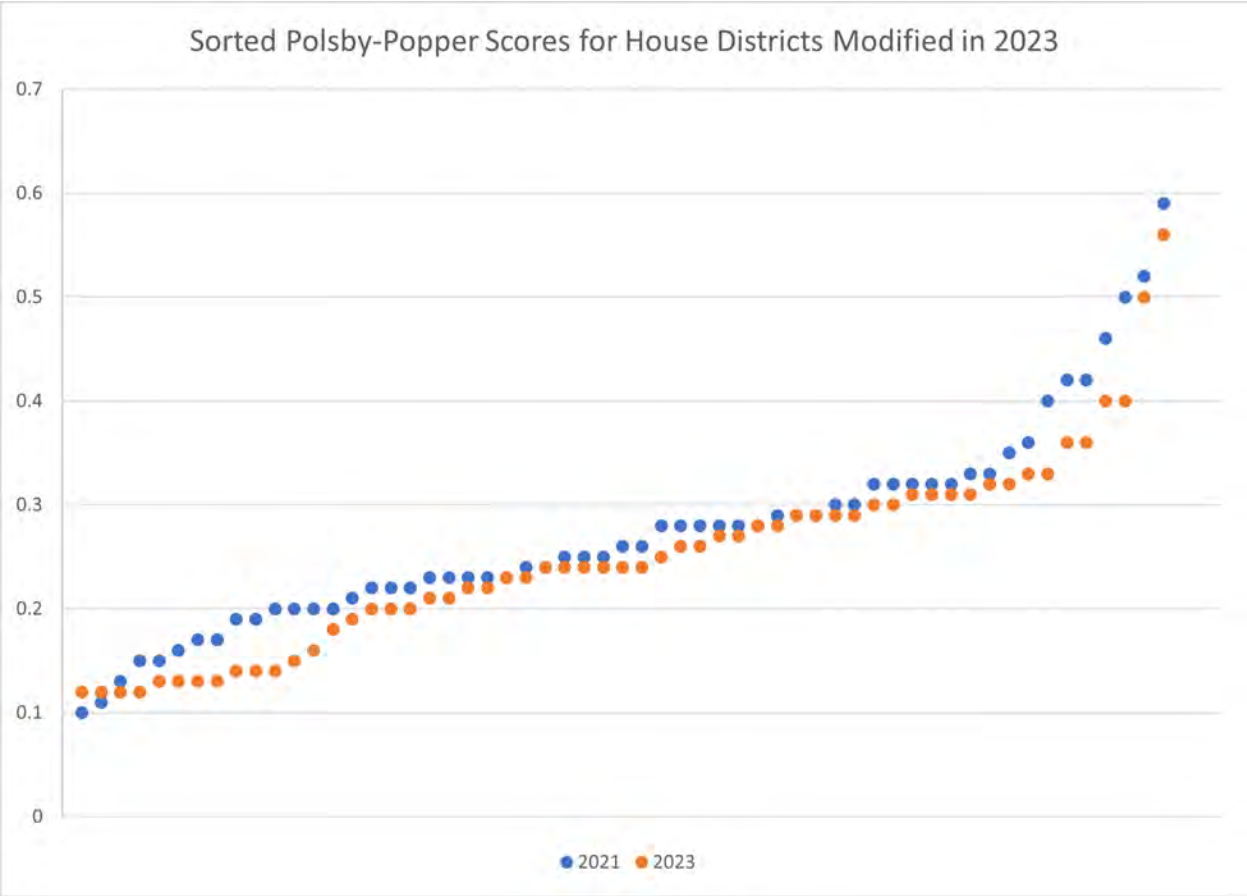
counterparts (3 of the 57 are higher, and one is the same). Tables reporting compactness scores of entire plans and changed districts can be found in **Attachment K**.

Figure 12: Chart of sorted compactness scores (Reock)



40. Similarly, Figure 13 below shows the sorted Polsby-Popper scores, and with comparable findings. In the Polsby-Popper instance, over 87% of the sorted 2023 scores are lower than their 2021 parallels; 5 out of 57 are equal, and 2 out of 57 are higher.

Figure 13: Chart of sorted compactness scores (Polsby-Popper)



41. Comparing the modified districts from the 2023 enacted plan to the changed districts in the illustrative plan is a far less well-ordered undertaking, because (unlike the previous comparison), the districts are drawn from different areas, and there are a very different number of changed districts—57 in the 2023 enacted plan vs. 25 in the illustrative plan, as will be discussed further below. That said, comparisons of the summary statistics of the changed districts in each plan show that the illustrative ones outperform the 2023 enacted ones on the mean Reock (0.37 vs 0.35) and come out even on the mean Polsby-Popper (both are 0.25). When looking at the summary scores for the entire plans, the illustrative mean Reock and Polsby-Popper scores (0.39, 0.28) are higher than the 2023 enacted ones (0.38, 0.27).

D. Political subdivision splits

42. The newly enacted plan splits one fewer county than the 2021 enacted plan, but eight more VTDs (an increase of 4.3%). The newly enacted plan splits two fewer counties than the illustrative plan, but seven more VTDs. Relevant reports can be found in **Attachment L**.

E. Communities of interest

43. One community of interest that received a significant amount of attention in the public comment related to the 2021 redistricting process was Macon-Bibb County, with repeated entreaties to keep the consolidated government's jurisdiction intact or keep districts entirely within it rather than grouping fragments of the county with parts of neighboring, more rural counties.[9] In the newly enacted house plan, only one district is wholly in Macon-Bibb, and four other districts pair fragments of Macon-Bibb with outlying counties. By contrast, both the 2021 enacted plan and the illustrative plan had two districts wholly in Macon-Bibb and two partly in Macon-Bibb.

F. Core retention

44. As with the Senate plan described above, the newly enacted House plan would be significantly more disruptive than it needs to be. It would put 1,684,564 people into a new district - this is 15.73% of the population of Georgia. That's the equivalent of more than 28 full districts worth (28.31, to be more precise). On a per-district basis, that

[9] Please see my December 5th, 2022 report for more specifics and citations.

means that 29,554 people (on average) would get re-assigned, or 49.7% of a typical district population.[10]

45. By contrast, the illustrative plan modifies only 25 districts, well under half (43.9%) of the 57 districts modified in the newly enacted plan. And the illustrative plan would reassign 695,686 people (41.3% of the total for the 2023 enacted plan), or 6.49% of the state's population.

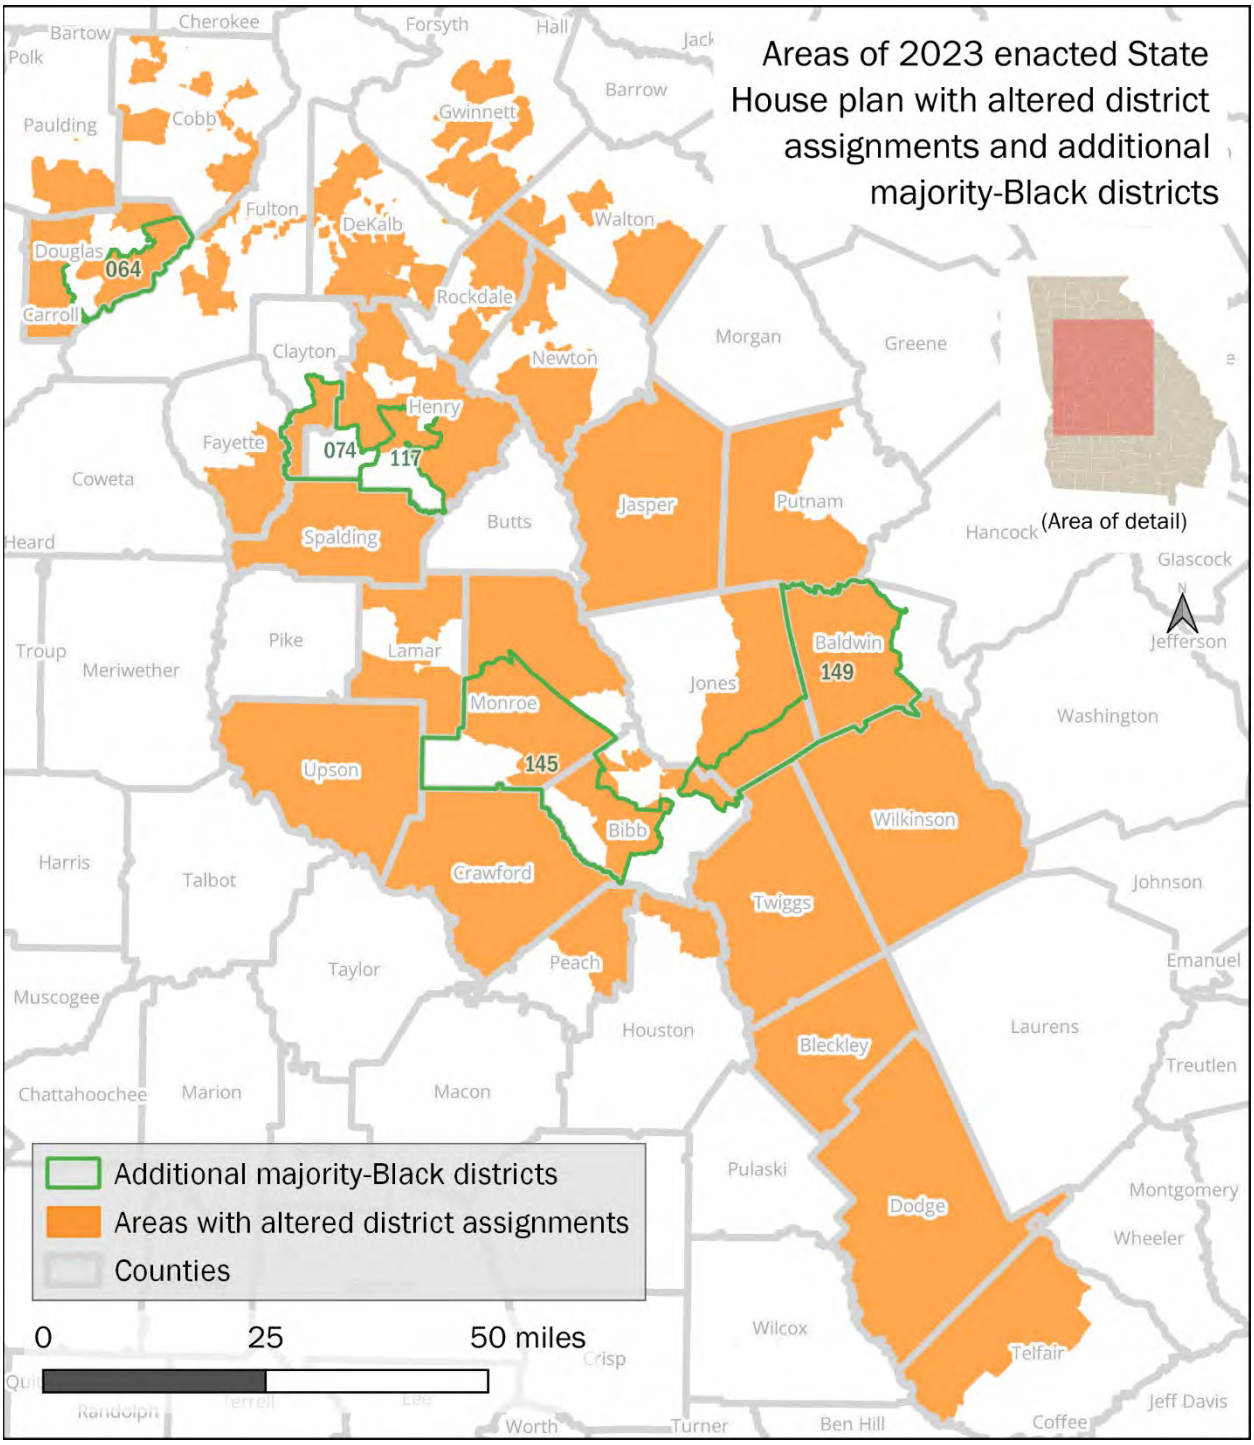
46. Six districts share zero population in common with their positioning in the 2021 plan (namely 040, 081, 082, 101, 134, and 149). The first three of these, like the ones discussed in the Senate plan, are relocated from the core counties of Metro Atlanta to the outer parts of that region. Seven other districts contain less than a quarter of their population in the previous plan.

47. As with the Senate plan, these extensive changes are not a necessary by-product of drawing additional majority-Black districts. The illustrative plan shows that that goal can be achieved with far less disruption.

48. The map in Figure 14 shows all the areas where population would be reassigned to a new district. One noteworthy aspect is the areas that are far removed from the new majority-Black areas—such as Gwinnett County, where eleven House districts were modified.

[10] The core constituencies reports, which yielded these numbers, can be found in **Attachment J**, as has been mentioned earlier.

Figure 14: Map showing all areas where district assignments have changed as well as additional majority-Black districts



G. Incumbents

49. Using the late 2022 list of incumbent addresses (174 of the 180) received from counsel I analyzed the relative locations of incumbent addresses and the modified districts.

50. The plan pairs eight incumbents in four districts[11]—the same number paired in my illustrative plan, (and the enacted plan, according to John Morgan's PI report).[12]

51. Eight of the newly modified districts have no incumbent.[13] Interestingly, half of these eight are additional majority-Black districts, namely, 064, 074, 117, and 145.[14]

IV. Conclusion

52. This report has demonstrated that the newly enacted plans for the State Senate and House both include additional majority-Black districts (two and five respectively) compared to the previously enacted 2021 plans, however, five of the seven additional majority-Black districts contain significant portions of their Black voting age population that are from areas outside the vote dilution areas specified by the Court. The new plans also perform worse than their predecessors on compactness and political subdivision splits. The House plan needlessly divides the Macon-Bibb community of interest into five districts, only one of which is wholly in the county. The illustrative plans that I created in 2022 generally exhibit more adherence to traditional redistricting

[11] 1. These are 065: Mike Glanton and Mandisha A. Thomas; 090: Becky Evans and Saira Draper; 107: Sam Park and Gregg Kennard; 135: Beth Camp and David Knight.

[12] See Declaration of John B. Morgan, January 18th, 2022, p. 9.

[13] Please note that the provided list was missing 6 incumbents, so this could account for some of these "empty" districts.

[14] The other four are 058, 061, 106, and 110.

principles than do the 2023 enacted plans. Further, the new plans include significant—and in the case of the State House, surprisingly extensive—changes that cannot be explained by the requirement to include additional majority-Black districts.

53. I reserve the right to supplement this report in consideration of additional facts, testimony, or materials that may come to light.

Executed on December 12th, 2023.

Data sources, software, and methodology

1. I arrived at the findings in the expert report using data from the United States Census Bureau's website (https://www.census.gov). This federal agency produces a) geographic files—e.g., county boundaries and block boundaries, b) tables of the block-level demographic information yielded specifically for redistricting (sometimes referred to as the PL 94-171 data) from the decennial census counts, and c) "block assignment files," which are important for linking geography data to other data. Representative links for these three categories of data are provided below:

a) https://www.census.gov/geographies/mapping-files/time-series/geo/tiger-line-file.2020.html

b) https://data.census.gov/cedsci/all?q=&y=2020&d=DEC%20Redistricting%20Data%20%28PL%2094-171%29

c) https://www.census.gov/geographies/reference-files/time-series/geo/block-assignment-files.html

2. Another critical source of information for the analysis was the Georgia General Assembly's Legislative and Congressional Reapportionment Office webpage, available at https://www.legis.ga.gov/joint-office/reapportionment. This webpage provided links to representations of the 2021 and 2023 enacted State Senate and State House plans, as well as statistical summaries for the plans.

3. The list of residential addresses of elected Georgia General Assembly legislators was provided to me by counsel. To associate those addresses with coordinates on a map, I used the *Google Maps Platform's Geocoding API*.

4. The primary software application I used in the analysis of maps and the creation of the illustrative plans is *Maptitude for Redistricting*, produced by the Caliper Corporation. This specialized geographic information system (GIS) software allows for

the importing, interconnecting, and synthesis of the multiple Census Bureau data files listed above. It allows for an existing plan to be imported (like the enacted plans from the Georgia General Assembly), then viewed in maps and quantitatively analyzed. The application generates not only the aggregated statistics for each of the created districts, but also can supply reports on overall characteristics of the plan like average district compactness and population deviation. *Maptitude for Redistricting* is widely used by state and local governments for redistricting and is in fact used by the Georgia General Assembly.

5. For the production of the visual figures in the report, I used two other pieces of software. For the maps, I used a separate open-source GIS software tool called *QGIS*. *QGIS* enabled me to take geographic files exported from *Maptitude for Redistricting* and create high-resolution graphics for insertion into the document with myriad options for customization of visual elements. For the graphs and charts, I used *Microsoft Excel*.

Measures of Compactness Report

Measures of Compactness Summary

Reock	The measure is always between 0 and 1, with 1 being the most compact.
Schwartzberg	The measure is usually greater than or equal to 1, with 1 being the most compact.
Polsby-Popper	The measure is always between 0 and 1, with 1 being the most compact.
Area / Convex Hull	The measure is always between 0 and 1, with 1 being the most compact.
Cut Edges	A smaller number implies a more compact plan. The measure should only be used to compare plans defined on the same base layer.

Political Subdivision Splits Between Districts

Saturday, December 3, 2022 3:10 PM

Number of subdivisions not split:

County	125
Voting District	2,649

Number of subdivisions split into more than one district:

County	34
Voting District	49

Number of splits involving no population:

County	0
Voting District	7

Split Counts

County
- Cases where an area is split among 2 Districts: 22
- Cases where an area is split among 3 Districts: 7
- Cases where an area is split among 4 Districts: 1
- Cases where an area is split among 6 Districts: 1
- Cases where an area is split among 7 Districts: 1
- Cases where an area is split among 9 Districts: 1
- Cases where an area is split among 10 Districts: 1

Voting District
- Cases where an area is split among 2 Districts: 48
- Cases where an area is split among 3 Districts: 1

Total: **10,711,908**
Ideal District: **59,511**

Summary Statistics:

Population Range:	58,678 to 60,375
Ratio Range:	0.03
Absolute Range:	-833 to 864
Absolute Overall Range:	1,697
Relative Range:	-1.40% to 1.45%
Relative Overall Range:	2.85%
Absolute Mean Deviation:	372.39
Relative Mean Deviation:	0.63%
Standard Deviation:	433.63

The District Packet report published by the Georgia General Assembly does not include statistics for the percentage of the voting age population that is "Black or African American alone or in combination," also known as the "any part Black voting age population" percentage or "APBVAP%." As these percentages are relevant for determining which House districts can be considered majority-Black under the conventions used in the expert report, I have provided them below after having exported a listing from the *Maptitude for Redistricting* software.

District	APBVAP%	District	APBVAP%	District	APBVAP%	District	APBVAP%	District	APBVAP%
1	4.20%	25	5.90%	49	8.42%	73	12.11%	97	26.77%
2	3.15%	26	4.01%	50	12.40%	74	25.52%	98	23.25%
3	3.35%	27	3.69%	51	23.68%	75	74.40%	99	14.71%

Core Constituencies

Tuesday, December 12, 2023 4:05 PM

From Plan: **GA House Enacted**

Plan: GA House Illustrative, District 1 -- 59,666 Total Population

	Population	[18+_AP_Blk]
Dist. 1	59,666 (100.00%)	1,966 (100.00%)
Total and % Population		1,966 (3.30%)

Plan: GA House Illustrative, District 10 -- 59,519 Total Population

	Population	[18+_AP_Blk]
Dist. 10	59,519 (100.00%)	1,757 (100.00%)
Total and % Population		1,757 (2.95%)

Plan: GA House Illustrative, District 100 -- 60,030 Total Population

	Population	[18+_AP_Blk]
Dist. 100	60,030 (100.00%)	4,273 (100.00%)
Total and % Population		4,273 (7.12%)

Plan: GA House Illustrative, District 101 -- 59,938 Total Population

	Population	[18+_AP_Blk]
Dist. 101	59,938 (100.00%)	11,269 (100.00%)
Total and % Population		11,269 (18.80%)

Plan: GA House Illustrative, District 102 -- 58,959 Total Population

	Population	[18+_AP_Blk]
Dist. 102	58,959 (100.00%)	16,164 (100.00%)
Total and % Population		16,164 (27.42%)

Plan: GA House Illustrative, District 103 -- 60,197 Total Population

	Population	[18+_AP_Blk]
Dist. 103	60,197 (100.00%)	7,454 (100.00%)
Total and % Population		7,454 (12.38%)

Plan: GA House Illustrative, District 104 -- 59,362 Total Population

	Population	[18+_AP_Blk]
Dist. 104	59,362 (100.00%)	7,373 (100.00%)

From Plan: **GA House Enacted**

Plan: GA House Illustrative, District 104 -- 59,362 Total Population

	Population	[18+_AP_Blk]
Total and % Population		7,373 (12.42%)

Plan: GA House Illustrative, District 105 -- 59,344 Total Population

	Population	[18+_AP_Blk]
Dist. 105	59,344 (100.00%)	12,628 (100.00%)
Total and % Population		12,628 (21.28%)

Plan: GA House Illustrative, District 106 -- 59,112 Total Population

	Population	[18+_AP_Blk]
Dist. 106	59,112 (100.00%)	15,918 (100.00%)
Total and % Population		15,918 (26.93%)

Plan: GA House Illustrative, District 107 -- 59,702 Total Population

	Population	[18+_AP_Blk]
Dist. 107	59,702 (100.00%)	13,186 (100.00%)
Total and % Population		13,186 (22.09%)

Plan: GA House Illustrative, District 108 -- 59,577 Total Population

	Population	[18+_AP_Blk]
Dist. 108	59,577 (100.00%)	8,132 (100.00%)
Total and % Population		8,132 (13.65%)

Plan: GA House Illustrative, District 109 -- 59,630 Total Population

	Population	[18+_AP_Blk]
Dist. 109	59,630 (100.00%)	14,352 (100.00%)
Total and % Population		14,352 (24.07%)

Plan: GA House Illustrative, District 11 -- 58,792 Total Population

	Population	[18+_AP_Blk]
Dist. 11	58,792 (100.00%)	839 (100.00%)
Total and % Population		839 (1.43%)

Plan: GA House Illustrative, District 110 -- 59,951 Total Population

	Population	[18+_AP_Blk]

From Plan: **GA House Enacted**

Plan: GA House Illustrative, District 110 -- 59,951 Total Population

	Population	[18+_AP_Blk]
Dist. 110	59,951 (100.00%)	20,400 (100.00%)
Total and % Population		20,400 (34.03%)

Plan: GA House Illustrative, District 111 -- 60,009 Total Population

	Population	[18+_AP_Blk]
Dist. 111	60,009 (100.00%)	9,828 (100.00%)
Total and % Population		9,828 (16.38%)

Plan: GA House Illustrative, District 112 -- 59,349 Total Population

	Population	[18+_AP_Blk]
Dist. 112	59,349 (100.00%)	8,667 (100.00%)
Total and % Population		8,667 (14.60%)

Plan: GA House Illustrative, District 113 -- 60,053 Total Population

	Population	[18+_AP_Blk]
Dist. 113	60,053 (100.00%)	26,515 (100.00%)
Total and % Population		26,515 (44.15%)

Plan: GA House Illustrative, District 114 -- 59,867 Total Population

	Population	[18+_AP_Blk]
Dist. 114	59,867 (100.00%)	11,347 (100.00%)
Total and % Population		11,347 (18.95%)

Plan: GA House Illustrative, District 115 -- 59,789 Total Population

	Population	[18+_AP_Blk]
Dist. 115	13,110 (21.93%)	3,916 (16.11%)
Dist. 116	22,596 (37.79%)	10,037 (41.29%)
Dist. 78	0 (0.00%)	0 (0.00%)
Dist. 91	24,083 (40.28%)	10,357 (42.60%)
Total and % Population		24,310 (40.66%)

Plan: GA House Illustrative, District 116 -- 60,380 Total Population

	Population	[18+_AP_Blk]
Dist. 115	4,546 (7.53%)	1,186 (4.91%)
Dist. 116	37,317 (61.80%)	16,579 (68.70%)
Dist. 117	18,517 (30.67%)	6,366 (26.38%)
Total and % Population		24,131 (39.97%)

From Plan: **GA House Enacted**

Measures of Compactness Report

Measures of Compactness Summary

Reock	The measure is always between 0 and 1, with 1 being the most compact.
Polsby-Popper	The measure is always between 0 and 1, with 1 being the most compact.

Measures of Compactness Report

Measures of Compactness Summary

Reock	The measure is always between 0 and 1, with 1 being the most compact.
Schwartzberg	The measure is usually greater than or equal to 1, with 1 being the most compact.
Polsby-Popper	The measure is always between 0 and 1, with 1 being the most compact.
Area / Convex Hull	The measure is always between 0 and 1, with 1 being the most compact.
Cut Edges	A smaller number implies a more compact plan. The measure should only be used to compare plans defined on the same base layer.

Political Subdivision Splits Between Districts

Saturday, December 3, 2022 10:53 PM

Number of subdivisions not split:

County	90
Voting District	2,514

Number of subdivisions split into more than one district:

County	69
Voting District	184

Number of splits involving no population:

County	0
Voting District	16

Split Counts

County

Cases where an area is split among 2 Districts: 34
Cases where an area is split among 3 Districts: 9
Cases where an area is split among 4 Districts: 12
Cases where an area is split among 5 Districts: 4
Cases where an area is split among 6 Districts: 3
Cases where an area is split among 7 Districts: 2
Cases where an area is split among 9 Districts: 1
Cases where an area is split among 14 Districts: 1
Cases where an area is split among 17 Districts: 1
Cases where an area is split among 21 Districts: 1
Cases where an area is split among 22 Districts: 1

Voting District

Cases where an area is split among 2 Districts: 175
Cases where an area is split among 3 Districts: 10

Political Subdivision Splits Between Districts

Saturday, December 3, 2022 10:06 PM

Number of subdivisions not split:

County	89
Voting District	2,513

Number of subdivisions split into more than one district:

County	70
Voting District	185

Number of splits involving no population:

County	0
Voting District	13

Split Counts

County

Cases where an area is split among 2 Districts: 35

Political Subdivision Splits Between Districts

Wednesday, November 29, 2023 8:13 PM

Number of subdivisions not split:

County	91
Voting District	2,506

Number of subdivisions split into more than one district:

County	68
Voting District	192

Number of splits involving no population:

County	0
Voting District	28

Split Counts

County

Cases where an area is split among 2 Districts: 32
Cases where an area is split among 3 Districts: 12
Cases where an area is split among 4 Districts: 9
Cases where an area is split among 5 Districts: 5
Cases where an area is split among 6 Districts: 4
Cases where an area is split among 7 Districts: 1
Cases where an area is split among 9 Districts: 1
Cases where an area is split among 16 Districts: 1
Cases where an area is split among 17 Districts: 1
Cases where an area is split among 22 Districts: 2

Voting District

Cases where an area is split among 2 Districts: 175
Cases where an area is split among 3 Districts: 17
Cases where an area is split among 4 Districts: 1

Total Population: 3,395,290

Ideal District Population: 59,511

Summary Statistics:

Population Range:	58,893 to 60,273
Ratio Range:	0.02
Absolute Range:	-618 to 762
Absolute Overall Range:	1,380
Relative Range:	-1.04% to 1.28%
Relative Overall Range:	2.32%
Absolute Mean Deviation:	368.89
Relative Mean Deviation:	0.62%
Standard Deviation:	405.93

User: **H123**
Plan Name: **House-2023**
Plan Type: **House**

Population Summary

*Census designation "AP" denotes respondents who are Any or Part of a race category; respondents may fall into more than one category.

EXPERT REPORT OF MAXWELL PALMER, PH.D.

1. My name is Maxwell Palmer. I am currently an Associate Professor of Political Science at Boston University. I previously submitted reports in this case on December 12, 2022 and December 22, 2022. My first report sets forth my qualifications in detail. A copy of my most recent curriculum vitae is attached as Exhibit A.

2. I testified in this matter in the February 2022 preliminary injunction proceedings and the October 2023 trial. I was accepted by the Court in both proceedings as an expert in redistricting and data analysis. The Court found me to be a credible expert witness and credited my testimony on racially polarized voting and performance in its June 6, 2022 and October 26, 2023 opinions.

4. In its October 26, 2023 order, the Court required the drawing of two new majority-Black Senate districts and five new majority-Black House districts. I was asked by the plaintiffs in this litigation to evaluate the performance of Black-opportunity districts under the 2021 Plan and the new Remedial Plan enacted by the Georgia legislature on December 5, 2023. I was also asked to offer an expert opinion on the extent to which voting is racially polarized in selected districts under the enacted and remedial maps.

Performance of Black-Preferred Candidates Under the Remedial Maps

Senate Map

8. The Remedial Map creates two new majority-Black districts: SD 17 and SD 28. Under this map, Black-preferred candidates would have been able to win every statewide election from 2012 to 2022 in both districts. Black-preferred candidates average 71.5% of the vote in the 17th District and 70.8% in the 28th District. Figure 1 and Table 1 present the results.[1]

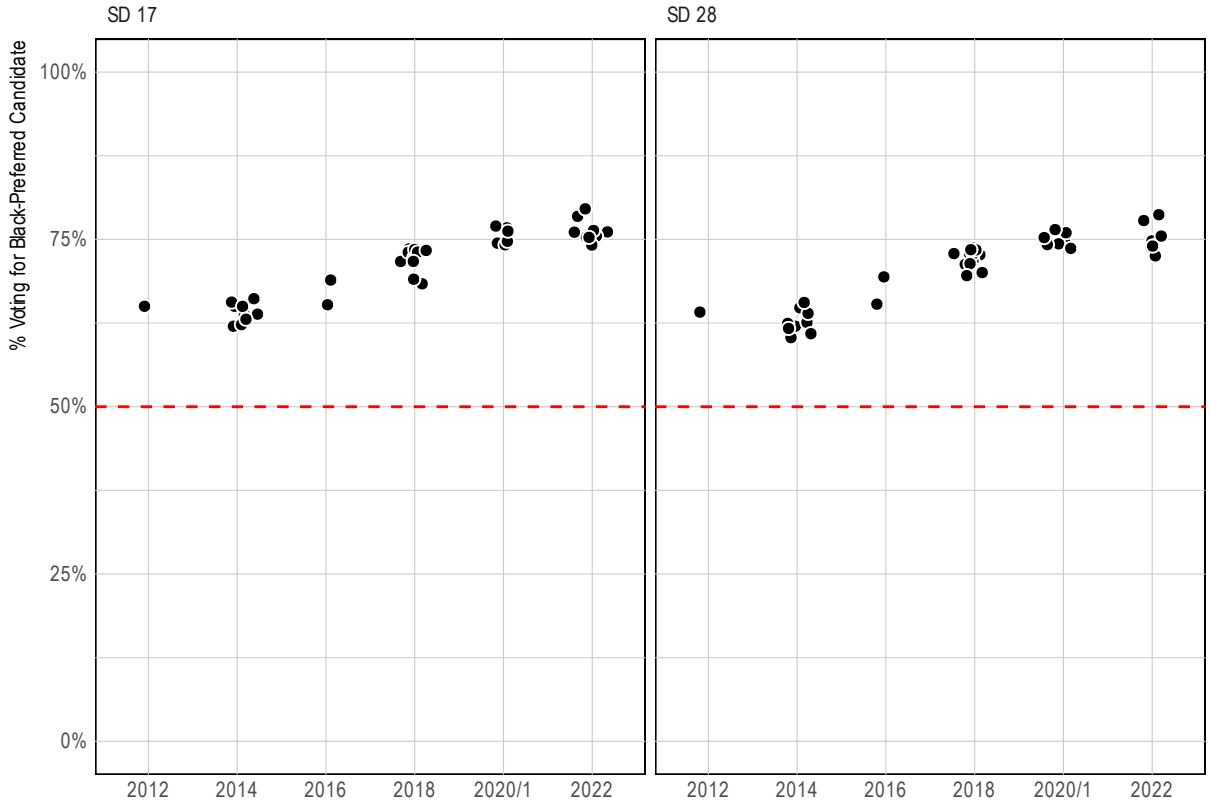

Figure 1: Performance of Black-Preferred Candidates Under the Remedial Senate Map

[1]My determination of which candidates are Black-preferred for this analysis is based on my prior report in this matter, examining elections in the areas of Remedial SD 17 and SD 28.

House Map

9. The Remedial Map creates five new majority-Black districts: HD 64, HD 74, HD 117, HD 145, and HD 149. Under this map, Black-preferred candidates would have been able to win every statewide election from 2012 to 2022 in House Districts 64, 74, 117, and 149, and 38 of the 41 contests in House District 145. Black-preferred candidates average 61.4% of the vote in HD 64, 73.5% of the vote in HD 74, 67.7% of the vote in HD 117, 53.4% of the vote in HD 145, and 59.5% of the vote in HD 149. Figure 2 and Table 2 present the results.[2]

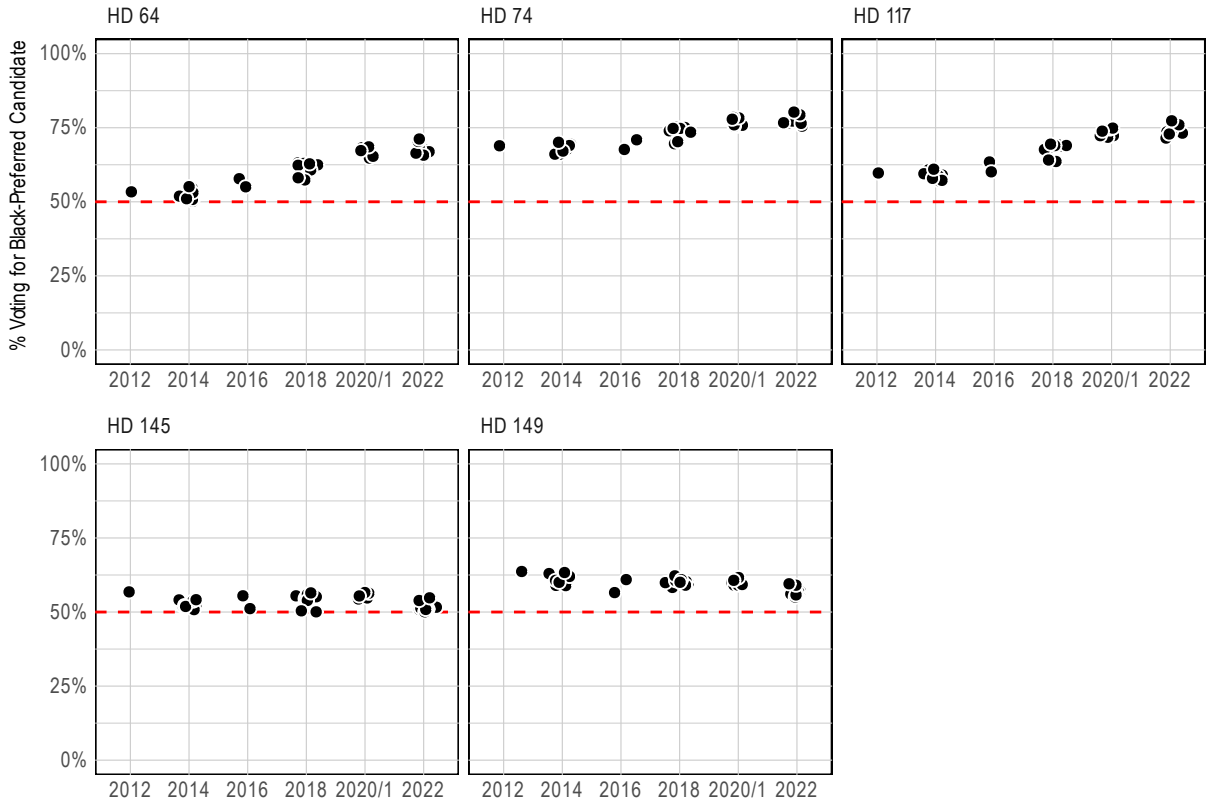

Figure 2: Performance of Black-Preferred Candidates Under the Remedial House Map

[2]My determination of which candidates are Black-preferred for this analysis is based on my prior report in this matter, examining elections in the areas of Remedial HD 64, HD 74, HD 117, HD 145, and HD 149.

Performance of Black-Preferred Candidates in the Vote Dilution Areas of the Enacted Maps

10. In it's October 25, 2023 order, the Court identified 10 Senate districts and 11 House districts under the Enacted Map that violated Section 2 of the Voting Rights Act. I was asked to analyze the performance of these districts using past election results.

11. Across the ten Senate districts in the dilution area under the Enacted Senate Map, Black-preferred candidates would have been able to win every statewide election from 2012 to 2022 in the five Black-majority districts, and would have lost every election in the five White-majority districts. Figure 3 and Table 3 present the results.[3]

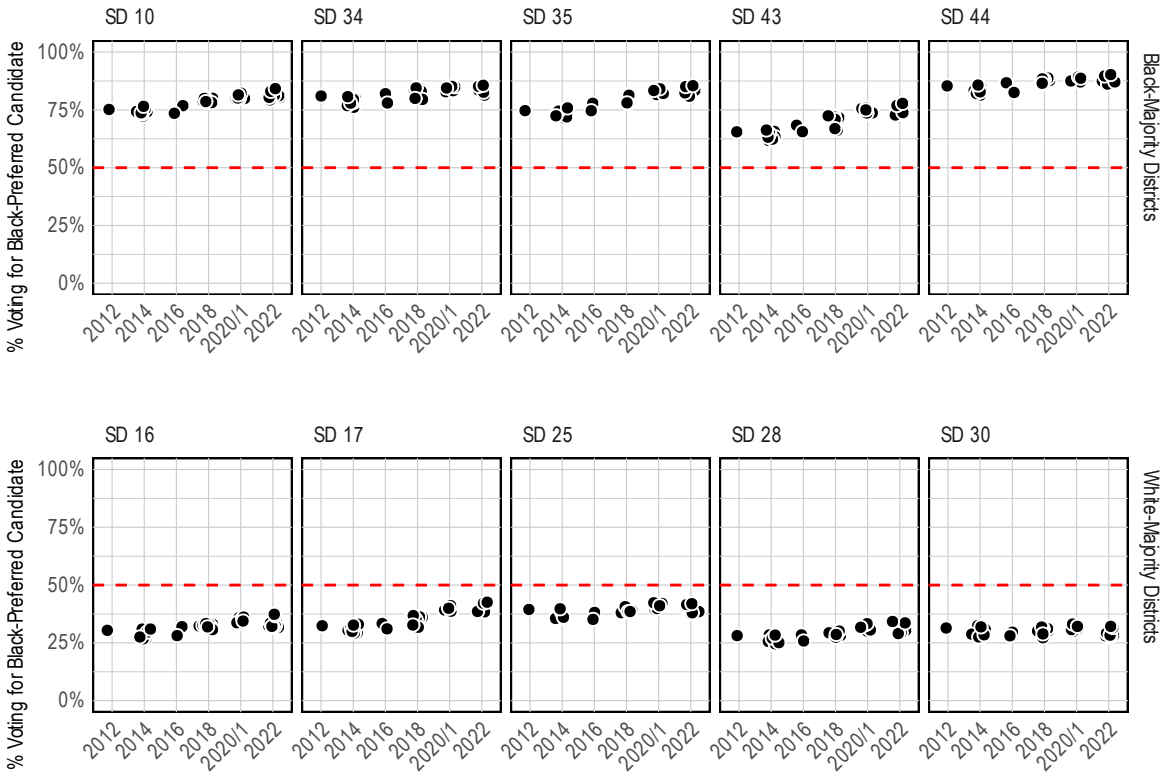

Figure 3: Performance of Black-Preferred Candidates In the Dilution Area of the Enacted Senate Map

12. Across the eleven House districts in the dilution area under the Enacted House Map, Black-preferred candidates would have been able to win every statewide election from 2012 to 2022 in the four Black-majority districts, and would have lost every election in the six of the seven White-majority districts. The only White-majority district where Black-preferred candidates would have had any success is in District 117, where the

[3]My determination of which candidates are Black-preferred for this analysis is based on my prior report in this matter, examining elections in and around these districts.

Black-preferred candidate won four of the forty-one contests analyzed. Figure 4 and Table 4 present the results.

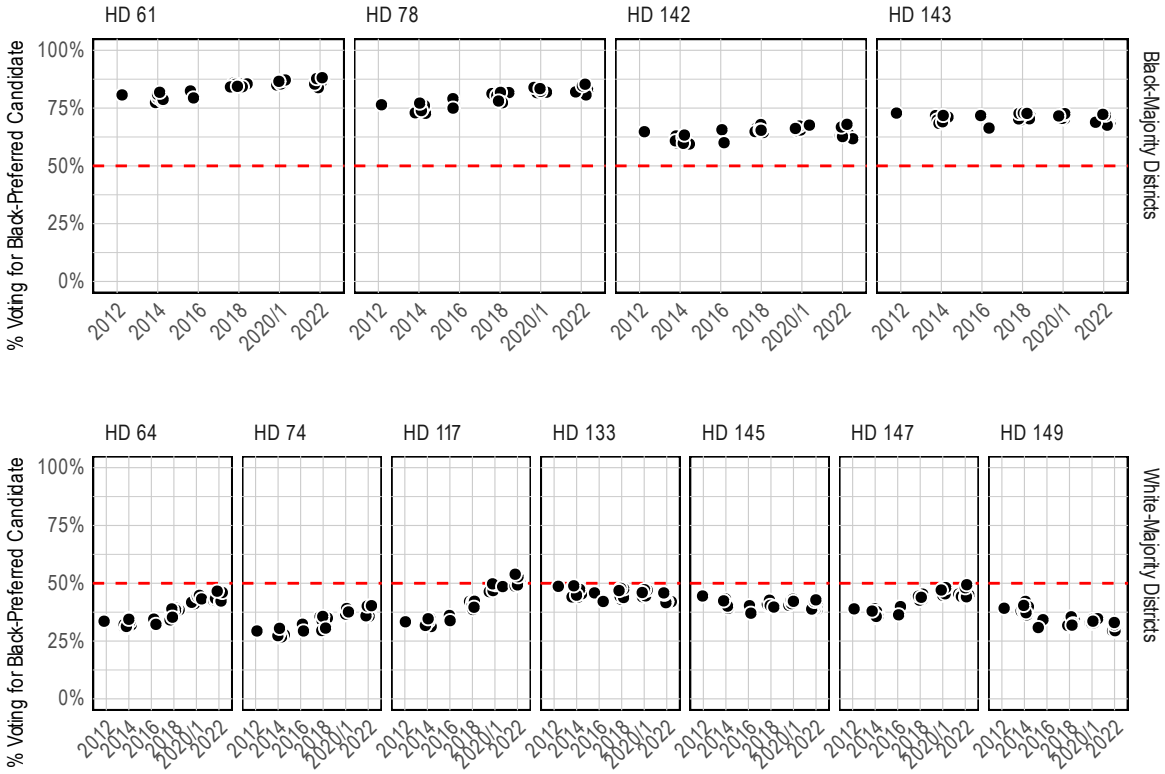

Figure 4: Performance of Black-Preferred Candidates In the Dilution Area of the Enacted House Map

Performance of Black-Preferred Candidates in Selected Districts

13. I was also asked by the Plaintiffs in this litigation to analyze the performance of Black-preferred candidates in House Districts 40, 81, 82, 101, 134, and 149, and Senate Districts 6 and 42, under both the Enacted and Remedial Maps. These districts were reconfigured from the Enacted Map to the Remedial Map, such that they consist of entirely different populations under each map.

14. House District 40 was moved from Cobb County to Douglas and Paulding Counties. House District 81 was moved from DeKalb County to Henry County. House District 82 was moved from DeKalb County to Fayette and Spaulding Counties. House District 101 was moved from Gwinnett County to DeKalb County. House District 134 was moved from Lamar, Monroe, and Spalding Counties to Crawford, Lamar, Peach, and Upson Counties. House District 149 was moved from Bleckley, Dodge, Telfair, Twiggs, and Wilkinson Counties to Baldwin, Bibb, and Jones Counties. Senate District 6 was moved from Cobb and Fulton Counties to Carroll, Coweta, and Heard Counties. Senate District 42 was moved from DeKalb County to Henry, Morgan, Newton, and Walton Counties.

15. This analysis requires two steps. First, I used ecological inference to identify the Black-preferred candidate in each district for each statewide election.[4] Second, having identified the Black-preferred candidate, I calculated the share of the vote that candidate would receive. This analysis requires estimating hundreds of ecological inference models.

16. Figure 5 presents the results of this analysis. The panel on the left shows the performance of each district under the enacted map, and the panel on the right shows performance under the remedial map. Each gray circle corresponds to one of the 41 statewide contests analyzed, and the green circle is the average performance of Black-preferred candidates in each district.

17. Figure 5 shows that three of the House districts and both Senate districts performed for Black-preferred candidates under the Enacted Map. In HD 40, Black-preferred candidates averaged 58.6% of the vote and won 32 of the 41 elections. In HD 81, Black-preferred candidates averaged 63.7% of the vote and won 40 of the 41 elections. In HD 82, Black-preferred candidates averaged 75.1% of the vote and won all of the 41 elections. In SD 6, Black-preferred candidates averaged 51.7% of the vote and won 30 of the 41 elections. In SD 42, Black-preferred candidates averaged 80.7% of the vote and won all of the 41 elections. Two House districts did not perform for Black-preffered candidates under the Enacted Map. In HD 134, Black-preferred candidates averaged 35.5% of the vote and won none of the 41 elections. In HD 149, Black-preferred candidates averaged 33.7% of the vote and won none of the 41 elections. House District 101 was an extremely competitive district where Black-preferred candidates had mixed

[4]There are not enough precincts in the House districts to run the EI models. Instead, I use the full county or counties that contain the districts under each map to identify the Black-preferred candidate in each election. However, to assess the performance of each candidate, I use only the precincts within each district.

success. In HD 101, Black-preferred candidates averaged 50.0% of the vote and won 27 of the 41 elections.

18. Under the Remedial Map, the five districts that performed for Black-preferred candidates no longer do so. House Districts 101 and 149 now perform for Black-preferred candidates, and House District 134 does not perform for Black-preferred candidates under either map. Under the Remedial Map, Black-preferred candidates averaged 35.8% in HD 40, 31.0% in HD 81, 33.4% in HD 82, 66.6% in HD 101, 32.0% in HD 134, 59.5% in HD 149, 26.4% in SD 6, and 37.5% in SD 42. Tables 5 and 6 provide the full results.
