SENATE COMMITTEE ON REAPPORTIONMENT COMMITTEE OVERVIEW

Senate Committee on Reapportionment 2022

Overview

- The Senate Committee on Reapportionment creates redistricting plans for Florida's congressional and state legislative districts to account for population shifts revealed by data from the 2020 Census.
- The Florida Constitution directs the Legislature to redraw district boundaries at its Regular Session in the second year following each decennial census, which will begin on January 11, 2022.
- According to apportionment data released by the U.S. Census Bureau in April 2021, Florida will gain 1 congressional district.
- As a result of various delays, the release of the population data from the 2020 Census was released on August 12th in a legacy format and on September 16th in a formal and more user-friendly format.

Constitutional Authority

- Congressional Districts:
 - Article I, Section 4 of the U.S. Constitution
 - “The Times, Places and Manner of holding Elections for Senators and Representatives, shall be prescribed in each State by the Legislature thereof...”
- State Legislative Districts:
 - Article III, Section 16 of the Florida State Constitution
 - “The legislature...shall apportion the state...into not less than thirty nor more than forty consecutively numbered senatorial districts...and into not less than eighty nor more than one hundred twenty consecutively numbered representative districts...”

Reapportionment vs. Redistricting

Although the terms “Reapportionment” and “Redistricting” are frequently used interchangeably, there are a few differences.

Redistricting

- Process by which boundaries of electoral districts are redrawn to adjust for uneven population growth revealed by the latest decennial census.
- State Legislatures, County Commissions, and City Commissions redistrict.

Reapportionment

- Process of assigning seats in a legislative body among established political subdivisions.
- Congressional seats are appointed to the states after each decennial census.

Why Redraw District Boundaries?

To comply with the equal population requirements of Article 1, Section 2 of the U.S. Constitution as interpreted by the U.S. Supreme Court in *Westbury v. Sanders* in 1964.

- The Court stated "...that Representatives be chosen 'by the People of the several States' means that as nearly as is practicable one person's vote in a congressional election is to be worth as much as another's."

The equal population standard for State Legislative Districts is based on the 14th Amendment's Equal Protection Clause as interpreted by the U.S. Supreme Court in *Reynolds v. Sims* in 1964.

- The Court stated that because "there is a significantly larger number of seats in state legislative bodies to be distributed within a State than congressional seats, it may be feasible to the use political subdivision lines...while still affording adequate representation to all parts of the State."
- The Court also stated that "mathematical nicety is not a constitutional requisite", but nevertheless states that "the overriding objective must be substantial equality of population among the various districts."

Redistricting Criteria

- U.S. Constitution
- Voting Rights Act (VRA)
- Florida Constitution
- Florida Statutes, Section 11.031

Voting Rights Act (VRA)

- The VRA prohibits:
 - any state or political subdivision from enacting a map that results in the denial or abridgement of any U.S. Citizen's right to vote on account of race, color, or status as a member of a language minority group; and
 - purposeful discrimination and protects against retrogression – or backsliding – in the ability of racial and language minorities to elect representatives of their choice.

Section 2 of the Voting Rights Act (VRA)

- Requires the creation of a district that performs for racial and language minorities where:
 - a minority population is geographically compact and sufficiently numerous to be a majority in a single district;
 - the minority population is politically cohesive;
 - the majority votes sufficiently as a bloc to enable it usually to defeat the minority-preferred candidate; and
 - under all of the circumstances, the minority population has less opportunity than others to participate in the political process and elect representatives of its choice.

Section 5 of the Voting Rights Act (VRA)

- Prohibits purposeful discrimination and protects against retrogression—or backsliding—in the ability of racial and language minorities to elect representatives of their choice.
- Contains a coverage formula that was applied to determine if there was a history of discrimination against racial or language minorities in a particular jurisdiction.
- In Florida: Collier, Hardee, Hendry, Hillsborough, and Monroe counties were covered jurisdictions until the coverage formula was invalidated in 2013 in *Shelby County v. Holder*.

Florida Constitution

- Article III, Section 16
 - “The legislature at its regular session in the second year following each decennial census...shall apportion the state in accordance with the constitution of the state and of the United States into not less than thirty nor more than forty consecutively numbered senatorial ...and into not less than eighty nor more than one hundred twenty consecutively numbered representatives...”

Florida Constitution

- Article III, Sections 20 & 21

- (a) “No apportionment plan or district shall be drawn with the intent to favor or disfavor a political party or an incumbent; and districts shall not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process or to diminish their ability to elect representatives of their choice; and districts shall consist of contiguous territory.”
- (b) “Unless compliance with the standards in this subsection conflicts with the standards in subsection (a) or with federal law, districts shall be as nearly equal in population as is practicable; districts shall be compact; and districts shall, where feasible, utilize existing political and geographical boundaries.”
- (c) “The order in which the standards within subsections (a) and (b) of this section are set forth shall not be read to establish any priority of one standard over the other within that subsection.”

Redistricting Criteria

The redistricting criteria in the Florida Constitution is broken out into two tiers:

Tier 1:

- Protections against diminishment, or reduction in the ability of racial or language minorities to elect representatives of their choice.
- Prohibition on drawing a plan or district with the intent to favor or disfavor a political party or incumbent.
- Districts must be contiguous.

Tier 2:

- Districts shall be as nearly equal in population as is practicable.
- Districts shall be compact.
- Districts shall, where feasible, utilize existing political and geographic boundaries.

The order in which the standards are listed in each Tier shall not be read to establish any one priority over another within that Tier.

REDISTRICTING TERMINOLOGY

00018

Redistricting Concepts and Definitions

- **Equal population** – Requirement of the United States Constitution to ensure an equally weighted vote, districts must consist of populations as nearly equal as practicable (also known as: one person, one vote).
- **Ideal population** – The total state population divided by the number of districts.
- **Voting age population** – The number of people over 18 years of age.
- **Population deviation** – Calculated for individual districts and a redistricting plan as a whole (often expressed as a percentage).
 - At the district level, population deviation is measured as the amount of a district's total population minus its ideal population.
 - At the plan level, population deviation is the numeric range between the smallest total population and largest total population of a district.

Redistricting Concepts and Definitions (cont.)

- **Benchmark Plan** –The last legally enforceable redistricting plan in force or effect. A proposed redistricting plan is compared to benchmark plan to analyze its compliance with protections for racial and language minorities under federal and state law.
- **Retrogression** – Retrogression occurs when a redistricting plan reduces the opportunity of a racial or language minority to participate in the political process or elect representatives of their choice when compared to the benchmark plan. Retrogression can apply to a whole redistricting plan or to an individual district.
- **Diminishment** – Occurs when a redistricting plan eliminates a majority-minority district, or potentially weakens a historically performing minority district where doing so would actually reduce the ability of racial or language minority groups to elect candidates of their choice when compared to the benchmark plan.
- **Geographic Boundaries** – Easily ascertainable and commonly understood features, such as rivers, railways, and primary and secondary roads. Primary and secondary roads include interstates, U.S. highways, and state highways.
- **Political Boundaries** – Boundaries of a county or incorporated municipality (city, town, village, etc).

Redistricting Concepts and Definitions (cont.)

- **Census Block**—The smallest level of census geography used by the U.S. Census Bureau to collect census data. Census blocks are formed by streets, roads, bodies of water, other physical features and legal boundaries shown on U.S. Census Bureau maps.
- **Census Block Group**—A cluster of census blocks within a census tract.
- **Census Tract**—Small, relatively permanent statistical subdivisions of a county delineated by local participants as part of the U.S. Census Bureau's Participant Statistical Areas Program.
- **County**—The primary legal divisions of most states are termed counties. County subdivisions are the primary divisions of states for the reporting of decennial census data.

U.S. Census Bureau Geography Hierarchy

Redistricting Concepts and Definitions (cont.)

- **Majority-Minority District**— A district in which a racial or language minority group comprises a majority (50% plus 1 or more) of the voting age population of the district.
- **Effective Minority District**— A district containing sufficient voting age population to provide the minority community with an opportunity to elect a candidate of choice.
- **Crossover District**— A district in which a racial or language minority group is not a numerical majority of the voting age population, but is potentially large enough to elect its preferred candidate by persuading enough majority voters to cross over to support the minority's preferred candidate.
- **Coalition District**— A district in which more than one racial or language minority group, working together, can form a majority to elect their candidates of choice.
- **Influence District**— A district in which the racial or language minority community, although not sufficiently large enough to elect a candidate of its choice, is able to influence the outcome of an election and elect a candidate who will be responsive to the interests and concerns of the minority community.

Judicial Review of Legislative Apportionment

- Article III, Section 16 of the Florida Constitution
 - (c) “Within fifteen days after the passage of the joint resolution of apportionment, the attorney general shall petition the supreme court of the state for a declaratory judgment determining the validity of the apportionment. The supreme court...shall permit adversary interests to present their views and, within thirty days from the filing of the petition, shall enter its judgment.”
 - (d) “A judgment of the supreme court of the state determining the apportionment to be valid shall be binding upon all the citizens of the state. Should the supreme court determine that the apportionment made by the legislature is invalid, the governor by proclamation shall reconvene the legislature within five days thereafter in extraordinary apportionment...during which the legislature shall adopt a joint resolution of apportionment conforming to the judgment of the supreme court.”

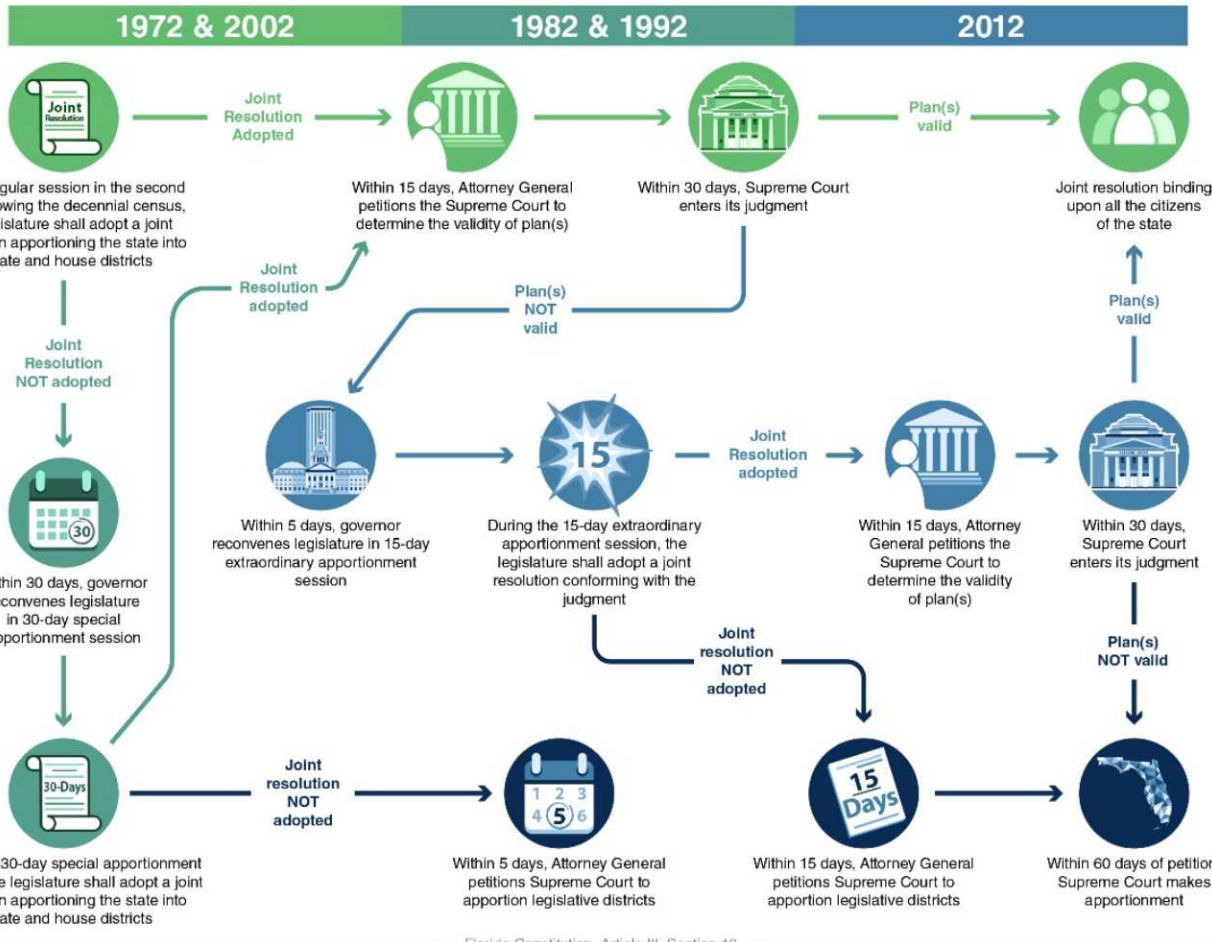

Judicial Review of Legislative Apportionment (cont.)

- Article III, Section 16 of the Florida Constitution
 - (e) “Within fifteen days after the adjournment of an extraordinary apportionment session, the attorney general shall file a petition in the supreme court of the state setting forth the apportionment resolution adopted by the legislature, or if none has been adopted reporting that fact to the court. Consideration of the validity of a joint resolution of apportionment shall be had as provided for in cases of such joint resolution adopted at a regular or special apportionment session.”
 - (f) “Should an extraordinary apportionment session fail to adopt a resolution of apportionment or should the supreme court determine that the apportionment made is invalid, the court shall, not later than sixty days after receiving the petition of the attorney general, file with the custodian of state records an order making such apportionment.”

Florida Redistricting Process

FOR STATE LEGISLATIVE PLANS

Florida Constitution, Article III, Section 16

Introduction to the Census

- Established by the U.S. Constitution, the census has been conducted every 10 years since 1790 to determine the number of people living in the United States.
- Article 1, Section 2 of the U.S. Constitution requires an “actual enumeration” of all people in the United States.
 - *“The actual enumeration shall be made within three years after the first meeting of the Congress of the United States, and within every subsequent term of ten years, in such manner as they shall by law direct.”*

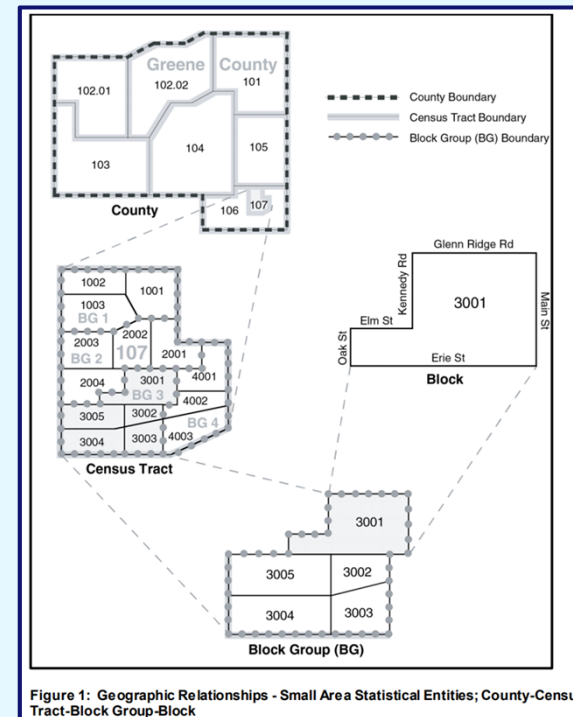

Use of Census Data in Redistricting

- Florida is one of 21 states that explicitly requires the use of Census Data for redistricting.
 - Article X Section 8 (Fla. Const.):
 - “Each decennial census of the state taken by the United States shall be an official census of the state.”
- Florida statutes also designate the most recent federally conducted decennial census as the official census for redistricting. Section 11.031, F.S. (2020) states:
 - (1) All acts of the Florida Legislature based upon population and all constitutional apportionments shall be based upon the last federal decennial statewide census.

Geographical Data and Hierarchy

- Geographical data used for redistricting comes in the form of TIGER/Line Shapefiles released by the Census Bureau.
 - TIGER/Line shapefiles – extracts of selected geographic and cartographic information from the U.S. Census Bureau's Master Address File/Topologically Integrated Geographic Encoding and Referencing (MAF/TIGER) database.
 - The TIGER/Line shapefiles are linked to data from censuses and surveys through a standard geographic identifier.

Race and Ethnicity in Census Data

- U.S. Office of Management and Budget's minimum categories for data on race and ethnicity for Federal statistics, program administrative reporting, and civil rights compliance reporting:
- Race:
 - American Indian or Alaska Native – A person having origins in any of the original peoples of North and South America (including Central America), and who maintains tribal affiliation or community attachment.
 - Asian – A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam.
 - Black or African American – A person having origins in any of the black racial groups of Africa.
 - Native Hawaiian or Other Pacific Islander – A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands.
 - White – A person having origins in any of the original peoples of Europe, the Middle East, or North Africa.
- Ethnicity:
 - Hispanic or Latino - A person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race.
 - Not Hispanic or Latino.

Group Quarters

- The 2020 Census continued to count prisoners, college students, and people in other residence situations (group quarters) at the group location where they live and sleep most of the time, as it has been done in the past.
- A handful of states have changed their procedures for allocating incarcerated persons for redistricting purposes. In these states, when possible, they reallocate prisoners from the prison location to their residence prior to incarceration.
- To date, nine states (California, Colorado, Delaware, Maryland, Nevada, New Jersey, New York, Virginia, and Washington) have passed laws modifying how incarcerated persons are counted and allocated during the redistricting process.

Protecting Privacy in Census Data

- “All acts of the Florida Legislature based upon population and all constitutional apportionments shall be based upon the last federal decennial statewide census.”(Section 11.031, F.S. 2020)
- Since 2000, the U.S. Census Bureau has used “data swapping” between census blocks as its main disclosure avoidance technique. The details for the person would be aggregated with others, and therefore not identifiable, and yet the total population in both census blocks would remain accurate.
- Mid-decade testing showed it was possible to take Census data products and cross-reference them with each other or with outside data sources to the point that individual privacy, or confidentiality, could be compromised.
- The Bureau reviewed disclosure avoidance methods that could replace the data swapping method, and in 2018 selected differential privacy for use in the 2020 Census.

Geographical Boundary Changes

- During the 2020 Legislative Session, the Florida Legislature passed two bills that made changes to political subdivisions.
 - SB 716 adjusted the boundary lines of Indian River and Martin Counties, which took effect on June 9, 2020.
 - CS/HB 1215 abolished the City of Weeki Wachee, a city of one square mile and a population of nine and transferred all assets and legitimate liabilities to Hernando County, which took effect on June 9, 2020.
- Because these changes took effect after the deadline for submitting geographical updates (January 1, 2020) and after Census Day (April 1, 2020), they are not reflected in the geographical, population, and demographic data received from the Census Bureau.

Census Delays

- In 2020, external factors impacted the Census Bureau's collection, processing and release of data:
 - COVID-19 - March 18
 - Significant Hurricane Season
 - Tropical Storm Marco - landfall on August 24
 - Hurricane Laura - landfall on August 26
 - Hurricane Sally - landfall on September 16
 - Tropical Storm Beta - landfall on September 21
 - California, Oregon, and Washington Fires and Air Quality - September 7 to October 15
 - Civil Unrest - May 25
 - Legal Challenges
- The state population counts for apportionment were delivered to the President on April 26, 2021.
 - Originally due December 31, 2020.
- The U.S. Census Bureau provided redistricting data as legacy format summary files (tabular data) for all states on August 12, 2021.
 - Originally due April 1, 2021.
- The full redistricting data toolkit was delivered to all 50 states and the public on Sept. 16th, 2021.
 - Originally due April 1, 2021.

Population Changes Across the Country Since the 2010 Census

- The 2020 Census Data shows changes in the size and distribution of the population across the United States.
 - The population of U.S. metro areas grew by 9% from 2010 to 2020, resulting in 86% of the population living in U.S. metro areas in 2020, compared to 85% in 2010.
 - Around 52% of the counties in the United States saw their 2020 Census populations decrease from their 2010 Census populations.
- County and metro area highlights:
 - The largest county in the United States in 2020 remains Los Angeles County with over 10 million people.
 - The largest city (incorporated place) in the United States in 2020 remains New York with 8.8 million people.
 - 312 of the 384 U.S. metro areas gained population between 2010 and 2020.
 - The fastest-growing U.S. metro area between the 2010 Census and 2020 Census was The Villages, FL, which grew 39% from about 93,000 people to about 130,000 people.
 - 72 U.S. metro areas lost population from the 2010 Census to the 2020 Census. The U.S. metro areas with the largest percentage declines were Pine Bluff, AR, and Danville, IL, at -12.5 percent and -9.1 percent, respectively.

Florida Facts from the 2020 Census

- In the 2020 Census, Florida officially passed New York to become the third-largest state in the Union.
- 99.9% of Florida's housing units were enumerated in the 2020 Census.
- Florida saw a growth of 2,736,877 people from 2010 to 2020, approximately a 15% increase.
- The fastest-growing metro area in the United States between the 2010 and 2020 Census was The Villages, which grew 39% from around 93,000 people to about 130,000 people.
- Florida improved its self-response rate from 63% in 2010 to 63.8% in 2020.
- The City of Jacksonville is the largest incorporated place in Florida, with 949,611 people within its jurisdiction.
- Osceola County had the largest county growth rate at 45%, growing approximately 120,000 people from 2010 to 2020.
- Florida Senate District 15 had the largest growth rate at 51%, growing approximately 241,000 people from 2010 to 2020.
- Florida House District 44 had the largest growth at 51%, growing approximately 80,000 people from 2010 to 2020.
- Florida Congressional District 9 had the largest growth at 37%, growing approximately 259,000 people from 2010 to 2020.

2020 Census Findings on Race and Ethnicity

- Race and ethnicity highlights:
 - The White population remained the largest race or ethnicity group in the United States, with 204.3 million people identifying as White alone. Overall, 235.4 million people reported White alone or in combination with another group. However, the White alone population decreased by 8.6% since 2010.
 - The “two or more races” population (also referred to as the Multiracial population) has changed considerably since 2010. The Multiracial population was measured at 9 million people in 2010 and is now 33.8 million people in 2020, a 276% increase.
 - The “in combination” multiracial populations for all race groups accounted for most of the overall changes in each racial category.
 - All of the races alone or in combination groups experienced increases. The Some Other Race alone or in combination group (49.9 million) increased 129%, surpassing the Black or African American population (46.9 million) as the second-largest race alone or in combination group.
 - The next largest racial populations were the Asian alone or in combination group (24 million), the American Indian and Alaska Native alone or in combination group (9.7 million), and the Native Hawaiian and Other Pacific Islander alone or in combination group (1.6 million).
 - The Hispanic or Latino population, which includes people of any race, was 62.1 million in 2020. The Hispanic or Latino population grew 23%, while the population that was not of Hispanic or Latino origin grew 4.3% since 2010.

2020 Census Products

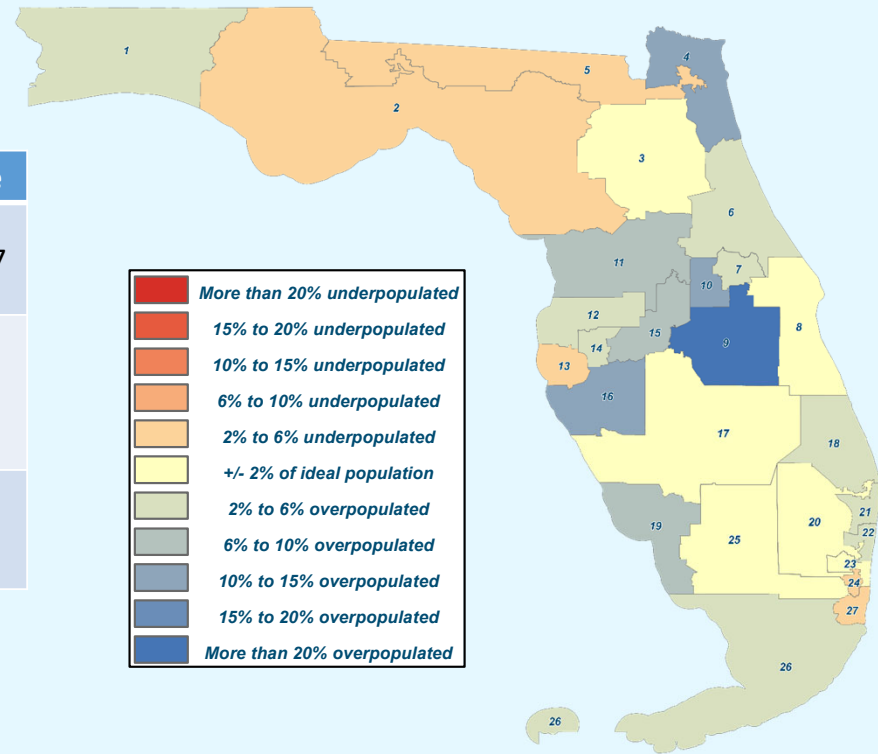

- Census Bureau has provided:
 - [2020 Census Demographic Data Map Viewer](#)
 - Interactive viewer provides data related to population, race, Hispanic origin, housing, and group quarters at the state, county, and census-tract level.
 - [2020 Redistricting Data Summary Files](#)
 - Tabular format that can be processed by experienced users.
- On September 16th, the Census Bureau released the same data to state officials with an easy-to-use toolkit of DVDs and flash drives.
 - It is also available to the public on data.census.gov.

8.0002 Division of state into congressional districts.—For the election of representatives to the United States House of Representatives, the state is divided into 27 consecutively numbered, single-member congressional districts of contiguous territory, to be designated by such numbers as follows:

(1) District 1 is composed of:

(a) All of Escambia County.

(b) All of Okaloosa County.

(c) All of Santa Rosa County.

(d) All of Walton County.

(e) That part of Holmes County consisting of:

1. All of voting tabulation districts 1, 2, 3, 4, and 5.

2. That part of voting tabulation district 6 consisting of:

a. That part of tract 9601 consisting of blocks 1023, 1024, 1031, 1032, 1046, 1047, 1048, 1049, 1050, 1051, 1052, 1053, 1054, 1074, 1075, 1080, 1081, 1082, 1083, 1084, 1085, 1086, 1087, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2023, 2024, 2025, 2026, 2027, 2028, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2105, 2106, 2107, 2108, 2109, and 2110.

Equality of Population

- Congressional districts must achieve precise mathematical equality of population: +/- one person from ideal population.
- Ideal population for Florida's 28 Congressional Districts: 769,221
- "We hold that, construed in its historical context, the command of Art. I, s. 2, that Representatives be chosen 'by the People of the several States' means that as nearly as is practicable one man's vote in a congressional election is to be worth as much as another's."

Equality of Population

- State legislative districts must achieve substantial equality of population.
- Ideal population for Florida Senate District: 538,455
- Ideal population for Florida House District: 179,485
- “[T]he Equal Protection Clause requires that a State make an honest and good faith effort to construct districts, in both houses of its legislature, as nearly of equal population as is practicable.”

Equality of Population

- When drawing state legislative districts, reasonable deviations from mathematical equality are permitted to accommodate traditional districting objectives such as compactness, contiguity, and respect for the boundaries of political subdivisions.

 - Population deviations of less than 10% are presumptively valid
 - Population deviations greater than 10% are presumptively invalid

Racial Gerrymandering Claims

- If race is the “predominant factor” motivating the legislature’s decision to place a significant number of voters within or without a particular district, the district must be narrowly tailored to achieve a compelling interest.
- The Supreme Court has assumed, without deciding, that states have a “compelling interest” in complying with the Voting Rights Act.
- The “narrow tailoring” requirement is satisfied if a legislature has “good reasons to believe” it must use race to comply with the Voting Rights Act.

Voting Rights Act: Section 2

- Permanent provision of the Voting Rights Act, applicable nationwide.
- Prohibits a state from enacting a districting plan that provides “less opportunity” for racial minorities “to elect representatives of their choice.”

42 U.S.C. § 1973

- Designed to protect minority voters from practices that improperly weaken or dilute minority voting strength.
 - “Cracking” and “Packing” – the dispersal of a protected class of voters into districts in which they constitute an “ineffective minority” of voters or from the concentration of those voters into districts where they constitute an “excessive majority.”
- Under certain circumstances, states must draw “opportunity districts” in which minority groups form “effective majorities.”

- political cohesion among the members of the minority group; and
- bloc voting by the majority to defeat the minority's preferred candidate.

AND

2. Whose members, under the totality of the circumstances, have less opportunity to participate in the political process and elect representatives of their choice.

- Temporary measure applicable only in “covered jurisdictions” identified under a statutory formula based on voting practices, turnout, and voter registration rates in 1964.
 - In Florida, Collier, Hardee, Hendry, Hillsborough, and Monroe Counties added as covered jurisdictions in 1975 based on the addition of language minority group protections.
- Prohibits a covered jurisdiction from adopting any change that “has the purpose of or will have the effect of diminishing the ability of [the minority group] to elect their preferred candidates of choice.”

42 U.S.C. § 1973c

- Before any change in voting procedures could be enforced in a covered jurisdiction, the change must be approved by the Department of Justice or a three-judge federal district court in a process known as “preclearance.”

Federal Redistricting Requirements

Section 2

Section 5

Voting Rights Act: Section 5

- In *Shelby County v. Holder*, 570 U.S. 529 (2013), the Supreme Court found Section 4's coverage formula unconstitutional, as it was based on "decades-old data" regarding literacy tests and low voter registration and turnout in the 1960s and early 1970s.
- The coverage formula failed to reflect "current conditions" when it was extended for 25 years without amendment in 2006.
- As a result, the Section 4 formula adopted in the 1960s and 1970s cannot be used as a basis for subjecting jurisdictions to preclearance.
- Congress has not adopted a new coverage formula based on current conditions.

Art. III, §§ 20(a), 21(a), Fla. Const.

- Tier One encompasses three requirements:

“No apportionment plan or individual district shall be drawn with the intent to favor or disfavor a political party or an incumbent”

- The Florida Supreme Court has held that Florida’s constitutional provision “prohibits intent, not effect” because “any redrawing of lines, regardless of intent, will inevitably have an *effect* on the political composition of a district and likely whether a political party or incumbent is advantaged or disadvantaged.”
- Nonetheless, “there is no acceptable level of improper intent” and “malevolent or evil purpose” is not required to constitute improper intent.

“No apportionment plan or individual district shall be drawn with the intent to favor or disfavor a political party or an incumbent”

- The Florida Supreme Court examines “direct and circumstantial evidence of intent.”
- “Objective evidence” that could bear on intent includes the shape of district lines and the demographics of an area.
 - In 2012, the Florida Supreme Court reviewed voter registration and elections data, incumbents’ addresses, and demographics.
- Strict compliance with the express terms of the Tier Two redistricting standards may undercut or defeat an assertion of improper intent; disregard of the traditional redistricting principles set out in Tier Two can provide evidence of improper intent.

“No apportionment plan or individual district shall be drawn with the intent to favor or disfavor a political party or an incumbent”

- The shape of a district in relation to the legal residence of an incumbent is relevant to the evaluation of intent to favor or disfavor the incumbent.
- “Maneuvering of district lines in order to avoid pitting incumbents against one another in new districts” or “drawing of a new district so as to retain a large percentage of the incumbent’s former district” may demonstrate an intent to favor an incumbent.

 - Prevention of impermissible vote dilution
 - Prevention of impermissible diminishment of a minority group’s ability to elect a candidate of its choice
- These two standards are essentially restatements of Sections 2 and 5 of the Voting Rights Act, respectively.
 - Section 2 relates to claims of impermissible vote dilution
 - Section 5 attempts to eradicate impermissible retrogression in a minority group’s ability to elect a candidate of choice.

Art. III, §§ 20(b), 21(b), Fla. Const.

- Tier Two encompasses three requirements:
 - A requirement that districts be as nearly equal in population as is practicable;
 - A requirement that districts be compact; and
 - Where feasible, a requirement that districts use existing political and geographical boundaries.
- The Tier Two requirements are subordinate to both the Tier One requirements and the requirements of federal law, in the event of a conflict.
- As with Tier One, the order in which the Tier Two standards are set out in the Florida Constitution does not establish any priority among the standards within the tier.

- The Florida Supreme Court has rejected arguments that the “population equality” requirement imposes a stricter standard than prevailing federal precedent.
- “[S]trict and unbending adherence to the equal population requirement will yield to other redistricting considerations, but that those considerations must be based on the express constitutional standards.”
- Because obtaining equal population “if practicable” is an explicit and important constitutional mandate under the Florida Constitution, any deviation from that goal of mathematical precision must be based upon compliance with other constitutional standards.

Boundary Analysis

Unlike other objective Tier Two criteria in the Florida Constitution, there is no widely accepted measurement for compliance with the requirement to “where feasible, utilize existing political and geographic boundaries.” Simply counting the cities or counties kept whole fails to account for the degree of usage of existing county or municipal boundaries. It also disregards the co-equal constitutional mandate to, where feasible, use “easily ascertainable and commonly understood”¹ geographic boundaries, “such as rivers, railways, interstates, and state roads.”²

During the 2012 Redistricting Cycle, professional staff of the Florida Senate developed a set of quantitative metrics that measured the coincidence of a district’s border with easily recognizable and identifiable boundaries, including political and geographic features. However, the calculation of these boundary metrics was not included as part of the interactive redistricting application.

For the 2022 Redistricting Cycle, the professional staff of the Florida House of Representatives and the Florida Senate have worked to refine the analysis and make it available to all users in the redistricting application. The refined Boundary Analysis independently measures the extent to which district boundaries overlap city boundaries, county boundaries, primary and secondary roads (interstates, U.S. highways, and State highways), railroads, and significant water bodies (contiguous area hydrography features greater than 10 acres) as defined by the U.S. Census Bureau’s TIGER/Line³ files. Districts’ coincidence with these existing political and geographic boundaries is independently calculated and presented along with the extent to which district boundaries do not follow any of the specified features.

To accomplish this, five feature layers were created from TIGER/Line edge files provided by the US Census Bureau⁴ for each type of political or geographic boundary using geoprocessing tools:

- County boundaries (MTFCC⁵ = G4020);
- Municipal boundaries (incorporated places) (MTFCC = G4110);

¹ In re Senate Joint Resolution of Legislative Apportionment 1176, 83 So. 3d 597, 638 (Fla. 2012)

² *Id.*

³ “TIGER/Line files” are Topologically Integrated Geographic Encoding and Referencing layers for use with GIS software.

⁴ Railroad TIGER geometry comes from the Census Bureau in a national file (tl2020_us_rails.zip), or in the county-level “edges” files. Other reference features are available on the state level. All TIGER geometry is available for download at <https://www.census.gov/cgi-bin/geo/shapefiles/index.php>.

⁵ “MTFCC” is a MAF/TIGER Feature Class Code. The Census Bureau’s definition of a county is “the primary division of a state.” The definition of an incorporated place is “a legal entity incorporated under state law to provide general-purpose governmental services to a concentration of population...usually is a city, borough, municipality, town, village...” See 2020 TIGER/Line Shapefiles Technical Documentation available at: <https://www.census.gov/programs-surveys/geography/technical-documentation/complete-technical-documentation/tiger-geo-line.2020.html>.

- Primary and secondary roads including Interstate highways, US highways, and state highways where RTTYP⁶ = I, U, or S (MTFCC = S1100⁷ and S1200⁸);
- Railroads (MFTCC – R1011); and
- Significant water bodies (Area Hydrography features combined to create single-part features, and then selected to include only those greater than 10 acres in area).

Each of the five feature layers was joined using the TLID⁹ field that uniquely identifies each line segment in the TIGER/Line files, and (isCounty, isCity, isRoad, isRail, isWater) fields were added to the edges layer. The fields were populated with “Y” or “N” for each qualifying edge.

When the Boundary Analysis tool in the redistricting application is run, the length of the district boundary coincidence for each type of political and geographic boundary is calculated based on the edge’s tag, divided by the total length of the perimeter of the district, and expressed as a percentage. Likewise, the length of district boundary coincidence for which all tags are “N” is calculated and then divided by the total length of the perimeter of the district and expressed as a percentage.

In this way, users are presented with a Boundary Analysis that shows the degree of utilization for each type of existing political or geographic boundary as specified by the Florida Constitution and interpreted by the Florida Supreme Court. To facilitate the utilization of existing political and geographic boundaries, each of the feature layers used in the computation of the Boundary Analysis is provided in the map-drawing application¹⁰. An example of the Boundary Analysis for the benchmark Congressional districts is provided below:

⁶ “RTTYP” is an MTFCC field code that describes the type of road. See <https://www.census.gov/library/reference/code-lists/route-type-codes.html>.

⁷ “S1100” is the MTFCC code for primary roads. Primary roads are limited-access highways that connect to other roads only at interchanges and not at at-grade intersections. This category includes Interstate highways as well as other highways with limited access (some of which are toll roads). See 2020 TIGER/Line Shapefiles Technical Documentation available at: <https://www.census.gov/programs-surveys/geography/technical-documentation/complete-technical-documentation/tiger-geo-line.2020.html>

⁸ “S1200” is the MTFCC code for secondary roads. Secondary roads are main arteries that are not limited access, usually in the U.S. highway, state highway, or county highway systems. These roads have one or more lanes of traffic in each direction, may or may not be divided, and usually have at-grade intersections with many other roads and driveways. Secondary roads often have both a local name and a route number. See 2020 TIGER/Line Shapefiles Technical Documentation available at: <https://www.census.gov/programs-surveys/geography/technical-documentation/complete-technical-documentation/tiger-geo-line.2020.html>. Note that country roads that are not also secondary roads are not included in the Boundary Analysis.

⁹ “TLID” means TIGER/Line Identifier. Each edge has a unique TLID value.

Compactness

While the U.S. Supreme Court said in *Shaw v. Reno*, “reapportionment is one area in which appearances do matter”, and numerous courts have made use of mathematical compactness measurements, they have resisted adopting a threshold for determining if a district is compact or not compact. Instead, courts consider compactness in the context of the geography being redistricted and commonly use a combination of the “eyeball” compactness scores to identify outliers.

The constitutional amendments adopted in Florida in 2010 state that districts “shall be compact.” In *Apportionment I*, the Florida Supreme Court interpreted this Tier Two criteria for the first time. The Court held that “...compactness is a standard that refers to the shape of the district. **The goal is to ensure that districts are logically drawn and that bizarrely shaped districts are avoided.** Compactness can be evaluated both visually and by employing standard mathematical measures (emphasis added).”

Florida has historically used three scores to gauge compactness mathematically, all of which fall within a range of 0-1, where a score closer to 1 indicates a more compact district:

- The **Convex Hull¹ (CH)** score, which tests for concavities or indentations in district boundaries, calculates the **ratio of the area of the district (A_D) to the area of the minimum convex polygon (A_{MCP}) that can enclose the district’s geometry.**

$$CH = \frac{A_D}{A_{MCP}}$$

¹ Source for formulas, descriptions, and images: <https://fisherzachary.github.io/public/r-output.html>.

- The **Polsby-Popper² (PP)** score, which test for jagged or squiggly district boundaries, calculates the **ratio of the area of the district (A_D) to the area of a circle whose circumference is equal to the perimeter of the district (P_D)**.

$$PP = 4\pi \times \frac{A_D}{P_D^2}$$

- The **Reock³ (R)** score, which indicates a district's similarity to a circle, calculates the **ratio of the area of the district (A_D) to the area of the smallest circle that can be drawn around the district (A_{MBC})**.

$$R = \frac{A_D}{A_{MBC}}$$

Functional Analysis

The Florida Supreme Court has interpreted the Tier One constitutional provisions that relate to racial or language minorities' ability to participate in the political process or elect a candidate of their choice to mean that "the Legislature cannot eliminate majority-minority districts or weaken other historically performing minority districts where doing so would actually diminish a minority group's ability to elect its preferred candidates...in addition to majority-minority districts, coalition or crossover districts that previously provided minority groups with the ability to elect a preferred candidate under the benchmark plan must also be recognized."¹

The Court went on to say, "that under Florida's provision, a slight change in percentage of the minority group's population in a given district does not necessarily have a cognizable effect on a minority group's ability to elect its preferred candidate of choice. This is because a minority group's ability to elect a candidate of choice depends upon more than just population figures."²

A "functional analysis," as it has been termed, is an inquiry into a racial or language minority group's ability to elect a candidate of choice that requires "consideration not only of the minority population in the districts, or even the minority voting-age population in those districts, but of political data and how a minority population group has voted in the past."³ The United States Department of Justice (DOJ) has defined what a functional analysis of electoral behavior entails:

"In determining whether the ability to elect exists in the benchmark plan and whether it continues in the proposed plan, the Attorney General does not rely on any predetermined or fixed demographic percentages at any point in the assessment. Rather, in the Department's view, this determination requires a functional analysis of the electoral behavior within the particular jurisdiction or election district. [C]ensus data alone may not provide sufficient indicia of electoral behavior to make the requisite determination. Circumstances, such as differing rates of electoral participation within discrete portions of a population, may impact on the ability of voters to elect candidates of choice, even if the overall demographic data show no significant change. Although comparison of the census population of districts in the benchmark and proposed plans is the important starting point...election history and voting patterns within the jurisdiction, voter registration and turnout information, and other similar information are very important to an assessment of the actual effect of a redistricting plan."⁴

The DOJ Guidance cited refers to preclearance under Section 5 of the Voting Rights Act, which is no longer required after the U.S. Supreme Court's decision in *Shelby County v. Holder*. However, as *Apportionment I* states, "Florida's new constitutional provision, however, codified the non-retrogression principle of Section 5 and has now extended it statewide. In other words, Florida now has a statewide non-retrogression requirement independent of Section 5."⁵

Municipal Boundaries

The boundaries of Florida’s municipalities are not static. Between January 1, 2010 and December 31, 2019, two hundred cities annexed or deannexed parcels, changing their boundaries 3,552 times¹.

Additionally, while Florida Statutes² permit municipalities to annex contiguous and compact unincorporated territory, many of Florida’s cities are not contiguous, neither visually nor mathematically compact, and contain holes or enclaves³.

The table below provides the average number of parts, average area, average compactness scores, and the average number of holes in Florida’s municipalities. A review of it suggests that as cities increase in both geographical and population size they tend to be less compact and have more discontinuous parts and enclaves.

The additional tables below list:

- Cities that have changed their boundaries between the 2010 and 2020 deadlines for states to submit geographical boundary changes to the Census Bureau for inclusion in the decennial census;
- Cities that are not contiguous; and
- Cities with holes or enclaves.

¹ Boundary change data obtained from the U.S. Census Bureau: <https://www.census.gov/geographies/reference-files/time-series/geo/bas/annex.html>. As noted, The U.S. Census Bureau makes no claims to the completeness of the annexation data in the boundary change files. The data in these files were collected through programs in which state, county, and local governments **voluntarily** participated.

² Section 171.0413(1), F.S. 2021

³ Compactness scores, parts, and holes based on 2020 U.S. Census TIGER geometry for the places layer available at: <https://www.census.gov/geographies/mapping-files/time-series/geo/tiger-line-file.2020.html>.

NOVEMBER 17, 2021

State Senate Redistricting Plans in Florida

- Committee staff has produced a series of redistricting plans per the directives received on October 18, 2021.
- Districts are numbered to be roughly analogous to their predecessor districts, and may be renumbered.
- In drawing plans, staff relied on the plain language of the constitution, federal law, and existing judicial precedent to ensure that plans comply with the complex layering of federal and state standards.
- Districts were drawn to balance co-equal Tier Two standards of Article III, Sections 20 and 21 of the Florida Constitution, unless doing so would conflict with Tier One standards.

State Senate Redistricting Plans in Florida

- To comply with Tier-One standards:
 - Districts were drawn without reviewing any political data other than where a review of the political data was required to perform an appropriate functional analysis to evaluate whether or not a district denied or abridged a racial or language minority group's ability to participate in the political process or diminished their ability to elect representatives of their choice.
 - Districts were drawn without the use of any residence information of any sitting member of the Florida Legislature or Congress.
 - Districts were drawn without regard to the preservation of existing district boundaries.

State Senate Redistricting Plans in Florida

- To comply with Tier-Two standards, districts were drawn:
 - To be as nearly equal in population as practicable, with district population deviations of less than 1% of the ideal population of 538,455.
 - To be visually compact in relation to their shape and geography. Mathematical scores were used where appropriate.
 - To use county boundaries where feasible. In less populated areas, whole counties were grouped together to make a district or set of districts. In more populated areas where it was feasible to do so, districts were kept wholly within a county.
 - To use geographic features that are easily recognizable and readily ascertainable as district boundaries where feasible. The Boundary Analysis for each plan illustrates the rate at which railways, interstates, federal and state highways, and large water bodies were used as district boundaries for each district.
 - To keep cities whole where doing so was feasible, while recognizing the impermanent and irregular shapes of municipal boundaries. If or when a city was split, static geographic features were sought out for usage as district boundaries.
- Accordingly, plans contain trade-offs within the co-equal Tier Two criteria, and are presented for consideration and exercise of legislative discretion.

 - District's population deviation from the ideal, also expressed as a percentage
 - Voting Age Population for
 - BVAP – respondents who identified as being Black either singly or in combination with some other race and/or ethnicity, including Hispanic
 - HVAP – respondents who identified as Hispanic and of any race or combination of races, including Black
 - District Area in square miles, Perimeter in miles, and Compactness scores (Convex Hull, Polsby-Popper, and Reock).
 - Counts of whole and partial counties and cities within each district.
 - Counts of counties and cities that have all their population in only one district.
 - Each district's boundary coincidence with certain types of features identified by the US Census Bureau in their TIGER layers. These include those recognized by the Florida Supreme Court as political and geographic boundaries:
 - City boundaries
 - County boundaries
 - Primary and Secondary Roads (Interstates, US Highways, and State Highways)
 - Railroads
 - Water features with a contiguous area of greater than ten acres.
 - The portion of each district's boundary that does not coincide with these features.

Split Cities and Counties

- Split Counties
 - List of counties that have two or more districts. Total population is presented along with the area (square miles), and is also expressed as a percentage.

MEMORANDUM

To: Mr. Jay Ferrin, Staff Director
From: Senator Ray Rodrigues, Chair
Subject: Committee Directives to Staff on Map-Drawing
Date: October 18, 2021

Senators of the Committee on Reapportionment have reviewed the census data, the features of the map-drawing application, and the relevant criteria, history, and legal standards. I believe that we have the proper foundation upon which to direct you and your staff to produce a series of maps for our consideration.

First and foremost, you are directed to the plain language of the constitution, federal law, and the judicial precedent that exists today in regards to that language. The Constitution sets forth two tiers of redistricting standards, and provides that the Tier-Two standards apply unless complying with them would conflict with the Tier-One standards or with federal law. The Tier-One standards control in the event of a conflict with Tier-Two standards, but in all other circumstances the Tier-Two standards must control the drawing of district lines. Therefore staff is directed to comply with the objective criteria outlined in Tier Two of Article III Sections 20 and 21 of the Florida Constitution, balancing them in a manner that does not establish any priority of one standard over another, unless complying with the Tier-Two standards would conflict with Tier-One standards or federal law.

In accordance with the Tier Two standard of the constitutional requirements related to equal population, you are directed to prepare Senate plans with district population deviations not to exceed 1% of the ideal population of 538,455 people, and to prepare Congressional plans with population deviations of plus or minus one person of the ideal population of 769,221 people.

To comply with the Tier Two standard related to compactness, you are directed to draw districts that are visually compact in relation to their shape and geography, and to use mathematical compactness scores where appropriate.

To comply with the Tier Two standard related to utilizing existing political boundaries, you are directed to examine the use of county boundaries where feasible. Furthermore, you are directed to explore concepts that, where feasible, result in districts consisting of whole counties in less populated areas, and to explore concepts that, where feasible, keep districts wholly within a county in the more densely populated areas.

With respect to municipal boundaries, you are directed to explore concepts that, where feasible, keep cities whole while also considering the impermanent and changing nature of municipal boundaries.

You are further directed to examine the use of existing geographic boundaries where feasible. Specifically railways, interstates, federal and state highways, and large water bodies such as those that were deemed to be easily recognizable and readily ascertainable by Florida's Supreme Court. We recognize that these geographic features afford us an opportunity to create districts with static boundaries, and would ask that Staff present the boundary analysis report with each plan so that we can determine coincidence of districts' boundaries with these features.

Further, you are directed, when drawing compact districts consistent with the population equality requirements, and that utilize political and geographic boundaries where feasible, to confirm that the districts comply with the Tier-One constitutional standards and with federal law, specifically, that that districts are not drawn with the result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process or diminish their ability to elect representatives of their choice. You are directed to conduct a functional analysis on relevant districts to confirm that any map presented for consideration by this Committee or its Select Subcommittees complies with these Tier-One requirements of the Florida Constitution and with the federal Voting Rights Act.

Regarding compliance with the Tier One standard related to the intent to favor or disfavor a political party, you are directed to draw districts without reviewing political data other than where a review of political data is required to perform an appropriate functional analysis to evaluate whether a minority group has the ability to elect representatives of choice.

To comply with the Tier One standard related to intent to favor or disfavor an incumbent, you are directly to draw districts without the use of any residence information of any sitting member of the Florida Legislature or Congress and to draw districts without regard to the preservation of existing district boundaries.

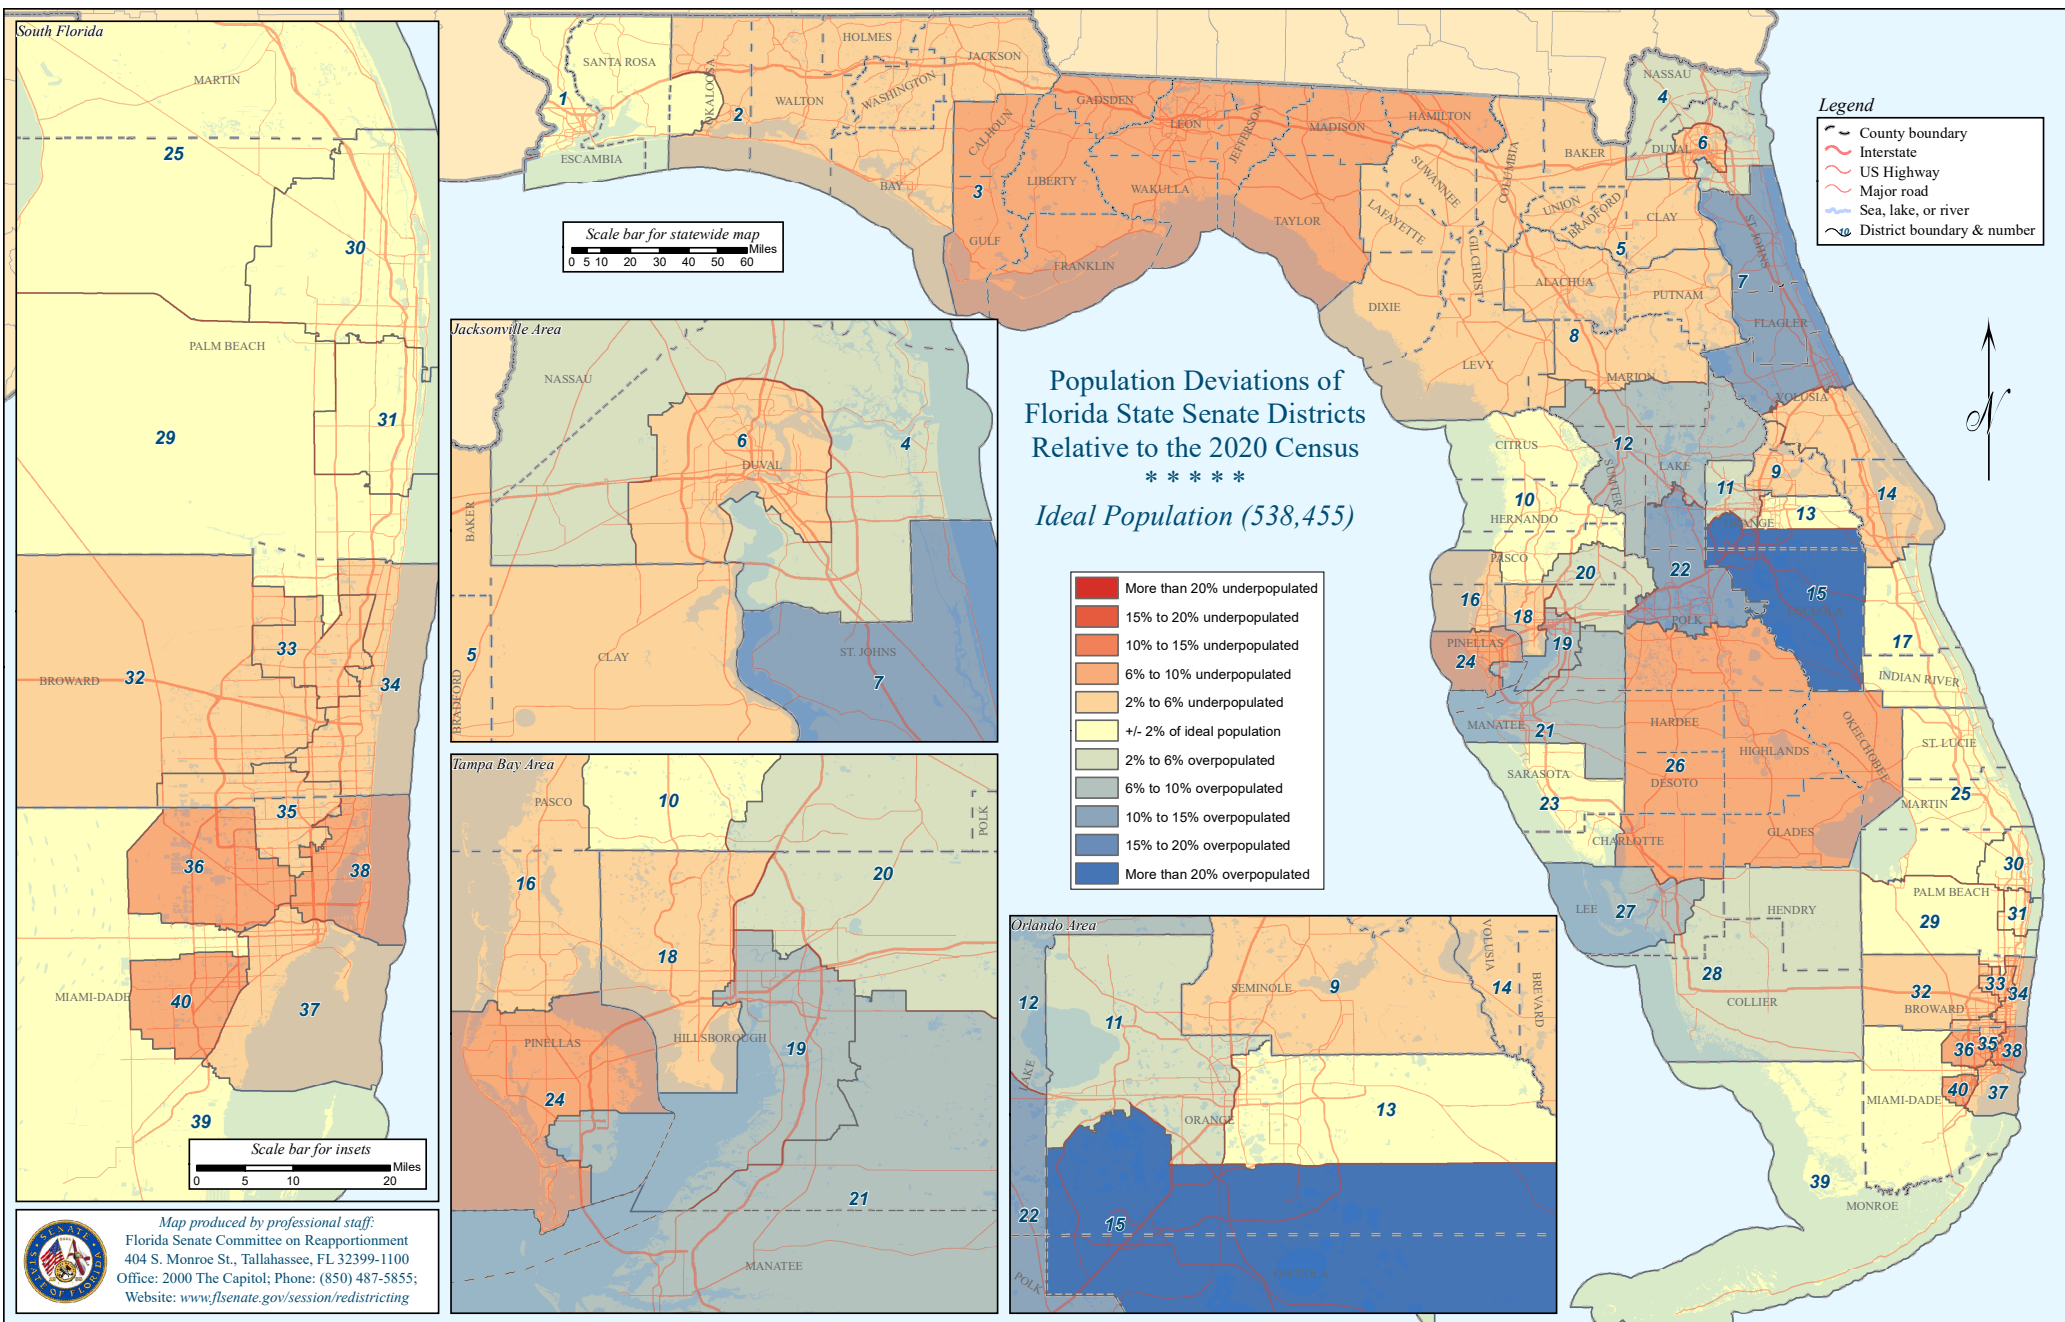

We believe that by limiting the considerations to those adopted by the citizens of Florida, this process will produce constitutionally compliant maps. While the standards that are to be considered require a balancing act it, is important to remember that the standards themselves are

not optional. Choices made by staff and approved by this committee should be made based on compliance with the objective constitutional criteria.

You are directed to produce a series of plans for each of our Select Subcommittees to workshop. All plans you bring forward must comply with the complex layering of federal and state standards. You will be asked to explain the various trade-offs within the co-equal Tier Two standards presented in each plan. It is within the balancing of these tradeoffs that Senators on the committee must exercise our legislative discretion and produce a constitutionally compliant map.

If staff receives any suggestion that a plan be drafted or changed with the intent to favor or disfavor any incumbent or political party, staff is directed to disregard the suggestion entirely, document the conversation in writing, and report the conversation directly to the Senate President.

Thank you for your attention to these directives. Please notify me, as well as Chairs Bradley and Burgess when you have completed work pertinent to their respective select subcommittees so that workshops can be noticed. Again, thank you and we look forward to reviewing your work.

Redistricting Plans in Florida

- Committee staff has revised the redistricting plans that were published on November 10 and workshopped the week of November 15.
- In revising the plans, staff followed the instruction from the select subcommittee, and looked for improvements and consistency in the application of the various trade-offs presented in the maps.
- Impacts of the revisions are mainly to the utilization of political and geographic boundaries, with some improvements in visual compactness and cities kept whole.
- Districts retained the same numbers from the original maps.

MEMORANDUM

To: Mr. Jay Ferrin, Staff Director
From: Senator Ray Rodrigues, Chair
Subject: Committee Directives to Staff on Map-Drawing
Date: October 18, 2021

Senators of the Committee on Reapportionment have reviewed the census data, the features of the map-drawing application, and the relevant criteria, history, and legal standards. I believe that we have the proper foundation upon which to direct you and your staff to produce a series of maps for our consideration.

First and foremost, you are directed to the plain language of the constitution, federal law, and the judicial precedent that exists today in regards to that language. The Constitution sets forth two tiers of redistricting standards, and provides that the Tier-Two standards apply unless complying with them would conflict with the Tier-One standards or with federal law. The Tier-One standards control in the event of a conflict with Tier-Two standards, but in all other circumstances the Tier-Two standards must control the drawing of district lines. Therefore staff is directed to comply with the objective criteria outlined in Tier Two of Article III Sections 20 and 21 of the Florida Constitution, balancing them in a manner that does not establish any priority of one standard over another, unless complying with the Tier-Two standards would conflict with Tier-One standards or federal law.

In accordance with the Tier Two standard of the constitutional requirements related to equal population, you are directed to prepare Senate plans with district population deviations not to exceed 1% of the ideal population of 538,455 people, and to prepare Congressional plans with population deviations of plus or minus one person of the ideal population of 769,221 people.

To comply with the Tier Two standard related to compactness, you are directed to draw districts that are visually compact in relation to their shape and geography, and to use mathematical compactness scores where appropriate.

To comply with the Tier Two standard related to utilizing existing political boundaries, you are directed to examine the use of county boundaries where feasible. Furthermore, you are directed to explore concepts that, where feasible, result in districts consisting of whole counties in less populated areas, and to explore concepts that, where feasible, keep districts wholly within a county in the more densely populated areas.

With respect to municipal boundaries, you are directed to explore concepts that, where feasible, keep cities whole while also considering the impermanent and changing nature of municipal boundaries.

You are further directed to examine the use of existing geographic boundaries where feasible. Specifically railways, interstates, federal and state highways, and large water bodies such as those that were deemed to be easily recognizable and readily ascertainable by Florida's Supreme Court. We recognize that these geographic features afford us an opportunity to create districts with static boundaries, and would ask that Staff present the boundary analysis report with each plan so that we can determine coincidence of districts' boundaries with these features.

Further, you are directed, when drawing compact districts consistent with the population equality requirements, and that utilize political and geographic boundaries where feasible, to confirm that the districts comply with the Tier-One constitutional standards and with federal law, specifically, that that districts are not drawn with the result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process or diminish their ability to elect representatives of their choice. You are directed to conduct a functional analysis on relevant districts to confirm that any map presented for consideration by this Committee or its Select Subcommittees complies with these Tier-One requirements of the Florida Constitution and with the federal Voting Rights Act.

Regarding compliance with the Tier One standard related to the intent to favor or disfavor a political party, you are directed to draw districts without reviewing political data other than where a review of political data is required to perform an appropriate functional analysis to evaluate whether a minority group has the ability to elect representatives of choice.

To comply with the Tier One standard related to intent to favor or disfavor an incumbent, you are directly to draw districts without the use of any residence information of any sitting member of the Florida Legislature or Congress and to draw districts without regard to the preservation of existing district boundaries.

We believe that by limiting the considerations to those adopted by the citizens of Florida, this process will produce constitutionally compliant maps. While the standards that are to be considered require a balancing act it, is important to remember that the standards themselves are

not optional. Choices made by staff and approved by this committee should be made based on compliance with the objective constitutional criteria.

You are directed to produce a series of plans for each of our Select Subcommittees to workshop. All plans you bring forward must comply with the complex layering of federal and state standards. You will be asked to explain the various trade-offs within the co-equal Tier Two standards presented in each plan. It is within the balancing of these tradeoffs that Senators on the committee must exercise our legislative discretion and produce a constitutionally compliant map.

If staff receives any suggestion that a plan be drafted or changed with the intent to favor or disfavor any incumbent or political party, staff is directed to disregard the suggestion entirely, document the conversation in writing, and report the conversation directly to the Senate President.

Thank you for your attention to these directives. Please notify me, as well as Chairs Bradley and Burgess when you have completed work pertinent to their respective select subcommittees so that workshops can be noticed. Again, thank you and we look forward to reviewing your work.

State Senate Redistricting Plans in Florida

- Committee staff has produced another series of redistricting plans.
- Staff followed the instruction from the select subcommittee, and looked for improvements and consistency in the application of the various trade-offs presented in the maps.
- Districts retained the same numbers from the original maps.

State Senate Redistricting Plans in Florida

- Plans being presented today:
 - Present policy choices for the Select Subcommittee;
 - Show improvements in Tier Two metrics; and
 - Do not retrogress and maintain the ability to for racial and language minorities to participate in the political process and elect candidates of their choice.
 - S000S8044 – Five African-American districts and five Hispanic districts.
 - S000S8046 – Five African-American districts and five Hispanic districts.
 - S000S8048 – Five African-American districts and five Hispanic districts.
 - S000S8050 – Five African-American districts and five Hispanic districts.

State Senate Redistricting Plans in Florida

- Consistent application among the various trade-offs results in a narrowing of some of the options previously workshopped.
- Co-equal criteria outlined in the tier-two standards of Article III, Section 21 of the Florida Constitution and the directives issued by the Committee on October 18, 2021 were balanced to be consistent and to apply similar treatment across different areas of the state.
- As with the plans previously workshopped, a functional analysis of the minority districts in each plan confirms that they do not diminish the ability for racial and language minorities to elect candidates of their choice.

MEMORANDUM

To: Mr. Jay Ferrin, Staff Director
From: Senator Ray Rodrigues, Chair
Subject: Committee Directives to Staff on Map-Drawing
Date: October 18, 2021

Senators of the Committee on Reapportionment have reviewed the census data, the features of the map-drawing application, and the relevant criteria, history, and legal standards. I believe that we have the proper foundation upon which to direct you and your staff to produce a series of maps for our consideration.

First and foremost, you are directed to the plain language of the constitution, federal law, and the judicial precedent that exists today in regards to that language. The Constitution sets forth two tiers of redistricting standards, and provides that the Tier-Two standards apply unless complying with them would conflict with the Tier-One standards or with federal law. The Tier-One standards control in the event of a conflict with Tier-Two standards, but in all other circumstances the Tier-Two standards must control the drawing of district lines. Therefore staff is directed to comply with the objective criteria outlined in Tier Two of Article III Sections 20 and 21 of the Florida Constitution, balancing them in a manner that does not establish any priority of one standard over another, unless complying with the Tier-Two standards would conflict with Tier-One standards or federal law.

In accordance with the Tier Two standard of the constitutional requirements related to equal population, you are directed to prepare Senate plans with district population deviations not to exceed 1% of the ideal population of 538,455 people, and to prepare Congressional plans with population deviations of plus or minus one person of the ideal population of 769,221 people.

To comply with the Tier Two standard related to compactness, you are directed to draw districts that are visually compact in relation to their shape and geography, and to use mathematical compactness scores where appropriate.

To comply with the Tier Two standard related to utilizing existing political boundaries, you are directed to examine the use of county boundaries where feasible. Furthermore, you are directed to explore concepts that, where feasible, result in districts consisting of whole counties in less populated areas, and to explore concepts that, where feasible, keep districts wholly within a county in the more densely populated areas.

With respect to municipal boundaries, you are directed to explore concepts that, where feasible, keep cities whole while also considering the impermanent and changing nature of municipal boundaries.

You are further directed to examine the use of existing geographic boundaries where feasible. Specifically railways, interstates, federal and state highways, and large water bodies such as those that were deemed to be easily recognizable and readily ascertainable by Florida's Supreme Court. We recognize that these geographic features afford us an opportunity to create districts with static boundaries, and would ask that Staff present the boundary analysis report with each plan so that we can determine coincidence of districts' boundaries with these features.

Further, you are directed, when drawing compact districts consistent with the population equality requirements, and that utilize political and geographic boundaries where feasible, to confirm that the districts comply with the Tier-One constitutional standards and with federal law, specifically, that that districts are not drawn with the result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process or diminish their ability to elect representatives of their choice. You are directed to conduct a functional analysis on relevant districts to confirm that any map presented for consideration by this Committee or its Select Subcommittees complies with these Tier-One requirements of the Florida Constitution and with the federal Voting Rights Act.

Regarding compliance with the Tier One standard related to the intent to favor or disfavor a political party, you are directed to draw districts without reviewing political data other than where a review of political data is required to perform an appropriate functional analysis to evaluate whether a minority group has the ability to elect representatives of choice.

To comply with the Tier One standard related to intent to favor or disfavor an incumbent, you are directly to draw districts without the use of any residence information of any sitting member of the Florida Legislature or Congress and to draw districts without regard to the preservation of existing district boundaries.

We believe that by limiting the considerations to those adopted by the citizens of Florida, this process will produce constitutionally compliant maps. While the standards that are to be considered require a balancing act it, is important to remember that the standards themselves are

not optional. Choices made by staff and approved by this committee should be made based on compliance with the objective constitutional criteria.

You are directed to produce a series of plans for each of our Select Subcommittees to workshop. All plans you bring forward must comply with the complex layering of federal and state standards. You will be asked to explain the various trade-offs within the co-equal Tier Two standards presented in each plan. It is within the balancing of these tradeoffs that Senators on the committee must exercise our legislative discretion and produce a constitutionally compliant map.

If staff receives any suggestion that a plan be drafted or changed with the intent to favor or disfavor any incumbent or political party, staff is directed to disregard the suggestion entirely, document the conversation in writing, and report the conversation directly to the Senate President.

Thank you for your attention to these directives. Please notify me, as well as Chairs Bradley and Burgess when you have completed work pertinent to their respective select subcommittees so that workshops can be noticed. Again, thank you and we look forward to reviewing your work.

BILL: SB 102

INTRODUCER: Senator Rodrigues

SUBJECT: Establishing the Congressional Districts of the State

DATE: January 12, 2022

REVISED: _____

ANALYST	STAFF DIRECTOR	REFERENCE	ACTION
1. Rojas	Ferrin	RE	Pre-meeting

I. Summary:

Senate Bill 102 apportions the state into 28 single-member Congressional districts as required by the United States (U.S.) Constitution, Federal Voting Rights Act, Florida Constitution, and applicable court decisions.

II. Present Situation:

The 2020 Census revealed an unequal distribution of population growth across Florida’s Congressional districts. Therefore, districts must be adjusted to comply with the “one person, one vote” principle such that each district must be substantially equal in total population.¹

According to the 2020 Census, 21,538,187 people resided in Florida as of April 1, 2020. That represents a population growth of 2,736,877 people from 2010 to 2020, approximately a 15 percent increase. Due to the population growth within the last decade, Florida is apportioned an additional congressional seat, increasing its representation to 28.²

Table 1 below shows the changes in population for each of Florida’s current congressional and state legislative districts and their respective ideal populations.

¹ See *Reynolds v. Sims*, 377 U.S. 533, 568 (1964).

² United States Census Bureau, *2020 Census Apportionment Results* (April, 26, 2021), <https://www.census.gov/data/tables/2020/dec/2020-apportionment-data.html>.

Table 1. Florida Congressional and State Legislative Districts Summary 2010 – 2020

Florida Fast Facts	2010	2020	Difference
Statewide Population	18,801,310	21,538,187	+2,736,877
Number of Congressional Seats	27	28	+1 seat
Congressional District Ideal Population	696,345	769,221	+72,876
Florida House of Representatives District Ideal Population <i>(based on 120 seats)</i>	156,678	179,485	+22,807
Florida Senate District Ideal Population <i>(based on 40 seats)</i>	470,033	538,455	+68,422

According to the 2020 Census, the congressional district with the largest population has 955,602 people (186,381 more than the ideal), and the congressional district with the smallest population has 727,465 people (41,756 less than ideal).

Background

The terms “redistricting” and “reapportionment” are often used interchangeably to describe the process of redrawing Congressional and state legislative district boundaries after each decennial census. Redrawing districts is necessary to accommodate population growth and shifts, ensuring that each district contains equal or nearly equal populations in compliance with applicable state and federal law.

The U.S. Constitution requires the apportionment of the U.S. House of Representatives after each decennial census to distribute each of the U.S. House of Representatives’ 435 seats between the 50 states and to equalize population between districts within each state.³

The 2020 Census

Established by the U.S. Constitution, the census has been conducted every 10 years by the United States Census Bureau since 1790 to determine the number of people living in the United States. Article I, s. 2 of the U.S. Constitution states that “The actual enumeration shall be made within three years after the first meeting of the Congress of the United States, and within every subsequent term of ten years, in such manner as they shall by law direct.”⁴

Florida is one of 21 states that explicitly requires the use of census data for redistricting.⁵ Article X, s. 8 of the Florida Constitution designates each decennial census of the state taken by the

United States as the official census of the state.⁶ Florida Statutes also designate the most recent federally conducted decennial census as the official census for redistricting.⁷

Public Law (P.L.) 94-171 requires the Census Bureau to provide states the opportunity to identify the small area geography for which data is needed to conduct legislative and congressional redistricting. The law also requires the U.S. Census Bureau to furnish these tabulations of population to each state, at the county, tract, block group, and block levels, within one year of Census Day.⁸

Title 13, U.S. Code requires that the state-level apportionment population counts be delivered to the President of the United States within 9 months of the census date. In the 2020, 2010, and most 20th century censuses, the census date has been April 1, meaning that the statutory deadline for delivering the counts to the President is December 31 of the census year.⁹

The delivery of 2020 Census results was delayed due to several factors affecting the Census Bureau's collection and processing, including the COVID-19 pandemic, natural disasters that included hurricanes and wildfires, civil unrest, and legal challenges.¹⁰

The state population counts for apportionment were delivered to the President on April 26, 2021 (originally due December 31, 2020). The U.S. Census Bureau provided redistricting data as legacy format summary files, which is tabular data, for all states on August 12, 2021 (originally due April 1, 2021). The full redistricting data toolkit was delivered to all 50 states and the public on September 16, 2021 (originally due April 1, 2021).

Redistricting Criteria and Concepts

Florida follows various criteria and standards as it relates to drawing congressional districts, including the United States (U.S.) Constitution, Federal Voting Rights Act, Florida Constitution, and applicable court decisions.

The United States Constitution

The United States (U.S.) Constitution requires the reapportionment of the U.S. House of Representatives after each decennial census to distribute each of the U.S. House of Representatives' 435 seats between the states and to equalize population among districts within each state.¹¹

Article I, s. 4 of the U.S. Constitution grants to each state legislature the exclusive authority to apportion seats designated to that state by providing the legislative bodies with the authority to

determine the times, place and manner of holding elections for senators and representatives. Consistent therewith, Florida adopts its Congressional apportionment plans by legislation subject to gubernatorial approval.

In addition to state specific requirements to redistrict, states are obligated to redistrict based on provisions within the United States Constitution. In *Wesberry v Sanders*, the United States Supreme Court held that districts must be as nearly equal in population as practicable.¹² Derived from the Fourteenth Amendment, this principle is commonly referred to as “one person, one vote”.¹³ For Congressional districts, “as practicable” has been interpreted to mean exactly equal based on census data available at the time of redistricting.¹⁴

The requirement that each district be equal in population applies differently to Congressional districts than to state legislative districts. The populations of Congressional districts must achieve absolute mathematical equality (+/- one person from ideal population), with no de minimis exception.¹⁵ Limited population variances are permitted if they are “unavoidable despite a good faith effort” or if a valid “justification is shown.”¹⁶ In practice, Congressional districting has strictly adhered to the requirement of exact mathematical equality and in *Kirkpatrick v. Preisler*, the Court rejected several justifications for violating this principle.

The Fourteenth Amendment has also been interpreted to prohibit racial predominance.¹⁷ The U.S Supreme Court has stated: “The equal protection clause prohibits a state, without sufficient justification, from separating its citizens into different voting districts on the basis of race.” A redistricting plan “that expressly distinguishes among citizens because of their race [must] be narrowly tailored to further a compelling government interest.” Such strict scrutiny review applies not only to redistricting plans that expressly distinguish citizens because of race, but also those plans “that, although race neutral, are, on their face unexplainable on grounds other than race.”¹⁸

The Federal Voting Rights Act

The Federal Voting Rights Act (VRA) prohibits any state or political subdivision from enacting a map that results in the denial or abridgement of any U.S. citizen’s right to vote on account of race, color, or status as a member of a language minority group and purposeful discrimination.¹⁹ The VRA also protects against retrogression—or backsliding—in the ability of racial and language minorities to elect representatives of their choice.²⁰

Section 2 of the VRA requires the creation of a district that performs for racial and language minorities where a minority population is geographically compact and sufficiently numerous to be a majority in a single-member district, the minority population is politically cohesive, the

majority votes sufficiently as a bloc to enable it usually to defeat the minority-preferred candidate, and under all of the circumstances, the minority population has less opportunity than others to participate in the political process and elect representatives of its choice.²¹

Section 5 of the VRA prohibits purposeful discrimination and protects against retrogression—or backsliding—in the ability of racial and language minorities to elect representatives of their choice.²² Section 5 contains a coverage formula that was applied to “covered jurisdictions” to determine if there was a history of discrimination against racial or language minorities.²³ Such jurisdictions had to be “precleared” before any of the changes could take effect, meaning that any substantial changes made to voting laws, including redistricting plans, in these “covered jurisdictions” could not be implemented without first obtaining federal permission.²⁴ In Florida, Collier, Hardee, Hendry, Hillsborough, and Monroe counties were subject to Department of Justice preclearance in regards to redistricting until the coverage formula was invalidated in 2013 in *Shelby County v. Holder*.²⁵ However, as *Apportionment I* states, “Florida's new constitutional provision, codified the non-retrogression principle of Section 5 (VRA) and has now extended it statewide. In other words, Florida now has a statewide non-retrogression requirement independent of Section 5.”²⁶

The Florida Constitution

In 2010, voters amended the Florida Constitution to create additional standards for establishing Congressional district boundaries.²⁷ The standards are set forth in two tiers.

Tier – One Standards

Article III, s. 20(a) of the Florida Constitution prohibits line-drawing that intentionally favors or disfavors a political party or an incumbent. It also affords protection to racial and language minorities. Districts may not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process; or to diminish their ability to elect representatives of their choice. Finally, it requires that districts must be contiguous. The order in which the tier-one standards are set out in the Constitution does not establish any priority among those standards within the tier.²⁸

The tier-one standards provide that “[n]o apportionment plan or district shall be drawn with the intent to favor or disfavor a political party or an incumbent.”²⁹ The Florida Supreme Court has held that Florida’s constitutional provision “prohibits intent, not effect” because “any redrawing of lines, regardless of intent, will inevitably have an effect on the political composition of a

district and likely whether a political party or incumbent is advantaged or disadvantaged.”³⁰ Nonetheless, there is no acceptable level of improper intent.³¹

The tier-one standards also provide protections for racial and language minorities. Districts may “not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process”; or to “diminish their ability to elect representatives of their choice.”³²

The Court has interpreted the tier-one constitutional provisions that relate to racial or language minorities’ ability to participate in the political process or elect a candidate of their choice to mean that “the Legislature cannot eliminate majority-minority districts or weaken other historically performing minority districts where doing so would actually diminish a minority group’s ability to elect its preferred candidates...in addition to majority-minority districts, coalition or crossover districts that previously provided minority groups with the ability to elect a preferred candidate under the benchmark plan must also be recognized.”³³

The Court went on to say, “that under Florida’s provision, a slight change in percentage of the minority group’s population in a given district does not necessarily have a cognizable effect on a minority group’s ability to elect its preferred candidate of choice. This is because a minority group’s ability to elect a candidate of choice depends upon more than just population figures.”³⁴ In order to draw districts that comply with the tier-one standards, a functional analysis is required to be performed.

A “functional analysis,” as it has been termed, is an inquiry into a racial or language minority group’s ability to elect a candidate of choice that requires “consideration not only of the minority population in the districts, or even the minority voting-age population in those districts, but of political data and how a minority population group has voted in the past.”³⁵ The map drawing application in use for the 2022 Redistricting Cycle includes 231 data points in the following categories to enable users to perform this type of analysis:³⁶

The last tier-one standard requires that all districts “consist of contiguous territory.” The Florida Supreme Court has previously defined contiguous as “being in actual contact: touching along a boundary or at a point.”³⁷ A district is not contiguous if it consists of isolated parts or meets at a corner or right angle.³⁸ The Florida Supreme Court has also held that the presence in a district of a body of water without a connecting bridge, even if it requires land travel outside the district in order to reach other parts of the district, does not violate contiguity.³⁹

Tier – Two Standards

The tier-two standards of the Florida Constitution encompass what are often called “traditional redistricting criteria,” but make it clear these standards are subordinated to the tier-one standards. Article III, s. 20(b) states that unless compliance with these standards conflicts with tier-one standards or with federal law, districts shall be as nearly equal in population as practicable, districts shall be compact, and districts shall, where feasible, utilize existing political and geographical boundaries.⁴⁰ As with tier-one, the order in which the tier-two standards are set out in the Constitution does not establish any priority among those standards within the tier.⁴¹

The first tier-two standard set forth by the Florida Constitution states that districts shall be as nearly equal in population as is practicable. As interpreted by the United States Supreme Court, the Equal Protection Clause of the Fourteenth Amendment mandates that “state legislatures be apportioned in such a way that each person's vote carries the same weight—that is, each legislator represents the same number of voters.”⁴² Congressional districts fall under a stricter standard of variance under the United States Constitution, where Congressional districts must achieve precise mathematical equality of population of +/- one person from the ideal population.⁴³

The second tier-two requirement established by Section 20 of the Florida Constitution is compactness. The constitutional amendments adopted in Florida in 2010 state that districts “shall be compact.”⁴⁴

⁴⁴ Art. III, s. 20(b), Fla. Const.

The Florida Supreme Court held that “compactness is a standard that refers to the shape of the district. The goal is to ensure that districts are logically drawn and that bizarrely shaped districts are avoided. Compactness can be evaluated both visually and by employing standard mathematical measurements.”⁴⁵

Florida has historically used three scores to gauge compactness mathematically, all of which fall within a range of 0-1, where a score closer to one indicates a more compact district.⁴⁶ The first score used is the Convex Hull score, which tests for concavities or indentations in district boundaries by calculating the ratio of the area of the district to the area of the minimum convex polygon that can enclose the district’s geometry.⁴⁷ The second score used is the Polsby-Popper score, which tests for jagged or squiggly district boundaries by calculating the ratio of the area of the district to the area of a circle whose circumference is equal to the perimeter of the district. The third score used is the Reock score, which indicates a district’s similarity to a circle by calculating the ratio of the area of the district to the area of the smallest circle that can be drawn around the district.⁴⁸

In the Court’s interpretation of the tier-one and tier-two standards as applied to state legislative districts, they held that “since compactness is set forth in Section 21(b), the criteria of Section 21(a) must predominate to the extent that they conflict with drawing a district that is compact. However, if a district can be drawn more compactly while utilizing political and geographical boundaries and without intentionally favoring a political party or incumbent, compactness must be a yardstick by which to evaluate those other factors.”⁴⁹ The same standard applies to Congressional districts given that Sections 20 and 21 within Article III of the Florida Constitution are identical.⁵⁰

The final tier-two standard established by the Florida Constitution is that districts shall, “where feasible, utilize existing political and geographical boundaries.”⁵¹ The Florida Supreme court has defined geographic boundaries as features that are “easily ascertainable and commonly understood” such as “rivers, railways, interstates, and state roads.”⁵² Moreover, political boundaries primarily consist of county and municipal boundaries.⁵³

The boundaries of Florida’s municipalities are not static. Between January 1, 2010 and December 31, 2019, 200 cities annexed or deannexed parcels, changing their boundaries 3,552

times.⁵⁴ Additionally, while Florida Statutes⁵⁵ permit municipalities to annex contiguous and compact unincorporated territory, many of Florida's cities are not contiguous, neither visually nor mathematically compact, and contain holes or enclaves.⁵⁶ Of Florida's 412 cities, 136 are discontinuous, and 170 have holes or enclaves.⁵⁷

Unlike other objective tier-two standards in the Florida Constitution, there is no widely accepted measurement for compliance with the requirement to, where feasible, utilize existing political and geographic boundaries.⁵⁸

Simply counting the cities or counties kept whole, meaning they have either all geographic territory or all population in a single district⁵⁹, fails to account for the degree of usage of existing county or municipal boundaries. It also disregards the co-equal constitutional mandate to, where feasible, use political and geographical boundaries.⁶⁰

Professional staff of the Florida House of Representatives and the Florida Senate worked to develop a set of quantitative metrics that measure the coincidence of a district's border with easily ascertainable and commonly understood political and geographic features, and make it publicly available to all users in the redistricting application. This Boundary Analysis independently measures the extent to which district boundaries overlap city boundaries, county boundaries, primary and secondary roads (interstates, U.S. highways, and State highways), railroads, and significant water bodies (contiguous area hydrography features greater than 10 acres) as defined by the U.S. Census Bureau's TIGER/Line files. Districts' coincidence with these existing political and geographic boundaries is independently calculated and presented along with the extent to which district boundaries do not follow any of the specified features.

In this way, users are presented with a Boundary Analysis that shows the degree of utilization for each type of existing political or geographic boundary as specified by the Florida Constitution and interpreted by the Florida Supreme Court. To facilitate the utilization of existing political and geographic boundaries, each of the feature layers used in the computation of the Boundary Analysis is provided in the map-drawing application.

⁵⁴ Boundary change data obtained from the U.S. Census Bureau: <https://www.census.gov/geographies/reference-files/timeseries/geo/bas/annex.html>. As noted, The U.S. Census Bureau makes no claims to the completeness of the annexation data in the boundary change files. The data in these files were collected through programs in which state, county, and local governments voluntarily participated.

Judicial Review of State Legislative Districts

The state constitution prescribes a mandated review process for state legislative redistricting plans by the Florida Supreme Court.⁶¹ During a constitutionally mandated review, the Florida Supreme Court determines if the newly created State Senate and State House districts are valid. When the Florida Supreme Court enters a judgment that the plan is valid, the plan becomes binding upon all citizens of the state.⁶²

In contrast, the process for enacting Congressional districts differs in two ways. The districts are not established in a joint resolution, but in a general bill that is subject to a Governor's veto. Additionally, the maps do not require mandatory review by the Florida Supreme Court.

III. Effect of Proposed Changes:

Consistent with the United States (U.S.) Constitution, Federal Voting Rights Act, Florida Constitution, and applicable court decisions, the bill apportions the state into 28 single-member Congressional districts.

Section 1 of the bill amends s. 8.0001, F.S., to provide definitions regarding Census geography and the electronic versions of districts. Additionally, it designates the United States Decennial Census of 2020 as the official census of the state for the purposes of Congressional redistricting as provided by Art. X of the Florida Constitution.

Section 2 of the bill amends s. 8.0002, F.S., to describe the state's 28 Congressional districts using Census geography.

Section 3 of the bill amends s. 8.0111, F.S., to update the use of the 2010 Decennial Census to the 2020 Decennial Census.

Section 4 of the bill reenacts s. 8.031, F.S., to establish the districts described in 8.0002 as the official congressional districts of the state.

Section 5 of the bill creates s. 8.051, F.S., to designate electronic maps as the authoritative representation of the state's Congressional districts. Additionally, it establishes the Office of Economic and Demographic Research as the official custodian of electronic maps representing the Congressional districts described in s. 8.0002, F.S.

Section 6 of the bill reenacts s. 8.0611, F.S., to provide severability if any provision of this chapter is invalidated.

Section 7 of the bill amends s. 8.07, F.S., to change the applicable starting date for the qualification, nomination, and election of the new districts from 2012 to 2022.

Section 8 of the bill repeals s. 8.08, 8.081, 8.082, 8.083, 8.084, 8.085, 8.086, 8.087, and 8.088, F.S., to remove obsolete language from a remedial apportionment session.

⁶¹ Art. III, s. 16(c), Fla. Const.

⁶² Art. III, s. 16(d), Fla. Const.

Section 9 of the bill provides an effective date upon the bill becoming law.

V. Fiscal Impact Statement:

A. Tax/Fee Issues:

None.

B. Private Sector Impact:

None.

C. Government Sector Impact:

The 2022 reapportionment will have an undetermined fiscal impact on Florida's election officials, including 67 Supervisor of Elections offices and the Department of State, Division of Elections. Local supervisors will incur the cost of data processing and labor to change each of Florida's approximately 14 million voter records to reflect new districts. As precincts are reconfigured for new districts, postage and printing will be required to provide each eligible voter whose precinct has changed with official notification.

VI. Technical Deficiencies:

None.

VII. Related Issues:

None.

VIII. Statutes Affected:

This bill substantially amends the following sections of the Florida Statutes: 8.0001, 8.0002 and 8.0111.

This bill creates the following sections of the Florida Statute: 8.051.

This bill repeals the following sections of the Florida Statutes: 8.08, 8.081, 8.082, 8.083, 8.084, 8.085, 8.086, 8.087, and 8.088.

Section 1. Section 8.0001, Florida Statutes, is amended to read:

(Substantial rewording of section. See s. 8.0001, F.S., for present text.)

8.0001 Definitions.—In accordance with s. 8(a), Art. X of the State Constitution, the United States Decennial Census of 2020 is the official census of the state for the purposes of congressional redistricting.

(1) The following delineation of congressional districts employs areas included within official county, tract, block groups, and block boundary descriptions used by the United States Department of Commerce, Bureau of the Census, in compiling the United States Decennial Census of 2020 in this state. The populations within these census geographic units are the population figures reported in the counts of the United States Decennial Census of 2020 provided to the state in accordance with Pub. L. No. 94-171.

(2) As used in this chapter, the term:

(a) "Block" describes the smallest geographic unit for which population was tabulated in the 2020 decennial census. Blocks are nested within tracts and within block groups. A block is identified by a three-character number that is unique within a block group.

(b) "Block equivalency file" describes a list of all blocks within the state and the congressional district number designated for each block. Blocks are listed by a 15-character number that combines the five-character county-level Federal Information Processing (FIPS) code, the six-character tract

59 number with leading zeros and an implied decimal, the single-
60 character block group number, and the three-character block
61 number.

62 (c) "Block group" describes a cluster of blocks within the
63 same census tract. Block groups are nested within tracts, and
64 are uniquely identified by a single character number with a
65 valid range of 0 through 9.

66 (d) "County" describes a legal governmental subdivision of
67 the state. Boundaries of counties described in this chapter
68 reflect those boundaries in effect as of January 1, 2020.

69 (e) "Geographical information systems map" describes an
70 electronic map that represents the boundaries of the
71 congressional districts of the state in a commonly accepted and
72 readable format.

73 (f) "Tract" describes a relatively permanent statistical
74 subdivision of a county. Tracts are nested within counties, and
75 are uniquely identified by an up to four-character number and a
76 two-digit suffix.

77 Section 2. Section 8.0002, Florida Statutes, is amended to
78 read:

79 (Substantial rewording of section. See
80 s. 8.0002, F.S., for present text.)
81 8.0002 Division of state into congressional districts.-For
82 the election of representatives to the United States House of
83 Representatives, the state is divided into 28 consecutively
84 numbered, single-member congressional districts of contiguous
85 territory, to be designated by such numbers as follows:

88 Section 3. Section 8.0111, Florida Statutes, is amended to
89 read:

90 8.0111 Inclusion of unlisted territory in contiguous
91 districts.-Any portion of the state which is not stated in this
92 chapter as being included in any district described in this
93 chapter but which is entirely surrounded by a district shall be
94 deemed to be included within the surrounding district. Any
95 portion of the state which is not included in any district
96 described in this chapter and which is not entirely surrounded
97 by a district shall be included within that district contiguous
98 to such portion that contains the least population per
99 representative according to the United States Decennial Census
100 of ~~2020~~ 2010; however, if every district contiguous to such
101 portion has an equal population, such portion shall be included
102 within the lowest-numbered district that is contiguous to such
103 portion.

104 Section 4. Section 8.031, Florida Statutes, is reenacted to
105 read:

106 8.031 Election of representatives to Congress.-The
107 districts named in s. 8.0002 constitute and form the
108 congressional districts of the state, and a representative to
109 the Congress shall be selected in and for each of the
110 congressional districts as provided by law.

111 Section 5. Effective upon becoming a law, section 8.051,
112 Florida Statutes, is created to read:

113 8.051 Electronic maps to serve as the official maps of
114 congressional districts; availability.-
115 (1) Geographical information systems maps and block
116 equivalency files representing the boundaries of congressional

 117 districts described in this act shall serve as the official maps
 118 of the congressional districts of the state. In the event of any
 119 conflict between the descriptions of districts set forth in this
 120 act, geographical information systems maps, or block equivalency
 121 files, the descriptions in the block equivalency files shall
 122 prevail.

(2) Within 10 days after the effective date of this act,
 124 the geographical information systems maps and block equivalency
 125 files representing the boundaries of the congressional districts
 126 described in this act shall be made available to the public by
 127 the Office of Economic and Demographic Research.

Section 6. Section 8.0611, Florida Statutes, is reenacted
 129 to read:

8.0611 Severability.—If any provision of this chapter is
 131 held invalid with respect to any person or circumstance, or if
 132 any congressional district established in this chapter is held
 133 invalid, the invalidity does not affect other provisions or
 134 applications of the chapter or any other districts established
 135 in this chapter which can be given effect without the invalid
 136 provision or application, and to this end the provisions of this
 137 chapter are severable.

Section 7. Effective upon becoming a law, section 8.07,
 139 Florida Statutes, is amended to read:

8.07 Applicability.—The congressional districts prescribed
 141 in s. 8.0002 apply with respect to the qualification,
 142 nomination, and election to the office of representative to the
 143 Congress of the United States in the primary and general
 144 elections held in 2022 ~~2012~~ and thereafter.

Section 8. Effective upon becoming a law, sections 8.08,

 146 8.081, 8.082, 8.083, 8.084, 8.085, 8.086, 8.087, and 8.088,
 147 Florida Statutes, are repealed.

Section 9. Except as otherwise expressly provided in this
 148 act and except for this section, which shall take effect upon
 149 this act becoming a law, this act shall take effect upon the
 150 expiration of the terms of the representatives to the United
 151 States House of Representatives serving on the date that this
 152 act becomes a law.

BILL ANALYSIS AND FISCAL IMPACT STATEMENT

(This document is based on the provisions contained in the legislation as of the latest date listed below.)

Prepared By: The Professional Staff of the Committee on Reapportionment

BILL: SJR 100

INTRODUCER: Senator Rodrigues

SUBJECT: Joint Resolution of Apportionment

DATE: January 12, 2022

REVISED: _____

	ANALYST	STAFF DIRECTOR	REFERENCE	ACTION
1.	Rojas	Ferrin	RE	Pre-meeting

I. Summary:

Senate Joint Resolution 100 apportions the state into 40 single-member State Senate districts and 120 single-member State House districts as required by the United States (U.S.) Constitution, Federal Voting Rights Act, Florida Constitution, and applicable court decisions.

II. Present Situation:

The 2020 Census revealed an unequal distribution of population growth across Florida’s state legislative districts. Therefore, districts must be adjusted to comply with the “one person, one vote” principle such that each district must be substantially equal in total population.¹

According to the 2020 Census, 21,538,187 people resided in Florida as of April 1, 2020. That represents a population growth of 2,736,877 people from 2010 to 2020, approximately a 15 percent increase.²

Table 1 below shows the changes in population for each of Florida’s current congressional and state legislative districts and their respective ideal populations.

¹ See *Reynolds v. Sims*, 377 U.S. 533, 568 (1964).

² United States Census Bureau, *2020 Census Apportionment Results* (April, 26, 2021), <https://www.census.gov/data/tables/2020/dec/2020-apportionment-data.html>.

Table 1. Florida Congressional and State Legislative Districts Summary 2010 – 2020

Florida Fast Facts	2010	2020	Difference
Statewide Population	18,801,310	21,538,187	+2,736,877
Number of Congressional Seats	27	28	+1 seat
Congressional District Ideal Population	696,345	769,221	+72,876
Florida House of Representatives District Ideal Population <i>(based on 120 seats)</i>	156,678	179,485	+22,807
Florida Senate District Ideal Population <i>(based on 40 seats)</i>	470,033	538,455	+68,422

According to the 2020 Census, the State Senate district with the largest population has 713,947 people (175,492 more than the ideal), and the State Senate district with the smallest population has 486,331 people (52,124 less than ideal). The State House district with the largest population has 237,134 people (57,689 more than the ideal), and the State House district with the smallest population has 153,589 people (25,896 less than the ideal).

Background

The terms “redistricting” and “reapportionment” are often used interchangeably to describe the process of redrawing Congressional and state legislative district boundaries after each decennial census. Redrawing districts is necessary to accommodate population growth and shifts, ensuring that each district contains equal or nearly equal populations in compliance with applicable state and federal law.

The Florida Constitution requires the Legislature to apportion the state at its regular session in the second year following each decennial census into not less 30 nor more than 40 State Senate districts and into not less than 80 nor more than 120 State House districts.³

The 2020 Census

Established by the U.S. Constitution, the census has been conducted every 10 years by the United States Census Bureau since 1790 to determine the number of people living in the United States. Article I, s. 2 of the U.S. Constitution states that “The actual enumeration shall be made within three years after the first meeting of the Congress of the United States, and within every subsequent term of ten years, in such manner as they shall by law direct.”⁴

³ Art. III, s. 16(a), Fla. Const.

⁴ Art. I, s. 2, U.S. Const.

Florida is one of 21 states that explicitly requires the use of census data for redistricting.⁵ Article X, s. 8 of the Florida Constitution designates each decennial census of the state taken by the United States as the official census of the state.⁶ Florida Statutes also designate the most recent federally conducted decennial census as the official census for redistricting.⁷

Public Law (P.L.) 94-171 requires the Census Bureau to provide states the opportunity to identify the small area geography for which data is needed to conduct legislative and congressional redistricting. The law also requires the U.S. Census Bureau to furnish these tabulations of population to each state, at the county, tract, block group, and block levels, within one year of Census Day.⁸

Title 13, U.S. Code requires that the state-level apportionment population counts be delivered to the President of the United States within 9 months of the census date. In the 2020, 2010, and most 20th century censuses, the census date has been April 1, meaning that the statutory deadline for delivering the counts to the President is December 31 of the census year.⁹

The delivery of 2020 Census results was delayed due to several factors affecting the Census Bureau's collection and processing, including the COVID-19 pandemic, natural disasters that included hurricanes and wildfires, civil unrest, and legal challenges.¹⁰

The state population counts for apportionment were delivered to the President on April 26, 2021 (originally due December 31, 2020). The U.S. Census Bureau provided redistricting data as legacy format summary files, which is tabular data, for all states on August 12, 2021 (originally due April 1, 2021). The full redistricting data toolkit was delivered to all 50 states and the public on September 16, 2021 (originally due April 1, 2021).

Redistricting Criteria and Concepts

Florida follows various criteria and standards as it relates to drawing state legislative districts, including the United States (U.S.) Constitution, Federal Voting Rights Act, Florida Constitution, and applicable court decisions.

The United States Constitution

In addition to state specific requirements to redistrict, states are obligated to redistrict based on provisions within the United States Constitution. In *Reynolds v. Sims*, the United States Supreme Court held that the Fourteenth Amendment required that seats in state legislature be reapportioned on a population basis. This principle is commonly referred to as "one person, one vote." The Supreme Court concluded:

...“the basic principle of representative government remains, and must remain, unchanged – the weight of a citizen’s vote cannot be made to depend on where he lives. Population is, of necessity, the starting point for consideration and the controlling criterion for judgment in legislative apportionment controversies...The Equal Protection Clause demands no less than substantially equal state legislative representation for all citizens, of all places as well as of all races. We hold that, as a basic constitutional standard, the Equal Protection Clause requires that the seats in both houses of a bicameral state legislature must be apportioned on a population basis.”¹¹

The Court went on to state that decennial reapportionment was a rational approach to readjust legislative representation to take into consideration population shifts and growth.¹²

In practice, Congressional districting has strictly adhered to the requirement of exact mathematical equality and in *Kirkpatrick v. Preisler*, the Court rejected several justifications for violating this principle. For state legislative districts, the courts have permitted a greater population deviation amongst districts. The populations of state legislative districts must instead be “substantially equal.”¹³

Substantial equality of population has come to generally mean that a legislative plan will not be held to violate the Equal Protection Clause if the difference between the smallest and largest district is less than ten percent.¹⁴ Nevertheless, any significant deviation (even within the 10 percent overall deviation margin) must be “based on legitimate considerations incident to the effectuation of a rational state policy,”¹⁵ including “the integrity of political subdivisions, the maintenance of compactness and contiguity in legislative districts, or the recognition of natural or historical boundary lines.”¹⁶

The Fourteenth Amendment has also been interpreted to prohibit racial predominance.¹⁷ The U.S. Supreme Court has stated: “The equal protection clause prohibits a state, without sufficient justification, from separating its citizens into different voting districts on the basis of race.” A redistricting plan “that expressly distinguishes among citizens because of their race [must] be narrowly tailored to further a compelling government interest.” Such strict scrutiny review applies not only to redistricting plans that expressly distinguish citizens because of race, but also those plans “that, although race neutral, are, on their face unexplainable on grounds other than race.”¹⁸

The Federal Voting Rights Act

The Federal Voting Rights Act (VRA) prohibits any state or political subdivision from enacting a map that results in the denial or abridgement of any U.S. citizen’s right to vote on account of race, color, or status as a member of a language minority group and purposeful discrimination.¹⁹ The VRA also protects against retrogression—or backsliding—in the ability of racial and language minorities to elect representatives of their choice.²⁰

Section 2 of the VRA requires the creation of a district that performs for racial and language minorities where a minority population is geographically compact and sufficiently numerous to be a majority in a single-member district, the minority population is politically cohesive, the majority votes sufficiently as a bloc to enable it usually to defeat the minority-preferred candidate, and under all of the circumstances, the minority population has less opportunity than others to participate in the political process and elect representatives of its choice.²¹

Section 5 of the VRA prohibits purposeful discrimination and protects against retrogression—or backsliding—in the ability of racial and language minorities to elect representatives of their choice.²² Section 5 contains a coverage formula that was applied to “covered jurisdictions” to determine if there was a history of discrimination against racial or language minorities.²³ Such jurisdictions had to be “precleared” before any of the changes could take effect, meaning that any substantial changes made to voting laws, including redistricting plans, in these “covered jurisdictions” could not be implemented without first obtaining federal permission.²⁴ In Florida, Collier, Hardee, Hendry, Hillsborough, and Monroe counties were subject to Department of Justice preclearance in regards to redistricting until the coverage formula was invalidated in 2013 in *Shelby County v. Holder*.²⁵ However, as *Apportionment I* states, “Florida's new constitutional provision, codified the non-retrogression principle of Section 5 (VRA) and has now extended it statewide. In other words, Florida now has a statewide non-retrogression requirement independent of Section 5.”²⁶

The Florida Constitution

Article III, s. 16(a) of the Florida Constitution requires that “the legislature at its regular session in the second year following each decennial census,” apportion the state by joint resolution “in accordance with the constitution of the state and the United States into not less than thirty nor more than forty consecutively numbered senatorial districts of either contiguous, overlapping or identical territory, and into not less than eighty nor more than one hundred twenty consecutively numbered representative districts of either contiguous, overlapping or identical territory.”²⁷ Once

the joint resolution is adopted, the state legislative plans are then subject to review by the Florida Supreme Court determining the validity of the apportionment.²⁸

A district is contiguous if no part of the district is isolated from the rest of the district by another district.²⁹ In a contiguous district, a person can travel from any point within the district to any other point without departing from the district.³⁰ A district is not contiguous if its parts touch only at a common corner, such as a right angle.³¹ The Florida Supreme Court has also held that the presence in a district of a body of water without a connecting bridge, even if it requires land travel outside the district in order to reach other parts of the district, does not violate contiguity.³²

Districts must be consecutively numbered, but it is not necessary that adjacent districts receive consecutive numbers.³³ For example, districts in a 40-district redistricting plan may be numbered from 1 to 40, but District 1 and District 2 need not be adjacent to one another.³⁴ In 2010, voters amended the Florida Constitution to create additional standards for establishing state legislative district boundaries.³⁵ The standards are set forth in two tiers.

Tier – One Standards

Article III, s. 21(a) of the Florida Constitution prohibits line-drawing that intentionally favors or disfavors a political party or an incumbent. It also affords protection to racial and language minorities. Districts may not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process; or to diminish their ability to elect representatives of their choice. Finally it reiterates that districts must be contiguous. The order in which the tier-one standards are set out in the Constitution does not establish any priority among those standards within the tier.³⁶

The tier-one standards provide that “[n]o apportionment plan or district shall be drawn with the intent to favor or disfavor a political party or an incumbent.”³⁷ The Florida Supreme Court has held that Florida’s constitutional provision “prohibits intent, not effect” because “any redrawing of lines, regardless of intent, will inevitably have an effect on the political composition of a district and likely whether a political party or incumbent is advantaged or disadvantaged.”³⁸ Nonetheless, there is no acceptable level of improper intent.³⁹

The tier-one standards also provide protections for racial and language minorities. Districts may “not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process”; or to “diminish their ability to elect representatives of their choice.”⁴⁰

The Court has interpreted the tier-one constitutional provisions that relate to racial or language minorities’ ability to participate in the political process or elect a candidate of their choice to mean that “the Legislature cannot eliminate majority-minority districts or weaken other historically performing minority districts where doing so would actually diminish a minority group’s ability to elect its preferred candidates...in addition to majority-minority districts, coalition or crossover districts that previously provided minority groups with the ability to elect a preferred candidate under the benchmark plan must also be recognized.”⁴¹

The Court went on to say, “that under Florida’s provision, a slight change in percentage of the minority group’s population in a given district does not necessarily have a cognizable effect on a minority group’s ability to elect its preferred candidate of choice. This is because a minority group’s ability to elect a candidate of choice depends upon more than just population figures.”⁴² In order to draw districts that comply with the tier-one standards, a functional analysis is required to be performed.

A “functional analysis,” as it has been termed, is an inquiry into a racial or language minority group’s ability to elect a candidate of choice that requires “consideration not only of the minority population in the districts, or even the minority voting-age population in those districts, but of political data and how a minority population group has voted in the past.”⁴³ The map drawing application in use for the 2022 Redistricting Cycle includes 231 data points in the following categories to enable users to perform this type of analysis:⁴⁴

The last tier-one standard requires that all districts “consist of contiguous territory”. The premise is similar to that in Article III, s. 16 of the Florida Constitution.

Tier – Two Standards

The tier-two standards of the Florida Constitution encompass what are often called “traditional redistricting criteria,” but make it clear these standards are subordinated to the tier-one standards. Article III, s. 21(b) states that unless compliance with these standards conflicts with tier-one standards or with federal law, districts shall be as nearly equal in population as practicable, districts shall be compact, and districts shall, where feasible, utilize existing political and geographical boundaries.⁴⁵ As with tier-one, the order in which the tier-two standards are set out in the Constitution does not establish any priority among those standards within the tier.⁴⁶

The first tier-two standard set forth by the Florida Constitution states that districts shall be as nearly equal in population as is practicable. As interpreted by the United States Supreme Court, the Equal Protection Clause of the Fourteenth Amendment mandates that “state legislatures be apportioned in such a way that each person's vote carries the same weight—that is, each legislator represents the same number of voters.”⁴⁷

The courts have allowed reasonable deviations for mathematical equality for state legislative districts to accommodate traditional redistricting objectives, such as compactness, contiguity and respect to the boundaries of political subdivisions.⁴⁸ In *Apportionment I*, the court stated that “Because obtaining equal population “if practicable” is an explicit and important constitutional mandate under the Florida Constitution, any deviation from that goal of mathematical precision must be based upon compliance with other constitutional standards.”⁴⁹

The second tier-two requirement established by Section 21 of the Florida Constitution is compactness. The constitutional amendments adopted in Florida in 2010 state that districts “shall be compact.”⁵⁰

The Florida Supreme Court held that “compactness is a standard that refers to the shape of the district. The goal is to ensure that districts are logically drawn and that bizarrely shaped districts are avoided. Compactness can be evaluated both visually and by employing standard mathematical measurements.”⁵¹

Florida has historically used three scores to gauge compactness mathematically, all of which fall within a range of 0-1, where a score closer to one indicates a more compact district.⁵² The first score used is the Convex Hull score, which tests for concavities or indentations in district boundaries by calculating the ratio of the area of the district to the area of the minimum convex polygon that can enclose the district's geometry.⁵³ The second score used is the Polsby-Popper score, which tests for jagged or squiggly district boundaries by calculating the ratio of the area of the district to the area of a circle whose circumference is equal to the perimeter of the district. The third score used is the Reock score, which indicates a district's similarity to a circle by calculating the ratio of the area of the district to the area of the smallest circle that can be drawn around the district.⁵⁴

The Court also held that “Since compactness is set forth in section 21(b), the criteria of section 21(a) must predominate to the extent that they conflict with drawing a district that is compact. However, if a district can be drawn more compactly while utilizing political and geographical boundaries and without intentionally favoring a political party or incumbent, compactness must be a yardstick by which to evaluate those other factors.”⁵⁵

The final tier-two standard established by the Florida Constitution is that districts shall, “where feasible, utilize existing political and geographical boundaries.”⁵⁶ The Florida Supreme court has defined geographic boundaries as features that are “easily ascertainable and commonly understood” such as “rivers, railways, interstates, and state roads.”⁵⁷ Moreover, political boundaries primarily consist of county and municipal boundaries.⁵⁸

The boundaries of Florida's municipalities are not static. Between January 1, 2010 and December 31, 2019, 200 cities annexed or deannexed parcels, changing their boundaries 3,552 times.⁵⁹ Additionally, while Florida Statutes⁶⁰ permit municipalities to annex contiguous and compact unincorporated territory, many of Florida's cities are not contiguous, neither visually nor mathematically compact, and contain holes or enclaves.⁶¹ Of Florida's 412 cities, 136 are discontinuous, and 170 have holes or enclaves.⁶²

⁵² See Florida Senate Committee on Reapportionment, *Compactness* (October, 2021) , available at:https://www.flsenate.gov/Committees/Show/RE/MeetingPacket/5264/9438_MeetingPacket_5264_3.pdf.

Unlike other objective tier-two standards in the Florida Constitution, there is no widely accepted measurement for compliance with the requirement to, where feasible, utilize existing political and geographic boundaries.⁶³

Simply counting the cities or counties kept whole, meaning they have either all geographic territory or all population in a single district⁶⁴, fails to account for the degree of usage of existing county or municipal boundaries. It also disregards the co-equal constitutional mandate to, where feasible, use political and geographical boundaries.⁶⁵

Professional staff of the Florida House of Representatives and the Florida Senate worked to develop a set of quantitative metrics that measure the coincidence of a district's border with easily ascertainable and commonly understood political and geographic features, and make it publicly available to all users in the redistricting application. This Boundary Analysis independently measures the extent to which district boundaries overlap city boundaries, county boundaries, primary and secondary roads (interstates, U.S. highways, and State highways), railroads, and significant water bodies (contiguous area hydrography features greater than 10 acres) as defined by the U.S. Census Bureau's TIGER/Line files. Districts' coincidence with these existing political and geographic boundaries is independently calculated and presented along with the extent to which district boundaries do not follow any of the specified features.

In this way, users are presented with a Boundary Analysis that shows the degree of utilization for each type of existing political or geographic boundary as specified by the Florida Constitution and interpreted by the Florida Supreme Court. To facilitate the utilization of existing political and geographic boundaries, each of the feature layers used in the computation of the Boundary Analysis is provided in the map-drawing application.

Judicial Review of State Legislative Districts

During the regular session of the Legislature in the second year following the decennial census, the Legislature is required to adopt a joint resolution that apportions the state into State Senate and State House districts. The Legislature is directed to apportion the state into no fewer than 30, nor more than 40 State Senate districts, and into no fewer than 80, nor more than 120 State House districts. Because the Legislature adopts a joint resolution, rather than passing a general bill, the measure does not require the Governor's approval, nor is it subject to a veto.⁶⁶

The state constitution prescribes a mandated review process for state legislative redistricting plans by the Florida Supreme Court.⁶⁷ During a constitutionally mandated review, the Florida Supreme Court determines if the newly created State Senate and State House districts are valid. When the Florida Supreme Court enters a judgment that the plan is valid, the plan becomes binding upon all citizens of the state.⁶⁸

If the Legislature Adopts a Joint Resolution of Apportionment during Regular Session

Within fifteen days after the Legislature passes a joint resolution to apportion state legislative districts, the Attorney General must petition the Florida Supreme Court for a declaratory judgment that determines the validity of the apportionment.⁶⁹ The Court must allow adversary interests to present their views challenging the validity of the apportionment,⁷⁰ and must enter its judgment within thirty days after the Attorney General submits the petition.

If the Court finds the apportionment valid, the Court's judgment is binding on all citizens of the state.⁷¹

If the Court finds the apportionment invalid, the Governor must reconvene the Legislature, by proclamation, within 5 days, in an extraordinary apportionment session that may not exceed fifteen days.⁷² The Legislature must then adopt a joint resolution of apportionment that conforms to the Court's judgment.⁷³

If the Legislature adopts a joint resolution during the extraordinary apportionment session, the Attorney General must petition the Court and provide the apportionment resolution within fifteen days after adjournment of the session. The Court must then consider the validity of the resolution as though adopted at a regular or special apportionment session.⁷⁴ Again, the Court must allow adversary interests to present their views and render its judgment within thirty days after the Attorney General submits the petition.⁷⁵ If the Legislature did not adopt a joint resolution during the extraordinary apportionment session, the Attorney General must so inform the Court.⁷⁶

If the Legislature did not adopt an apportionment resolution during an extraordinary apportionment session, or if the Court declares an apportionment resolution adopted during an extraordinary apportionment session invalid, the Court must, within sixty days after receiving the Attorney General's petition, file an order with the custodian of state records making an apportionment.⁷⁷

If the Legislature does not Adopt a Joint Resolution of Apportionment during Regular Session

If the regular session of the Legislature in the second year following the decennial census is adjourned without adoption of a joint resolution apportioning the state into the necessary legislative districts, the Governor must, within thirty days, issue a proclamation reconvening the Legislature in a special apportionment session.⁷⁸ That session may not exceed thirty consecutive

III. Effect of Proposed Changes:

Consistent with the United States (U.S.) Constitution, Federal Voting Rights Act, Florida Constitution, and applicable court decisions, the Joint Resolution apportions the state into 40 single-member State Senate districts and 120 single-member State House districts.

Section 1 of the Joint Resolution provides definitions regarding Census geography and the electronic versions of districts. Additionally, it designates the United States Decennial Census of 2020 as the official census of the state for the purposes of legislative redistricting as provided by Art. X of the Florida Constitution.

Section 2 of the Joint Resolution describes the state's 120 State House districts using Census geography.

Section 3 of the Joint Resolution describes the state's 40 State Senate districts using Census geography.

Section 4 of the Joint Resolution designates the process for territory not specified for inclusion in any district.

Section 5 of the Joint Resolution designates the process for assigned territory that is noncontiguous.

Section 6 of the Joint Resolution establishes the districts described in Sections 2 and 3 as the official State House and State Senate districts of the state.

Section 7 of the Joint Resolution designates electronic maps as the authoritative representation of the state's legislative districts. Additionally, it establishes the Office of Economic and Demographic Research as the official custodian of electronic maps representing the legislative districts described in Sections 2 and 3.

Section 8 provides severability if any provision of the Joint Resolution is invalidated.

Section 9 of the Joint Resolution changes the applicable starting date for the qualification, nomination, and election of the new districts from 2012 to 2022.

Senate Joint Resolution

A joint resolution of apportionment; providing for the apportionment of the House of Representatives and the Senate (plans _____ and _____); adopting the United States Decennial Census of 2020 for use in such apportionment; defining terms; providing for the inclusion of omitted areas; providing contiguity for areas specified for inclusion in one district which are noncontiguous; specifying that the apportioned districts constitute the legislative districts of the state; specifying that electronic maps serve as the official maps of the legislative districts of the state; providing for the public availability of electronic maps; providing for severability of invalid portions; providing for application beginning in 2022.

Be It Resolved by the Legislature of the State of Florida:

Section 1. Official census for apportionment; definitions.-

(1) In accordance with Section 8(a), Article X of the State Constitution, the United States Decennial Census of 2020 is the official census of the state for the purposes of this joint resolution.

(2) The following delineation of representative and senatorial districts employs areas included within official county, tract, block group, and block boundary descriptions used by the United States Department of Commerce, Bureau of the Census, in compiling the United States Decennial Census of 2020 in this state. The populations within these census geographic

units are the population figures reported in the counts of the United States Decennial Census of 2020 provided to the state in accordance with Pub. L. No. 94-171.

(3) As used in this joint resolution, the term:

(a) "Block" describes the smallest geographic unit for which population was tabulated in the 2020 decennial census. Blocks are nested within tracts and within block groups. A block is identified by a three-character number that is unique within a block group.

(b) "Block equivalency file" describes a list of all blocks within the state and the representative or senatorial district number designated for each block. Blocks are listed by a 15-character number that combines the five-character county-level Federal Information Processing System (FIPS) code, the six-character tract number with leading zeros and an implied decimal, the single-character block group number, and the three-character block number.

(c) "Block group" describes a cluster of blocks within the same census tract. Block groups are nested within tracts, and are uniquely identified by a single character number with a valid range of 0 through 9.

(d) "County" describes a legal governmental subdivision of the state. Boundaries of counties described in this joint resolution reflect those boundaries in effect as of January 1, 2020.

(e) "Geographical information systems map" describes an electronic map that represents the boundaries of representative and senatorial districts in a commonly accepted and readable format.

27-01186A-22

59 (f) "Tract" describes a relatively permanent statistical
 60 subdivision of a county. Tracts are nested within counties, and
 61 are uniquely identified by an up to four-character number and a
 62 two-digit suffix identified by a decimal.

63 Section 2. Representative districts.—For the election of
 64 members to the House of Representatives of this state, the state
 65 is apportioned into 120 consecutively numbered, single-member,
 66 representative districts of contiguous territory, to be
 67 designated by such numbers as follows:

68
 69 Section 3. Senatorial districts.—For the election of
 70 members to the Senate of this state, the state is apportioned
 71 into 40 consecutively numbered, single-member senatorial
 72 districts of contiguous territory, to be designated by such
 73 numbers as follows:

74
 75 Section 4. Territory not specified for inclusion in any
 76 district.—Any portion of the state which is not stated in this
 77 joint resolution as being included in any district described in
 78 this joint resolution but which is entirely surrounded by a
 79 district shall be deemed to be included within the surrounding
 80 district. Any portion of the state which is not included in any
 81 district described in this joint resolution and which is not
 82 entirely surrounded by a district shall be included within that
 83 district contiguous to the portion that contains the least
 84 population per legislator according to the United States
 85 Decennial Census of 2020; however, if every district contiguous
 86 to such portion has an equal population, such portion shall be
 87 included within the lowest-numbered district that is contiguous

88 to such portion.

89 Section 5. Territory specified for inclusion in one
 90 district which is noncontiguous.—If any district described in
 91 this joint resolution is composed of noncontiguous territory,
 92 the noncontiguous portion that has the least population shall be
 93 included in the district that is contiguous to such portion and
 94 that has the least population; however, if every district
 95 contiguous to such portion has an equal population, such portion
 96 shall be included within the lowest-numbered district that is
 97 contiguous to such portion.

98 Section 6. Districts to constitute representative and
 99 senatorial districts of state.—The districts created by this
 100 joint resolution constitute and form the representative and
 101 senatorial districts of the state, and members of the
 102 Legislature shall be elected in and for these representative and
 103 senatorial districts as provided by law.

104 Section 7. Electronic maps to serve as the official maps of
 105 representative and senatorial districts; availability.—

106 (1) Geographical information systems maps and block
 107 equivalency files representing the boundaries of representative
 108 and senatorial districts described in this joint resolution
 109 shall serve as the official maps of the representative and
 110 senatorial districts of the state. In the event of any conflict
 111 between the descriptions of districts set forth in this joint
 112 resolution, geographical information systems maps, or block
 113 equivalency files, the descriptions in the block equivalency
 114 files shall prevail.

115 (2) Within 10 days of a judgment of the Florida Supreme
 116 Court determining the apportionment provided for in this joint

117 resolution to be valid, the geographical information systems
118 maps and block equivalency files representing the boundaries of
119 the representative and senatorial districts described in this
120 joint resolution shall be made available to the public by the
121 Office of Economic and Demographic Research.

122 Section 8. Severability.—If any provision of this joint
123 resolution or the application thereof to any person or
124 circumstance is held invalid, or if any representative or
125 senatorial district established in this joint resolution is held
126 invalid, the invalidity does not affect other provisions or
127 applications of this joint resolution, or any other districts
128 established in this joint resolution, which can be given effect
129 without the invalid provision or application, and to this end
130 the provisions of this joint resolution are severable.

131 Section 9. Applicability.—This joint resolution applies
132 with respect to the qualification, nomination, and election of
133 members of the Legislature in the primary and general elections
134 held in 2022 and thereafter.

Cards Used to Determine Staggered Elections

Senators shall be elected for terms of four years, those from odd-numbered districts in the years the numbers of which are multiples of four and those from even-numbered districts in even-numbered years the numbers of which are not multiples of four; except, at the election next following a reapportionment, some senators shall be elected for terms of two years when necessary to maintain staggered terms. – Article III, Section 15 (a), Florida Constitution

Production of Cards

40 cards were created by Senate Professional Staff using Adobe Creative Cloud Express Software. The cards were laid out to standard business card size of 3.5 x 2 inches. The first card produced was the even card. The file was then duplicated and then edited to odd, using the same fonts, colors and layout. The finished files were exported to .JPGs for printing. The .JPG files were centered on a standard digital letter size paper format for printing. The cards were printed with one per sheet of paper. All 40 cards were printed in the same run with the same paper on the same machine, and were then cut using a digital aligned laser guided precision cutter to ensure each card is exactly the same size. The cards fit #3 manila, gummed seal, coin envelopes. Manila was used in to fully conceal the contents of each envelope.

Resources Utilized in Production

Printer: Ricoh - Pro C7210s

Paper: COUGAR DIGITAL – 8.5X11; Grain Long; Smooth; Cover; 80#; White

Cutter: CE – Model: E490R; SN: 810612172224; Year of Manufacture: 21.06

Envelope: JAM Paper Coin Envelopes, #3, Gummed Seal, Manila

Software: Adobe Creative Cloud Express

Attestation of Inspection

I inspected 40 cards. Each card is the same size and weight. There are 20 even district cards and 20 odd district cards.

I inspected each envelope. There are no distinguishing features on any envelope.

I placed one card in each envelope. No card is visible in any way from the outside of any envelope.

I placed 40 envelopes in a glass container with a lid. By manually mixing the cards before and after placing them in the container, I ensured there was no possibility of an intentional pattern with which the cards were laid in the container.

I presented the closed container to Chair Rodrigues. The jar was in my custody and control and no other person had access to the jar between the time I inspected the cards and presented the closed container to Chair Rodrigues.

By submitting this form, I acknowledge and agree to the following terms and conditions:

YES, I understand that my comments, suggestions, or map submission may be displayed on www.FloridaRedistricting.gov or other public websites maintained by the Florida Legislature.

YES, I understand that my communications with the Florida Legislature, including this form and any submitted materials, are subject to public records laws in Florida.

YES, I understand that I may be contacted by a member of the legislature or their staff to answer questions about my comments, suggestions, or map submission.

YES, I understand that similar to other pieces of legislation, input and ideas from members of the public must be proposed by Legislators in order to become part of bills or amendments.

The Florida Legislature acknowledges the importance of transparency throughout the entire redistricting process. By engaging in the redistricting process – through comments, suggestions, or map submissions – it is possible your detailed communications and submissions may be included, reviewed, and examined in all steps of the legislative process until, and even after, new district maps are enacted into law.

COMMITTEE SUBSTITUTE - Substantial Changes

I. Summary:

CS/SJR 100 apportions Florida into 40 single-member State Senate districts as required by state and federal law. Representative districts may be added subsequently.

As originally filed, this bill was the vehicle for amendments in order to establish a complete State Senate and State House redistricting map. As amended, this bill contains Redistricting Plan S027S8058, a map of Florida’s state Senate districts.

II. Present Situation:

The 2020 Census revealed an unequal distribution of population growth across Florida’s state legislative districts. Therefore, districts must be adjusted to comply with the “one person, one vote” principle such that each district must be substantially equal in total population.¹

According to the 2020 Census, 21,538,187 people resided in Florida as of April 1, 2020. That represents a population growth of 2,736,877 people from 2010 to 2020, approximately a 15 percent increase.²

Table 1 below shows the changes in population for each of Florida’s current congressional and state legislative districts and their respective ideal populations.

¹ See *Reynolds v. Sims*, 377 U.S. 533, 568 (1964).

² United States Census Bureau, *2020 Census Apportionment Results* (April, 26, 2021), <https://www.census.gov/data/tables/2020/dec/2020-apportionment-data.html>.

Table 1. Florida Congressional and State Legislative Districts Summary 2010 – 2020

Florida Fast Facts	2010	2020	Difference
Statewide Population	18,801,310	21,538,187	+2,736,877
Number of Congressional Seats	27	28	+1 seat
Congressional District Ideal Population	696,345	769,221	+72,876
Florida House of Representatives District Ideal Population <i>(based on 120 seats)</i>	156,678	179,485	+22,807
Florida Senate District Ideal Population <i>(based on 40 seats)</i>	470,033	538,455	+68,422

According to the 2020 Census, the State Senate district with the largest population has 713,947 people (175,492 more than the ideal), and the State Senate district with the smallest population has 486,331 people (52,124 less than ideal). The State House district with the largest population has 237,134 people (57,689 more than the ideal), and the State House district with the smallest population has 153,589 people (25,896 less than the ideal).

Background

The terms “redistricting” and “reapportionment” are often used interchangeably to describe the process of redrawing Congressional and state legislative district boundaries after each decennial census. Redrawing districts is necessary to accommodate population growth and shifts, ensuring that each district contains equal or nearly equal populations in compliance with applicable state and federal law.

The Florida Constitution requires the Legislature to apportion the state at its regular session in the second year following each decennial census into not less 30 nor more than 40 State Senate districts and into not less than 80 nor more than 120 State House districts.³

The 2020 Census

Established by the U.S. Constitution, the census has been conducted every 10 years by the United States Census Bureau since 1790 to determine the number of people living in the United States. Article I, s. 2 of the U.S. Constitution states that “The actual enumeration shall be made within three years after the first meeting of the Congress of the United States, and within every subsequent term of ten years, in such manner as they shall by law direct.”⁴

³ Art. III, s. 16(a), Fla. Const.

⁴ Art. I, s. 2, U.S. Const.

Florida is one of 21 states that explicitly requires the use of census data for redistricting.⁵ Article X, s. 8 of the Florida Constitution designates each decennial census of the state taken by the United States as the official census of the state.⁶ Florida Statutes also designate the most recent federally conducted decennial census as the official census for redistricting.⁷

Public Law (P.L.) 94-171 requires the Census Bureau to provide states the opportunity to identify the small area geography for which data is needed to conduct legislative and congressional redistricting. The law also requires the U.S. Census Bureau to furnish these tabulations of population to each state, at the county, tract, block group, and block levels, within one year of Census Day.⁸

Title 13, U.S. Code requires that the state-level apportionment population counts be delivered to the President of the United States within 9 months of the census date. In the 2020, 2010, and most 20th century censuses, the census date has been April 1, meaning that the statutory deadline for delivering the counts to the President is December 31 of the census year.⁹

The delivery of 2020 Census results was delayed due to several factors affecting the Census Bureau's collection and processing, including the COVID-19 pandemic, natural disasters that included hurricanes and wildfires, civil unrest, and legal challenges.¹⁰

The state population counts for apportionment were delivered to the President on April 26, 2021 (originally due December 31, 2020). The U.S. Census Bureau provided redistricting data as legacy format summary files, which is tabular data, for all states on August 12, 2021 (originally due April 1, 2021). The full redistricting data toolkit was delivered to all 50 states and the public on September 16, 2021 (originally due April 1, 2021).

Redistricting Criteria and Concepts

Florida follows various criteria and standards as it relates to drawing state legislative districts, including the United States (U.S.) Constitution, Federal Voting Rights Act, Florida Constitution, and applicable court decisions.

The United States Constitution

In addition to state specific requirements to redistrict, states are obligated to redistrict based on provisions within the United States Constitution. In *Reynolds v. Sims*, the United States Supreme Court held that the Fourteenth Amendment required that seats in state legislature be reapportioned on a population basis. This principle is commonly referred to as "one person, one vote." The Supreme Court concluded:

...“the basic principle of representative government remains, and must remain, unchanged – the weight of a citizen’s vote cannot be made to depend on where he lives. Population is, of necessity, the starting point for consideration and the controlling criterion for judgment in legislative apportionment controversies...The Equal Protection Clause demands no less than substantially equal state legislative representation for all citizens, of all places as well as of all races. We hold that, as a basic constitutional standard, the Equal Protection Clause requires that the seats in both houses of a bicameral state legislature must be apportioned on a population basis.”¹¹

The Court went on to state that decennial reapportionment was a rational approach to readjust legislative representation to take into consideration population shifts and growth.¹²

In practice, Congressional districting has strictly adhered to the requirement of exact mathematical equality and in *Kirkpatrick v. Preisler*, the Court rejected several justifications for violating this principle. For state legislative districts, the courts have permitted a greater population deviation amongst districts. The populations of state legislative districts must instead be “substantially equal.”¹³

Substantial equality of population has come to generally mean that a legislative plan will not be held to violate the Equal Protection Clause if the difference between the smallest and largest district is less than ten percent.¹⁴ Nevertheless, any significant deviation (even within the 10 percent overall deviation margin) must be “based on legitimate considerations incident to the effectuation of a rational state policy,”¹⁵ including “the integrity of political subdivisions, the maintenance of compactness and contiguity in legislative districts, or the recognition of natural or historical boundary lines.”¹⁶

The Fourteenth Amendment has also been interpreted to prohibit racial predominance.¹⁷ The U.S. Supreme Court has stated: “The equal protection clause prohibits a state, without sufficient justification, from separating its citizens into different voting districts on the basis of race.” A redistricting plan “that expressly distinguishes among citizens because of their race [must] be narrowly tailored to further a compelling government interest.” Such strict scrutiny review applies not only to redistricting plans that expressly distinguish citizens because of race, but also those plans “that, although race neutral, are, on their face unexplainable on grounds other than race.”¹⁸

The Federal Voting Rights Act

The Federal Voting Rights Act (VRA) prohibits any state or political subdivision from enacting a map that results in the denial or abridgement of any U.S. citizen’s right to vote on account of race, color, or status as a member of a language minority group and purposeful discrimination.¹⁹ The VRA also protects against retrogression—or backsliding—in the ability of racial and language minorities to elect representatives of their choice.²⁰

Section 2 of the VRA requires the creation of a district that performs for racial and language minorities where a minority population is geographically compact and sufficiently numerous to be a majority in a single-member district, the minority population is politically cohesive, the majority votes sufficiently as a bloc to enable it usually to defeat the minority-preferred candidate, and under all of the circumstances, the minority population has less opportunity than others to participate in the political process and elect representatives of its choice.²¹

Section 5 of the VRA prohibits purposeful discrimination and protects against retrogression—or backsliding—in the ability of racial and language minorities to elect representatives of their choice.²² Section 5 contains a coverage formula that was applied to “covered jurisdictions” to determine if there was a history of discrimination against racial or language minorities.²³ Such jurisdictions had to be “precleared” before any of the changes could take effect, meaning that any substantial changes made to voting laws, including redistricting plans, in these “covered jurisdictions” could not be implemented without first obtaining federal permission.²⁴ In Florida, Collier, Hardee, Hendry, Hillsborough, and Monroe counties were subject to Department of Justice preclearance in regards to redistricting until the coverage formula was invalidated in 2013 in *Shelby County v. Holder*.²⁵ However, as *Apportionment I* states, “Florida’s new constitutional provision, codified the non-retrogression principle of Section 5 (VRA) and has now extended it statewide. In other words, Florida now has a statewide non-retrogression requirement independent of Section 5.”²⁶

The Florida Constitution

Article III, s. 16(a) of the Florida Constitution requires that “the legislature at its regular session in the second year following each decennial census,” apportion the state by joint resolution “in accordance with the constitution of the state and the United States into not less than thirty nor more than forty consecutively numbered senatorial districts of either contiguous, overlapping or identical territory, and into not less than eighty nor more than one hundred twenty consecutively numbered representative districts of either contiguous, overlapping or identical territory.”²⁷ Once

the joint resolution is adopted, the state legislative plans are then subject to review by the Florida Supreme Court determining the validity of the apportionment.²⁸

A district is contiguous if no part of the district is isolated from the rest of the district by another district.²⁹ In a contiguous district, a person can travel from any point within the district to any other point without departing from the district.³⁰ A district is not contiguous if its parts touch only at a common corner, such as a right angle.³¹ The Florida Supreme Court has also held that the presence in a district of a body of water without a connecting bridge, even if it requires land travel outside the district in order to reach other parts of the district, does not violate contiguity.³²

Districts must be consecutively numbered, but it is not necessary that adjacent districts receive consecutive numbers.³³ For example, districts in a 40-district redistricting plan may be numbered from 1 to 40, but District 1 and District 2 need not be adjacent to one another.³⁴

Ordinarily, senators are elected to four-year terms.³⁵ The terms are staggered with elections for odd-numbered districts held in years the number of which are multiples of four, and even-numbered districts in years the number of which is an even number not divisible by four.³⁶ At the general election that follows the decennial reapportionment, terms that are not scheduled naturally to expire will be truncated, and all seats in the Senate will be subject to election in the new districts.³⁷ The Florida Supreme Court has recognized a narrow exception to the rule that requires the terms of senators to be truncated at the general election following redistricting. If the term of a senator is not scheduled naturally to expire at the general election, and the redistricting plan does not alter the boundaries of the district, the senator would continue to serve the remainder of the term until its natural expiration.³⁸ To preserve staggered terms in a decennial reapportionment, voters will, at the 2022 General Election, elect candidates to two-year terms in Senate districts designated by odd numbers, while voters in Senate districts designated by even numbers will elect candidates to four-year terms.³⁹

In 2010, voters amended the Florida Constitution to create additional standards for establishing state legislative district boundaries.⁴⁰ The standards are set forth in two tiers.

Tier – One Standards

Article III, s. 21(a) of the Florida Constitution prohibits line-drawing that intentionally favors or disfavors a political party or an incumbent. It also affords protection to racial and language minorities. Districts may not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process; or to diminish their ability to elect representatives of their choice. Finally it reiterates that districts must be contiguous. The order in which the tier-one standards are set out in the Constitution does not establish any priority among those standards within the tier.⁴¹

The tier-one standards provide that “[n]o apportionment plan or district shall be drawn with the intent to favor or disfavor a political party or an incumbent.”⁴² The Florida Supreme Court has held that Florida’s constitutional provision “prohibits intent, not effect” because “any redrawing of lines, regardless of intent, will inevitably have an effect on the political composition of a district and likely whether a political party or incumbent is advantaged or disadvantaged.”⁴³ Nonetheless, there is no acceptable level of improper intent.⁴⁴

The tier-one standards also provide protections for racial and language minorities. Districts may “not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process”; or to “diminish their ability to elect representatives of their choice.”⁴⁵

The Court has interpreted the tier-one constitutional provisions that relate to racial or language minorities’ ability to participate in the political process or elect a candidate of their choice to mean that “the Legislature cannot eliminate majority-minority districts or weaken other historically performing minority districts where doing so would actually diminish a minority group’s ability to elect its preferred candidates...in addition to majority-minority districts, coalition or crossover districts that previously provided minority groups with the ability to elect a preferred candidate under the benchmark plan must also be recognized.”⁴⁶

The Court went on to say, “that under Florida’s provision, a slight change in percentage of the minority group’s population in a given district does not necessarily have a cognizable effect on a minority group’s ability to elect its preferred candidate of choice. This is because a minority group’s ability to elect a candidate of choice depends upon more than just population figures.”⁴⁷ In order to draw districts that comply with the tier-one standards, a functional analysis is required to be performed.

A “functional analysis,” as it has been termed, is an inquiry into a racial or language minority group’s ability to elect a candidate of choice that requires “consideration not only of the minority population in the districts, or even the minority voting-age population in those districts, but of

The last tier-one standard requires that all districts “consist of contiguous territory”. The premise is similar to that in Article III, s. 16 of the Florida Constitution.

Tier – Two Standards

The tier-two standards of the Florida Constitution encompass what are often called “traditional redistricting criteria,” but make it clear these standards are subordinated to the tier-one standards. Article III, s. 21(b) states that unless compliance with these standards conflicts with tier-one standards or with federal law, districts shall be as nearly equal in population as practicable, districts shall be compact, and districts shall, where feasible, utilize existing political and geographical boundaries.⁵⁰ As with tier-one, the order in which the tier-two standards are set out in the Constitution does not establish any priority among those standards within the tier.⁵¹

The first tier-two standard set forth by the Florida Constitution states that districts shall be as nearly equal in population as is practicable. As interpreted by the United States Supreme Court, the Equal Protection Clause of the Fourteenth Amendment mandates that “state legislatures be apportioned in such a way that each person's vote carries the same weight—that is, each legislator represents the same number of voters.”⁵²

⁵¹ Art. III, s. 21(c), Fla. Const.

⁵² In re Senate Joint Resolution of Legislative Apportionment 1176, 83 So.3d 597 (2012).

The courts have allowed reasonable deviations for mathematical equality for state legislative districts to accommodate traditional redistricting objectives, such as compactness, contiguity and respect to the boundaries of political subdivisions.⁵³ In *Apportionment I*, the court stated that “Because obtaining equal population “if practicable” is an explicit and important constitutional mandate under the Florida Constitution, any deviation from that goal of mathematical precision must be based upon compliance with other constitutional standards.”⁵⁴

The second tier-two requirement established by Section 21 of the Florida Constitution is compactness. The constitutional amendments adopted in Florida in 2010 state that districts “shall be compact.”⁵⁵

The Florida Supreme Court held that “compactness is a standard that refers to the shape of the district. The goal is to ensure that districts are logically drawn and that bizarrely shaped districts are avoided. Compactness can be evaluated both visually and by employing standard mathematical measurements.”⁵⁶

Florida has historically used three scores to gauge compactness mathematically, all of which fall within a range of 0-1, where a score closer to one indicates a more compact district.⁵⁷ The first score used is the Convex Hull score, which tests for concavities or indentations in district boundaries by calculating the ratio of the area of the district to the area of the minimum convex polygon that can enclose the district’s geometry.⁵⁸ The second score used is the Polsby-Popper score, which tests for jagged or squiggly district boundaries by calculating the ratio of the area of the district to the area of a circle whose circumference is equal to the perimeter of the district. The third score used is the Reock score, which indicates a district’s similarity to a circle by calculating the ratio of the area of the district to the area of the smallest circle that can be drawn around the district.⁵⁹

The Court also held that “Since compactness is set forth in section 21(b), the criteria of section 21(a) must predominate to the extent that they conflict with drawing a district that is compact. However, if a district can be drawn more compactly while utilizing political and geographical boundaries and without intentionally favoring a political party or incumbent, compactness must be a yardstick by which to evaluate those other factors.”⁶⁰

The final tier-two standard established by the Florida Constitution is that districts shall, “where feasible, utilize existing political and geographical boundaries.”⁶¹ The Florida Supreme court has defined geographic boundaries as features that are “easily ascertainable and commonly

understood” such as “rivers, railways, interstates, and state roads.”⁶² Moreover, political boundaries primarily consist of county and municipal boundaries.⁶³

The boundaries of Florida’s municipalities are not static. Between January 1, 2010 and December 31, 2019, 200 cities annexed or deannexed parcels, changing their boundaries 3,552 times.⁶⁴ Additionally, while Florida Statutes⁶⁵ permit municipalities to annex contiguous and compact unincorporated territory, many of Florida’s cities are not contiguous, neither visually nor mathematically compact, and contain holes or enclaves.⁶⁶ Of Florida’s 412 cities, 136 are discontiguous, and 170 have holes or enclaves.⁶⁷

Unlike other objective tier-two standards in the Florida Constitution, there is no widely accepted measurement for compliance with the requirement to, where feasible, utilize existing political and geographic boundaries.⁶⁸

Simply counting the cities or counties kept whole, meaning they have either all geographic territory or all population in a single district⁶⁹, fails to account for the degree of usage of existing county or municipal boundaries. It also disregards the co-equal constitutional mandate to, where feasible, use political and geographical boundaries.⁷⁰

Professional staff of the Florida House of Representatives and the Florida Senate worked to develop a set of quantitative metrics that measure the coincidence of a district’s border with easily ascertainable and commonly understood political and geographic features, and make it publicly available to all users in the redistricting application. This Boundary Analysis independently measures the extent to which district boundaries overlap city boundaries, county boundaries, primary and secondary roads (interstates, U.S. highways, and State highways), railroads, and significant water bodies (contiguous area hydrography features greater than 10 acres) as defined by the U.S. Census Bureau’s TIGER/Line files. Districts’ coincidence with these existing political and geographic boundaries is independently calculated and presented along with the extent to which district boundaries do not follow any of the specified features.

In this way, users are presented with a Boundary Analysis that shows the degree of utilization for each type of existing political or geographic boundary as specified by the Florida Constitution and interpreted by the Florida Supreme Court. To facilitate the utilization of existing political

Judicial Review of State Legislative Districts

During the regular session of the Legislature in the second year following the decennial census, the Legislature is required to adopt a joint resolution that apportions the state into State Senate and State House districts. The Legislature is directed to apportion the state into no fewer than 30, nor more than 40 State Senate districts, and into no fewer than 80, nor more than 120 State House districts. Because the Legislature adopts a joint resolution, rather than passing a general bill, the measure does not require the Governor's approval, nor is it subject to a veto.⁷¹

The state constitution prescribes a mandated review process for state legislative redistricting plans by the Florida Supreme Court.⁷² During a constitutionally mandated review, the Florida Supreme Court determines if the newly created State Senate and State House districts are valid. When the Florida Supreme Court enters a judgment that the plan is valid, the plan becomes binding upon all citizens of the state.⁷³

If the Legislature Adopts a Joint Resolution of Apportionment during Regular Session

Within fifteen days after the Legislature passes a joint resolution to apportion state legislative districts, the Attorney General must petition the Florida Supreme Court for a declaratory judgment that determines the validity of the apportionment.⁷⁴ The Court must allow adversary interests to present their views challenging the validity of the apportionment,⁷⁵ and must enter its judgment within thirty days after the Attorney General submits the petition.

If the Court finds the apportionment valid, the Court's judgment is binding on all citizens of the state.⁷⁶

If the Court finds the apportionment invalid, the Governor must reconvene the Legislature, by proclamation, within 5 days, in an extraordinary apportionment session that may not exceed fifteen days.⁷⁷ The Legislature must then adopt a joint resolution of apportionment that conforms to the Court's judgment.⁷⁸

If the Legislature adopts a joint resolution during the extraordinary apportionment session, the Attorney General must petition the Court and provide the apportionment resolution within fifteen days after adjournment of the session. The Court must then consider the validity of the resolution as though adopted at a regular or special apportionment session.⁷⁹ Again, the Court must allow adversary interests to present their views and render its judgment within thirty days after the

If the Legislature did not adopt an apportionment resolution during an extraordinary apportionment session, or if the Court declares an apportionment resolution adopted during an extraordinary apportionment session invalid, the Court must, within sixty days after receiving the Attorney General's petition, file an order with the custodian of state records making an apportionment.⁸²

If the Legislature does not Adopt a Joint Resolution of Apportionment during Regular Session

If the regular session of the Legislature in the second year following the decennial census is adjourned without adoption of a joint resolution apportioning the state into the necessary legislative districts, the Governor must, within thirty days, issue a proclamation reconvening the Legislature in a special apportionment session.⁸³ That session may not exceed thirty consecutive days and no other business may be transacted.⁸⁴ The state constitution specifies that, “[i]t is the Legislature’s mandatory duty to adopt a joint resolution of apportionment during that session.”⁸⁵

If the Legislature adjourns the special apportionment session without adopting a joint resolution of apportionment, the Attorney General must, within five days, petition the Court to make the apportionment.⁸⁶ Within sixty days after the Attorney General files the petition, the Court must file an order with the state custodian of records making the apportionment.⁸⁷

III. Effect of Proposed Changes:

Consistent with the United States (U.S.) Constitution, Federal Voting Rights Act, Florida Constitution, and applicable court decisions, the Joint Resolution apportions the state into 40 single-member State Senate districts and 120 single-member State House districts.

Section 1 of the Joint Resolution provides definitions regarding Census geography and the electronic versions of districts. Additionally, it designates the United States Decennial Census of 2020 as the official census of the state for the purposes of legislative redistricting as provided by Art. X of the Florida Constitution.

Section 2 of the Joint Resolution describes the state's 120 State House districts using Census geography.

Section 3 of the Joint Resolution describes the state's 40 State Senate districts using Census geography.

Section 4 of the Joint Resolution designates the process for territory not specified for inclusion in any district.

Section 5 of the Joint Resolution designates the process for assigned territory that is noncontiguous.

Section 6 of the Joint Resolution establishes the districts described in Sections 2 and 3 as the official State House and State Senate districts of the state.

Section 7 of the Joint Resolution designates electronic maps as the authoritative representation of the state's legislative districts. Additionally, it establishes the Office of Economic and Demographic Research as the official custodian of electronic maps representing the legislative districts described in Sections 2 and 3.

Section 8 provides severability if any provision of the Joint Resolution is invalidated.

Section 9 of the Joint Resolution changes the applicable starting date for the qualification, nomination, and election of the new districts from 2012 to 2022.

As adopted by the Senate Committee on Reapportionment, CS/SJR 100 apportions each district as first established in Senate Redistricting Plan S027S8056, but renumbers the districts using the results of a tactile and random process conducted during the meeting. The process established districts within the plan as “even-numbered” or “odd-numbered”. Beginning in the Panhandle of Florida, moving West to East and North to South, the districts were assigned numbers from 1 to 40 based upon the random assignment determination of whether the district is even or odd.

The joint resolution contains only senate districts. Representative districts may be added subsequently.

MEMORANDUM

TO: All Senators
FROM: Wilton Simpson
SUBJECT: Information Regarding Redistricting in 2022
DATE: November 20, 2020

During the 2022 Legislative Session, the Regular Session in the second year following the decennial census, the Legislature has the constitutional duty to redraw legislative and congressional district boundaries.ⁱ The Florida Supreme Court has said “legislative apportionment is primarily a matter for legislative consideration and determination,”ⁱⁱ and has indicated that it will “defer to the Legislature’s decision to draw a district in a certain way, so long as that decision does not violate the constitutional requirements.”ⁱⁱⁱ

The federal government is not expected to provide 2020 Census population counts needed for redistricting until late spring of next year. As such, while the Committee on Reapportionment will be established within the Senate’s Committee Structure, I do not intend to appoint Senators to the committee until we get closer to the time when we will have the data needed to begin the work of drawing new districts.

Senators should be aware that in prior cycles, significant litigation has followed passage of new maps. The Florida Supreme Court has limited the scope of legislative privilege when it comes to redistricting,^{iv} and sitting legislators have in some cases been required to produce records, sit for depositions, and testify in court proceedings. Moving forward, as with all matters before the Legislature, Senators should take care to insulate themselves from interests that may (intentionally or unintentionally) attempt to influence the redistricting process inappropriately.

I have asked our professional staff to continue to provide updates as information becomes available. In the meantime, if you have any questions please direct them to the Office of the Senate President. I look forward to working together to produce new legislative and congressional maps during this once-in-a-decade process.

MEMORANDUM

TO: All Senators
FROM: Wilton Simpson
SUBJECT: Committee Leadership Assignments
DATE: December 2, 2020

The day-to-day, year-round work that takes place within our Senate committees is a critical component of the legislative process. In my view, the tremendous responsibility to chair a Senate committee is the most significant and impactful leadership role Senators have during their tenure. With this in mind, over the last several weeks, I have been considering our committee structure, and which Senators I believe can best serve the Senate in various committee leadership positions.

I have attached a list of chair and vice chair assignments by committee. Moving forward, I have requested that the staff director assigned to each committee contact the chair and vice chair by the end of the week to begin the process of formulating a schedule for the upcoming interim committee weeks.

You will notice I have added a Select Committee on Pandemic Preparedness and Response. The select committee will review all facets of the state response to the ongoing pandemic, and identify, as necessary, areas where there may be a specific role for the Legislature to make improvements to benefit our state moving forward.

As mentioned in a prior communication, I do not intend to make appointments to the Committee on Reapportionment until we get a little closer to the timeframe when the bulk of the committee work in this subject area will occur. I will provide updates regarding that specific timeframe as they become available.

Finally, I am working to finalize the membership of each committee and look forward to completing those assignments in the coming days. Thank you for your patience, as I know we are all eager to continue on with the important work ahead.

MEMORANDUM

TO: All Senate and Senate Professional Staff
FROM: Wilton Simpson
SUBJECT: Apportionment Counts
DATE: April 26, 2021

This afternoon the Census Bureau released statewide population and apportionment counts. Florida's resident population has increased from 18,801,310 in 2010 to 21,538,187 according to the 2020 Census. This means that Florida will receive one additional congressional seat, for a total of 28, and the average number of people in each has increased to 769,221. The average number of people in each of the 120 state house districts has increased to 179,485, and the average number of people in each of the 40 state senate districts has increased to 538,455.

In January, the Census Bureau announced it would miss the April 1, 2021, statutorily scheduled release date for the full population and demographic data that contains the census block-level counts of population by race, ethnicity (Hispanic or Latino origin), and voting age that are needed to redraw legislative and congressional district boundaries in compliance with the Florida Constitution and the federal Voting Rights Act. The Census Bureau has since announced that it will provide block-level population and demographic data in August/September 2021.

The Florida Legislature is required to redraw legislative and congressional district boundaries using the block-level population and demographic data provided by the most recent decennial census¹ during the Regular Session of 2022². At this time, I believe we will be able to meet our Constitutional duty and complete our redistricting work before the conclusion of the 2022 Regular Session despite the delayed data release by the Census Bureau.

As I have previously communicated, I believe it is appropriate to wait to appoint Senators to the Committee on Reapportionment until the Legislature is ready to begin drawing districts. While we await the delivery of the census data, I again encourage all Senators to be aware that they may be compelled to produce records or be subject to questioning under oath about

¹ Section 11.031, F.S. establishes the statutory requirement that: "All acts of the Florida Legislature based upon population and all constitutional apportionments shall be based upon the last federal decennial statewide census."

conversations with parties who may attempt to persuade the Legislature to pass maps that favor or disfavor a political party or an incumbent. Additionally, Senators should continue to adhere to their usual and customary records retention policy as directed by Art. 1, s. 24 of the Florida Constitution, s. 11.0431, F.S., and Senate Rule 1.48.

I will continue to keep legislators and the public informed as we progress towards map-drawing in the 2022 Legislative Session.

If you have questions about record retention, I encourage you to contact the Senate General Counsel at (850) 487-5237.

MEMORANDUM

FROM: Wilton Simpson
SUBJECT: Committee Assignments
DATE: July 2, 2021

In anticipation of the upcoming redistricting process, and with the Select Committee on Pandemic Preparedness and Response having completed its work, I have made minor changes to committee assignments, which are attached for your reference.

Senator Rodrigues will serve as Chair of the Committee on Reapportionment. With the census data necessary to begin the map drawing process expected early this fall, I anticipate the Senate will begin holding committee meetings related to redistricting when interim committee meetings resume in Tallahassee this September. As such, I will move forward with additional appointments to the Senate Committee on Reapportionment later this summer.

Outstanding issues related to the COVID-19 Pandemic will be handled by the standing committees with relevant subject matter jurisdiction.

I wish you all a safe and happy weekend as we celebrate the independence of our great country.

MEMORANDUM

TO: All Senators
FROM: Wilton Simpson
SUBJECT: Reapportionment Information – Census Bureau Releases Redistricting Data
DATE: August 12, 2021

Today the U.S. Census Bureau released census data that is necessary for the map drawing process to take place during the 2022 Legislative Session.

As you may be aware, Senate staff have been planning for software and other infrastructure needed to draw maps and will be working to input the newly received census data. This effort includes coordination with the Florida House, at the staff level, to develop a joint website that will launch in the coming weeks. This is ultimately the site that will provide the public with information about opportunities for appropriate engagement and with access to the data and mapping application.

Constituent Inquiries

Given that redistricting occurs only once a decade, I understand Senators are fielding many questions from local civic groups and constituents who are interested in learning about the process. Our Senate staff is developing an informational presentation that Senators will be able to use to communicate with their constituents and at public events and speaking engagements. The presentation will include information about the history of reapportionment, the timeline and process, and opportunities for appropriate public participation. In the meantime, a draft constituent reply is attached for your reference and use in customizing a response to inquiries on the 2022 redistricting process.

Communications and Record Retention

All Senators should be aware that, in prior redistricting cycles, significant litigation has followed passage of new maps. The Florida Supreme Court has also limited the scope of legislative privilege when it comes to redistricting. Sitting legislators may be compelled to produce records or be subject to questioning under oath about conversations with colleagues, with legislative staff, or with outside parties who may attempt to persuade the Legislature to pass maps that favor or disfavor a political party or incumbent.

August 12, 2021

Page 2

As we move forward, Senators should take care to insulate themselves from interests that may intentionally or unintentionally attempt to inappropriately influence the redistricting process.

Senators should continue to adhere to the records retention policy as directed by Art. I, s. 24 of the Florida Constitution, s. 11.0431, F.S., and Senate Rule 1.48. Senators and staff should also be mindful that correspondence, emails, texts, and other electronic communications related to the enactment of new districts, whether sent or received on official Senate accounts or devices or personal email accounts or devices, may be of permanent or archival value and those records should be preserved accordingly.

If you have questions about record retention, I encourage you to contact the Senate General Counsel at (850) 487-5237.

As we move forward towards our interim committee weeks, I will continue to keep Senators and the public informed of any updates.

FROM: Wilton Simpson
SUBJECT: Reapportionment Information – Committee Assignments
DATE: September 3, 2021

With the census data necessary to begin the redistricting process now available, the Senate can begin holding committee meetings related to redistricting when interim committee meetings resume in Tallahassee later this month. As such, I am moving forward with appointments to the Senate Committee on Reapportionment.

Committee Leadership and Assignments

A full list of appointments to the Committee on Reapportionment and its Select Subcommittees is attached for your reference. As previously announced, Senator Rodrigues will serve as Chair of the Committee on Reapportionment. Additionally, I will divide the Committee into two Select Subcommittees. Senator Bradley will Chair the Select Subcommittee on Congressional Reapportionment. Senator Burgess will Chair the Select Subcommittee on Legislative Reapportionment.

Committee Structure and Process

Senate Rule 2.1 (4) authorizes the creation of Select Subcommittees to study or investigate a specific issue falling within the jurisdiction of the standing committee. The work of the select subcommittee is advisory, reported to the standing committee, and accepted, amended, or rejected by vote of the standing committee. It is my expectation that each select subcommittee will make one or more recommendations to the full committee, which would in turn make a recommendation for consideration on the Senate floor.

As mentioned previously, Senate staff have been planning for software and other infrastructure needed to draw maps and have been working to input the newly received census data. This effort includes coordination with the Florida House, at the staff level, to develop a joint website that will launch in the coming weeks. This is ultimately the site that will provide the public with information about opportunities for appropriate engagement and with access to the data and mapping application.

Senators and staff should also be mindful that correspondence, including electronic communications related to the enactment of new districts, whether sent or received on official Senate accounts or devices or personal email accounts or devices, may be of permanent or archival value and those records should be preserved accordingly.

As we move forward towards our interim committee weeks, I recognize that Senators, staff and members of the public have questions about COVID-19 protocols. At this point, I anticipate the Senate will remain open to visitors during our interim committee weeks. As always, Senators and staff can decide whether or not to schedule in-person meetings in their individual offices. In consultation with our infectious disease consultants at Tampa General, I will continue to monitor the evolving status of the pandemic and will not hesitate to implement enhanced protocols if necessary. I will continue to keep Senators and the public informed of any updates.

MEMORANDUM

To: All Senators
From: Ray Rodrigues
Subject: Launch of the Joint Redistricting Website
Date: September 22, 2021

During our organizational meeting Monday, the Committee on Reapportionment had the opportunity to discuss the work our professional staff have undertaken to finalize software needed to begin the map drawing process. This includes coordination with the Florida House, at the staff level, on the development of a joint website. The information below is intended to provide a brief overview of the new redistricting website as well as the map-drawing software.

You can access the site here: www.FloridaRedistricting.gov. A link will also be posted to our Senate website and the Senate intranet for easy access by Senators, staff, and the public.

Home Page

The Home page contains a welcome message describing the joint website as the main place for information from the Legislature about the redistricting process. In addition, there is an interactive map that depicts the over/under population changes from 2010 to 2020 for congressional, state senate, and state house districts.

About Page

The About page contains an introduction to the definitions of redistricting and reapportionment, a table of fast facts based on population data from the U.S. Census Bureau, background information on federal and state law that the Legislature will utilize when drawing maps during the redistricting cycle as well as links to infographics depicting the redistricting process and timeline.

Florida State Senate & Florida State House

The Florida State Senate and Florida State House pages contain relevant committee information for each respective chamber including but not limited to, memos and correspondence from the President and Speaker's offices, links to FLSenate.gov and myfloridahouse.gov pages as well as links to "find your elected officials," bill tracking, appearance cards for committee, and chamber calendars.

Map-Drawing Application

In the weeks following the August 12 release of redistricting data from the U.S. Census Bureau, staff integrated the data into the Legislature's free web-based map drawing software. Through this software, members of the public can draw, analyze, and submit redistricting plans to the Senate Committee on Reapportionment. Committee staff will be providing each Senator with credential and instructions for accessing your account.

Resources

The Resources page contains interactive versions of historical congressional, state senate, and state house maps from 1982-2022. The page also includes links to a redistricting glossary created by committee staff and a U.S. Census Bureau Geography Hierarchy that depicts the hierarchy the U.S. Census uses when sorting census data. This page also contains links to U.S. Census Bureau's official website for apportionment results and P.L. 94-171 Redistricting Data as well as links to Florida Division of Elections, the official custodian of elections results data.

Get Involved

The Get Involved page contains an introduction to the map-drawing application that will be used this cycle as well as instructional materials created by staff to help the Senators and members of the public understand how to use the application to draw their own maps.

As has been stated previously, Florida's Constitution includes strict guidelines for what information the Legislature can and cannot consider when drawing new state legislative and congressional districts. Senators should make sure to insulate themselves from interests that may intentionally or unintentionally attempt to influence the redistricting process inappropriately.

Senators and staff should also be mindful that correspondence, including electronic communications related to the enactment of new districts, whether sent or received on official Senate accounts or devices or personal email accounts or devices, may be of permanent or archival value and those records should be preserved accordingly.

I will continue to keep you updated regarding any developments. Should you have any questions, please do not hesitate to reach out.

MEMORANDUM

To: Mr. Jay Ferrin, Staff Director
From: Senator Ray Rodrigues, Chair
Subject: Committee Directives to Staff on Map-Drawing
Date: October 18, 2021

Senators of the Committee on Reapportionment have reviewed the census data, the features of the map-drawing application, and the relevant criteria, history, and legal standards. I believe that we have the proper foundation upon which to direct you and your staff to produce a series of maps for our consideration.

First and foremost, you are directed to the plain language of the constitution, federal law, and the judicial precedent that exists today in regards to that language. The Constitution sets forth two tiers of redistricting standards, and provides that the Tier-Two standards apply unless complying with them would conflict with the Tier-One standards or with federal law. The Tier-One standards control in the event of a conflict with Tier-Two standards, but in all other circumstances the Tier-Two standards must control the drawing of district lines. Therefore staff is directed to comply with the objective criteria outlined in Tier Two of Article III Sections 20 and 21 of the Florida Constitution, balancing them in a manner that does not establish any priority of one standard over another, unless complying with the Tier-Two standards would conflict with Tier-One standards or federal law.

In accordance with the Tier Two standard of the constitutional requirements related to equal population, you are directed to prepare Senate plans with district population deviations not to exceed 1% of the ideal population of 538,455 people, and to prepare Congressional plans with population deviations of plus or minus one person of the ideal population of 769,221 people.

To comply with the Tier Two standard related to compactness, you are directed to draw districts that are visually compact in relation to their shape and geography, and to use mathematical compactness scores where appropriate.

To comply with the Tier Two standard related to utilizing existing political boundaries, you are directed to examine the use of county boundaries where feasible. Furthermore, you are directed to explore concepts that, where feasible, result in districts consisting of whole counties in less populated areas, and to explore concepts that, where feasible, keep districts wholly within a county in the more densely populated areas.

With respect to municipal boundaries, you are directed to explore concepts that, where feasible, keep cities whole while also considering the impermanent and changing nature of municipal boundaries.

You are further directed to examine the use of existing geographic boundaries where feasible. Specifically railways, interstates, federal and state highways, and large water bodies such as those that were deemed to be easily recognizable and readily ascertainable by Florida's Supreme Court. We recognize that these geographic features afford us an opportunity to create districts with static boundaries, and would ask that Staff present the boundary analysis report with each plan so that we can determine coincidence of districts' boundaries with these features.

Further, you are directed, when drawing compact districts consistent with the population equality requirements, and that utilize political and geographic boundaries where feasible, to confirm that the districts comply with the Tier-One constitutional standards and with federal law, specifically, that that districts are not drawn with the result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process or diminish their ability to elect representatives of their choice. You are directed to conduct a functional analysis on relevant districts to confirm that any map presented for consideration by this Committee or its Select Subcommittees complies with these Tier-One requirements of the Florida Constitution and with the federal Voting Rights Act.

Regarding compliance with the Tier One standard related to the intent to favor or disfavor a political party, you are directed to draw districts without reviewing political data other than where a review of political data is required to perform an appropriate functional analysis to evaluate whether a minority group has the ability to elect representatives of choice.

To comply with the Tier One standard related to intent to favor or disfavor an incumbent, you are directly to draw districts without the use of any residence information of any sitting member of the Florida Legislature or Congress and to draw districts without regard to the preservation of existing district boundaries.

We believe that by limiting the considerations to those adopted by the citizens of Florida, this process will produce constitutionally compliant maps. While the standards that are to be considered require a balancing act it, is important to remember that the standards themselves are

not optional. Choices made by staff and approved by this committee should be made based on compliance with the objective constitutional criteria.

You are directed to produce a series of plans for each of our Select Subcommittees to workshop. All plans you bring forward must comply with the complex layering of federal and state standards. You will be asked to explain the various trade-offs within the co-equal Tier Two standards presented in each plan. It is within the balancing of these tradeoffs that Senators on the committee must exercise our legislative discretion and produce a constitutionally compliant map.

If staff receives any suggestion that a plan be drafted or changed with the intent to favor or disfavor any incumbent or political party, staff is directed to disregard the suggestion entirely, document the conversation in writing, and report the conversation directly to the Senate President.

Thank you for your attention to these directives. Please notify me, as well as Chairs Bradley and Burgess when you have completed work pertinent to their respective select subcommittees so that workshops can be noticed. Again, thank you and we look forward to reviewing your work.

MEMORANDUM

To: All Senators
From: Ray Rodrigues, Chair
Subject: Important Updates on Reapportionment
Date: November 8, 2021

Our professional staff have informed me that utilizing the objective standards issued by the Committee on Reapportionment on October 18, they have made great progress towards producing map options for consideration by our select subcommittees.

Timeline for Production and Select Subcommittee Review of Staff-Drawn Map Options

As you are aware, during the interim, Senate committee meetings require a seven-day notice. For your planning purposes, our staff has indicated they believe their work will be complete and ready for review the week of November 15. Therefore, I have asked Chairs Burgess and Bradley to notice meetings of their respective select subcommittees for next week.

By Senate Rule, meeting packets are published 24-hours in advance of a committee meeting. However, to ensure ample time for review of the staff-drawn map options, I have asked our staff to conclude their work and produce meeting packets for the week of November 15, no later than Wednesday, November 10. Our staff believes that timeframe is reasonable and will notify me promptly if there are any unforeseen delays.

I recognize publishing staff-drawn maps several days in advance of the select subcommittee meetings will likely result in self-appointed redistricting experts from all political persuasions immediately flocking to the media seeking to push their own narrative about our staff work product. As we know from our work in other areas of public policy, for-profit activists unlike legislators, don't have notice requirements. I encourage Senators to be respectful of the work of our staff, whose directives came at the behest of this committee, rather than accepting analysis provided by organizations whose goals could be motivated by improper partisan intent.

The upcoming select subcommittee meetings will provide the appropriate, public forum for an explanation from staff, questions from Senators, and comments from the public. Additionally, as we prepare to review the staff-drawn maps, I wanted to also follow up on inquiries from Senators regarding the possibility of scheduling virtual public testimony opportunities for their constituents.

To ensure all Senators have the same information and can make an informed decision about whether to schedule virtual public testimony opportunities, I would like to share with you the background, law, and related court precedent surrounding public testimony, which has been discussed in meetings of the Committee on Reapportionment.

Background on Public Testimony During Redistricting

During the last three redistricting cycles, public testimony was necessary under federal law in the five counties subject to a federal review (preclearance) under the Federal Voting Rights Act. The specific federal preclearance process that had been in place in Florida since 1975 is no longer enforceable after the federal coverage formula was declared unconstitutional in 2013.

One of the elements of public testimony gathered during the 2012 series of public meetings was feedback on how to implement the newly passed Fair Districts amendments to the Florida Constitution. We now have many court opinions that provide guidance on how the amendments should be implemented.

Under previous preclearance requirements, and prior to the onset of modern technology, public testimony was helpful and necessary for the legislature to learn where people believed communities of interest existed. However, during the 2012 redistricting process, the Florida Supreme Court expressly stated that maintaining communities of interest is not a constitutional requirement, and cannot be used as the basis for justifying a district's configuration at the expense of objective constitutional standards such as compactness and the use of political and geographical boundaries.

Forms of Public Participation in the Legislative Process

We all know that Florida is incredibly diverse and public testimony on any issue is a very small sample of the views and opinions of the more than 21 million people who call our state home. As Senators, we hear from hundreds, sometimes thousands, of constituents every day on a variety of important issues. Constituents do not wait for a public meeting to make their voices heard.

As is the case with redistricting, or any other matter before the Legislature, public testimony is one of many ways for the public to impact the process. Many constituents send emails, and letters can be mailed or dropped off to local legislators, and individuals can meet with their local representatives. What is unique to redistricting this cycle is the new map-drawing application

that allows legislators and the public to appropriately and actively participate in this once-in-a-decade process in a tangible and meaningful way.

Existing Options for Senators to Schedule Virtual Public Testimony on Redistricting

Notwithstanding the points mentioned above, should you wish to solicit virtual public testimony from your constituents, you already have the ability to do so by utilizing the Senate's technological infrastructure.

Microsoft Teams

As you may be aware, the Senate recently switched from Skype for Business to Microsoft Teams for video conference calls. Microsoft Teams offers an upgraded technology, including improved support for people who want to use this feature on their cell phone. Over a nine-month period, Senate IT tested out this upgrade with different offices, and the feedback was positive. A Senate-wide launch occurred in August and training sessions were held beginning the week of August 30. Training was also posted to the new Senate Intranet and LinkedIn Learning. If you have questions about setting up virtual public testimony using Microsoft Teams, please contact Senate IT.

Zoom

Microsoft Teams includes the same features as a corporate account on Zoom, and has already been integrated into laptops of all Senators and Staff. However, early in the pandemic at the request of Senators, the Senate purchased and continues to maintain a corporate Zoom Account with a limited number of licenses for use by Senate offices. Should you prefer Zoom, please contact Senate Multimedia to assign a license to your office.

Transparency Requirements for Virtual Public Testimony

In order for the committee to consider virtual public testimony, it must be recorded and submitted to the committee by a Senator. Participants should identify themselves in a manner consistent with the online committee appearance form, including whether the individual providing testimony is appearing without compensation or sponsorship, is a registered lobbyist, or has received something of value for their appearance.

Furthermore, as with testimony before the committee and within the mapping application, to prevent secretive operations by partisan operatives, those providing virtual public testimony must list every person, group, or organization they collaborated with on their comment, or suggestion. And finally, submitters must acknowledge that their communications and submissions may be included, reviewed, and examined in all steps of the legislative process until, and even after, new district maps are enacted into law.

Again, as it the case with testimony before the committee and within the mapping application, staff is directed not to review or consider publicly submitted comments or suggestions for inclusion in their work product unless and until a Senator asks them to do so in writing.

Senators who decide to schedule opportunities for virtual public testimony should be mindful of meeting notice requirements in the Senate Rules and should contact the Senate General Counsel with questions on those requirements.

Insulation from Partisan Interests

As you are all aware, Florida’s Constitution includes strict guidelines for what information the Legislature can and cannot consider when drawing new state legislative and congressional districts. Regardless of the forum or format, we can only consider thoughts and feedback in keeping with constitutional standards.

Once again I remind you that in prior redistricting cycles, significant litigation has followed passage of new maps. Sitting legislators may be compelled to produce records or be subject to questioning under oath about conversations with colleagues, with legislative staff, or with outside parties who may attempt to persuade the Legislature to pass maps that favor or disfavor a political party or incumbent.

Senators should continue to insulate themselves from partisan-funded organizations and other interests that may intentionally or unintentionally attempt to inappropriately influence the redistricting process.

Record Retention

Senators should continue to adhere to the records retention policy as directed by Art. I, s. 24 of the Florida Constitution, s. 11.0431, F.S., and Senate Rule 1.48. Senators and staff should also be mindful that correspondence, emails, texts, and other electronic communications related to the enactment of new districts, whether sent or received on official Senate accounts or devices or personal email accounts or devices, may be of permanent or archival value and those records should be preserved accordingly.

MEMORANDUM

TO: All Senators
FROM: Wilton Simpson, President
Kathleen Passidomo, Republican President-Designate
Lauren Book, Democratic Leader
SUBJECT: Release of Staff-Produced Legislative and Congressional Maps
DATE: November 9, 2021

As Chair Rodrigues mentioned in his memo yesterday, we all understand and expect the Wednesday release of staff-produced legislative and congressional maps to trigger quite a few questions and comments. We are certain some of this feedback will be productive and appropriate to consider as we undertake our once-in-a-decade responsibility to produce constitutional maps. However, we also want to make sure Senators are aware that you may receive questions that have nothing to do with the constitutional standards we have sworn an oath to uphold and are instead full of political analysis and queries about our own future political ambitions.

We expect staff to release draft maps that comply with both Tier 1 and Tier 2 constitutional standards, as unanimously directed by the Committee on Reapportionment. The directives issued to staff specifically state: "To comply with the Tier One standard related to intent to favor or disfavor an incumbent, you are directed to draw districts without the use of any residence information of any sitting member of the Florida Legislature or Congress and to draw districts without regard to the preservation of existing district boundaries."

As Senators, we are frequently presented with situations where we must set aside our personal views and make decisions in keeping with the oath we each took to defend the constitution and laws of this state. Nowhere is this responsibility more challenging than in redistricting given that some of us may ultimately decide to vote for a map knowing the realities of that map are such that we will never be reelected. Some of us may choose to defer seeking reelection. Still others may decide to run against a current colleague who we know and respect.

Our responsibility as Senators is to pass a constitutional map. Future political ambitions in this chamber or elsewhere should be of no consideration as we review the work of our staff. Therefore, we would encourage Senators not to opine on the staff-produced maps in the context of your own political future. The time for campaigning is coming, but the time for legislating is now, which requires fulfilling our responsibility to pass constitutional maps.

MEMORANDUM

To: All Senators
From: Jay Ferrin
Subject: Staff-Produced Congressional and Senate Maps Now Available
Date: November 10, 2021

Utilizing the objective standards issued by the Committee on Reapportionment on October 18, committee staff have concluded our work to produce draft Congressional and State Senate maps for review in workshops being held by the respective select subcommittees next week.

Pursuant to Chair Rodrigues' direction that materials be published well in advance of traditional Senate requirements, draft maps are now available on the Legislature's Joint Redistricting website under [Submitted Plans](#), and included in the Select Subcommittee Meeting Packets published on the Senate website.

- [Select Subcommittee on Congressional Reapportionment](#)
- [Select Subcommittee on Legislative Reapportionment](#)

In drawing draft maps for the select subcommittees to review, staff did not consult with any person other than counsel. Districts were numbered to be roughly analogous to their predecessor districts. These are placeholder numbers that may be renumbered at the direction of the committee.

In drawing plans, staff relied on the plain language of the constitution, federal law, and existing judicial precedent to ensure that plans comply with the complex layering of federal and state standards. Districts were drawn to balance co-equal Tier-Two standards of Article III Sections 20 and 21 of the Florida Constitution, unless doing so would conflict with Tier-One standards. Districts were drawn without the use of any residence information of any sitting member of the Florida Legislature or Congress and without regard to the preservation of existing district boundaries.

To comply with Tier-One standards:

- Districts were drawn without reviewing any political data other than where a review of the political data was required to perform an appropriate functional analysis to evaluate whether or not a district denied or abridged a racial or language minority group's ability to participate in the political process or diminished their ability to elect representatives of their choice.
- The functional analyses performed on relevant districts is included in the meeting packets.

To comply with Tier-Two standards:

- Districts were drawn to be nearly equal in population as practicable, with district population deviations of less than 1% of the ideal population of 538,455 for the draft Senate maps, and plus or minus one person of the ideal population of 769,221 for the draft Congressional maps.
- Districts were drawn to be visually compact in relation to their shape and geography. Mathematical scores were used where appropriate.
- Districts were drawn to use county boundaries where feasible. In less populated areas, whole counties were grouped together to make a district or set of districts. In more populated areas where it was feasible to do so, districts were kept wholly within a county.
- Districts were drawn to use to use geographic features that are easily recognizable. The Boundary analysis for each plan illustrates the rate at which railways, interstates, federal and state highways, and large water bodies were used as boundaries for each district.
- Districts were drawn to keep cities whole where doing so was feasible, while recognizing the impermanent and irregular shapes of municipal boundaries. If or when a city was split, static geographic features were sought out for usage as district boundaries.

The differences between the draft plans represent trade-offs within co-equal Tier-Two criteria, and the staff-produced options are presented to the respective select subcommittees for consideration and exercise of legislative discretion.

If any Senator encounters any technical issues accessing the draft maps, please do not hesitate to reach out to committee staff. We look forward to presenting our work in more detail for your review and discussion next week.

From: Ray Rodrigues
Subject: Misleading Committee Appearance Forms
Date: November 22, 2021

As you are all aware, Florida's Constitution includes strict guidelines for what information the Legislature can and cannot consider when drawing new state legislative and congressional districts. In order to ensure a redistricting process in keeping with constitutional standards and to guard against the partisan infiltration that occurred during the 2012 redistricting cycle, the Senate has implemented specific protocols for public testimony and map submission.

Individuals providing testimony are asked to indicate whether they are appearing without compensation or sponsorship, are a registered lobbyist, or have received something of value for their appearance. Additionally, those submitting maps are asked to list every person, group, or organization they collaborated with on their map, comment, or suggestion. And finally, those submitting maps must acknowledge that their communications and submissions may be included, reviewed, and examined in all steps of the legislative process until, and even after, new district maps are enacted into law.

It has come to my attention through reporting in the Miami Herald that Mr. Nicholas Warren, who has submitted maps and testified in both select subcommittees, is a staff attorney of the ACLU, an entity with an interest in redistricting, as evidenced by litigation filed in other states. Mr. Warren failed to disclose this information on the committee appearance form and also on the redistricting suggestion form he filed when submitting maps to the joint website.

As a reminder, staff are directed not to review or consider publicly submitted comments or suggestions unless and until a Senator asks them to do so in writing. I am bringing Mr. Warren's affiliation with the ACLU to your attention as you consider whether or not to incorporate his suggestions or maps in any future directives to staff. In the past, it is this kind of misrepresentation during public testimony that has directly led to the court invalidating legislatively produced maps.

The professional staff of the Senate's Committee on Reapportionment has published a series of new maps to the [Submitted Plans](#) page of www.floridaredistricting.gov. These maps represent minor revisions and adjustments to the plans that were workshopped by the respective Select Subcommittees the week of November 15.

In revising the plans, staff followed the instructions from the Select Subcommittees, and looked for improvements and consistency in the application of the various trade-offs presented in the maps. Impacts of the revisions are mainly to the utilization of political and geographic boundaries, with some improvements in visual compactness and cities kept whole.

The detailed information and reports for these plans will be available in the Select Subcommittee Meeting Packets published on the Senate website shortly.

From: Ray Rodrigues
Subject: Reapportionment Update
Date: December 8, 2021

Based on directives unanimously issued during a public hearing on October 18, followed by feedback and guidance provided by Senators on our select subcommittees during public hearings on November 16, 17, and 29, professional staff have produced and presented a total of eight draft congressional maps, and eight draft senate maps. During the interim period prior to the start of the 2022 Legislative Session, staff continue their work to look for improvements and consistency in the application of the various trade-offs presented in the maps.

In anticipation of multiple meetings during the first week of session, I would like to remind you that now is the time for Senators to begin preparing any amendments they wish to offer. Any alterations proposed, whether as guidance and feedback to staff or as an amendment offered by a Senator, should adhere to the constitutional principles and apply them consistently throughout the state. Therefore, amendments must be drafted and presented as a complete map.

In September, you were each provided with an account that enables you to draw and review maps using the Legislature's joint redistricting software. Should you require any assistance, staff are available to help with drafting maps that reflect any amendments you would like to offer. Due to the highly technical nature and complex legal requirements, drafting maps can take a considerable amount of time. As such, I am requesting that any Senators in need of assistance reach out to staff as soon as possible to ensure ample time for staff to address your request, draft your map, and post it to the website for review prior to the next committee meeting.

Thank you for your attention to these important updates. I wish you and your families a blessed holiday season and look forward to seeing you in January.

MEMORANDUM

From: Ray Rodrigues
Subject: Reapportionment Update – Reminders, Scheduling and Process Information
Date: December 15, 2021

As we prepare to celebrate the holiday season with loved ones, I wanted to provide an update on the work of the Senate Committee on Reapportionment and its select subcommittees and outline the process and schedule as we head towards the beginning of the 2022 Legislative Session in January.

Timeline

In advance of the January 11 bill filing deadline, I will file two placeholder bills, which will ultimately be the vehicles by which the State Senate and Congressional maps approved by the Committee on Reapportionment advance to the Senate floor.

As reflected in the block schedule, attached here and released earlier today by the Senate Committee on Rules, we will have multiple reapportionment meetings during the first week of the 2022 Legislative Session.

Early in the week, the select subcommittees will have the opportunity to further review staff-produced maps, public submissions or comments sponsored by a Senator, and to hear additional public testimony before finalizing their recommendations. Following these meetings, in consultation with counsel, I will review the recommendations of the select subcommittees and offer amendments to the two placeholder bills for review, discussion, and consideration by the full committee on Thursday, January 13, 2022.

Amendments

Now is the time for Senators to finalize and submit any maps they wish to offer. Likewise, staff have been directed to consider the feedback and guidance Senators have given at prior meetings

and consider it through the lens of the overall directives as well as all applicable federal and state legal standards, and to spend time looking for improvements and consistency in the application of the various trade-offs presented in the maps.

Any alterations that are proposed, whether as guidance and feedback to the staff or as an amendment offered by a Senator, should adhere to the constitutional principles and apply them consistently throughout the state. Therefore, amendments must be drafted and presented as a complete map.

As a reminder, in September, you were each provided with an account that enables you to draw and review maps using the Legislature's joint redistricting software. Should you require any assistance, professional staff are available to help with drafting maps that reflect any amendments you would like to make. Due to the highly technical nature and complex legal requirements, drafting maps can take a considerable amount of time. As such, I am requesting that any Senators in need of assistance reach out to staff as soon as possible to ensure ample time for staff to address your request, draft your map, and post it to the website for review prior to the next committee meeting. I would respectfully ask Senators to follow the example set by committee staff in preparing and publishing their proposed amendments well before the notice deadline to ensure that our colleagues and the public have ample time to review them before the committee meets.

Public Submissions, Testimony, and Comments

Members of the public have been and continue to submit plans and comments to floridaredistricting.gov. If you are interested in reviewing public submissions and comments, these plans can be viewed on the "Submitted Plans" and "Get Involved" pages of the website.

As previously communicated, if you have solicited virtual public testimony from your constituents and wish all or portions of such testimony to be considered by the committee, you must submit the recording of the virtual testimony and the required appearance forms to the committee.

Insulation from Partisan Interests

As you are all aware, Florida's Constitution includes strict guidelines for what information the Legislature can and cannot consider when drawing new state legislative and congressional districts. Regardless of the forum or format, we can only consider thoughts and feedback in keeping with constitutional standards.

Once again I remind you that in prior redistricting cycles, significant litigation has followed passage of new maps. MEMORANDUM

To: All Senators
From: Ray Rodrigues
Subject: Reapportionment Update for Week #1
Date: January 5, 2022

As we prepare to return to Tallahassee next week, I wanted to further outline the process you can expect in the Senate Committee on Reapportionment and its select subcommittees during the first week of the legislative session.

Timeline

As you are aware, I filed two placeholder bills, SJR 100 – Joint Resolution of Apportionment and SB 102 – Establishing the Congressional Districts of the State, which will ultimately be the vehicles by which the State Senate and Congressional maps approved by the Committee on Reapportionment advance to the Senate floor.

Monday, January 10 – Select Subcommittees on Congressional and State Legislative Reapportionment

On Monday, January 10, both select subcommittees will meet to further review and workshop staff-produced maps, to offer feedback, and to hear additional public testimony before finalizing their recommendations.

As you are aware, based on directives unanimously issued during a public hearing on October 18, followed by feedback and guidance provided by Senators on our select subcommittees during public hearings on November 16, 17, and 29, so far professional staff have produced and presented a total of eight draft congressional maps, and eight draft senate maps. Staff were subsequently directed to continue their work to look for improvements and consistency in the application of the various trade-offs presented in the maps. As a result, four additional senate

Page 2

maps and four additional congressional maps have now been posted to the joint website, and will be presented in select subcommittees on Monday.

Thursday, January 13 – Committee on Reapportionment

SJR 100 and SB 102 will be listed on the agenda for Thursday's meeting of the Committee on Reapportionment and available for amendment.

Following Monday's select subcommittee meetings, I will review the recommendations and offer my amendments to SJR 100 and SB 102 for review, discussion, and consideration by the full committee on Thursday, January 13. Committee members may also file amendments.

The Committee will take up any timely filed amendments, questions, debate, and public testimony on both the state senate and congressional maps. The congressional map will be considered first, before moving on to consideration of the Senate map.

As you are aware, in the maps produced by our committee staff, districts were numbered to be roughly analogous to their predecessor districts. For the congressional map, I will recommend that we leave the numbers as they are.

For the Senate map, I will propose to the committee that we follow the Supreme Court's precedent by numbering districts in an incumbent neutral manner. The Court has accepted a random-numbering process as compliant with its precedent. Accordingly, once we have concluded our consideration on the geographical makeup of the Senate map, we will randomly number the Senate map.

I have extensively reviewed both the tactile method utilized during the initial remedial phase of 2012 redistricting and the computerized method used during the later portion of the remedial phase. While both are an appropriate means to the same end, I believe a tactile method is more transparent than a single button pushed to create computer-generated results. As such, I have asked staff to prepare a tactile method for random assignment of odd/even district numbers to each Senate district at the Committee meeting on January 13.

After the random numbering has been completed, we will have an informal recess so that committee staff can prepare an amendment overlay of the new district numbers on the finalized map. From a process standpoint, the numbering overlay will take the form of a late-filed amendment. Please be prepared for a recess of approximately one hour before the Committee's final procedural votes on the Senate map as randomly renumbered.

Amendments

As I stated last month, Senators need to finalize and submit any maps they wish to offer. Any alterations that are proposed should adhere to the constitutional principles and apply them consistently throughout the state. Therefore, amendments must be drafted and presented as a

complete map and should be accompanied by the Redistricting Map Submission form available [here](#).

As a reminder, in September, you were each provided with an account that enables you to draw and review maps using the Legislature's joint redistricting software. Should you require any assistance, professional staff are available to help with drafting maps that reflect any amendments you would like to make. Due to the highly technical nature and complex legal requirements, drafting maps can take a considerable amount of time. As such, I am requesting that any Senators in need of assistance reach out to staff as soon as possible to ensure ample time for staff to address your request, draft your map, and post it to the website for review prior to the next committee meeting. I would respectfully ask Senators to follow the example set by committee staff in preparing and publishing their proposed amendments well before the amendment deadline of January 12th to ensure that our colleagues and the public have ample time to review them before the committee meets.

Public Submissions, Testimony, and Comments

Members of the public have been and continue to submit plans and comments to floridaredistricting.gov. If you are interested in reviewing public submissions and comments, these plans can be viewed on the "Submitted Plans" and "Get Involved" pages of the website.

As previously communicated, if you have solicited virtual public testimony from your constituents and wish all or portions of such testimony to be considered by the committee, you must submit the recording of the virtual testimony and the required appearance forms to the committee.

Insulation from Partisan Interests

Senators should continue to insulate themselves from partisan organizations and other interests that may intentionally or unintentionally attempt to inappropriately influence the redistricting process.

Record Retention

Senators should continue to adhere to the records retention policy as directed by Art. I, s. 24 of the Florida Constitution, s. 11.0431, F.S., and Senate Rule 1.48. Senators and staff should also be mindful that correspondence, emails, texts, and other electronic communications related to the enactment of new districts, whether sent or received on official Senate accounts or devices or personal email accounts or devices, may be of permanent or archival value and those records should be preserved accordingly.

Dear Chair Rodrigues,

The Select Subcommittee on Legislative Reapportionment has met three times, November 17, 2021, November 29, 2021, and January 10, 2022, since directives for drawing congressional plans were issued by the Committee on Reapportionment during our October 18, 2021, meeting.

The select subcommittee has thoroughly reviewed, discussed, and provided the opportunity for public input on twelve state senate plans drafted and submitted by professional staff of the select subcommittee. Public submissions were available for review by Senators via the Legislature's Florida Redistricting website. Having had the opportunity for review of public submissions, no Senator sponsored a public submission as a plan for review by the select subcommittee.

Having completed our review, it is the recommendation of the Select Subcommittee on Legislative Reapportionment that you consider either plan S000S8046 or plan S000S8050 as the substance of an amendment to SJR 100, Joint Resolution of Apportionment, for consideration by the Committee on Reapportionment on January 13, 2022.

As we move forward to the full committee and the Senate floor, the Select Subcommittee on Legislative Reapportionment stands ready to assist with the process as you deem necessary.

Respectfully,

A handwritten signature in blue ink, appearing to read "D. W. Burgess".

MEMORANDUM

To: All Senators
From: Ray Rodrigues
Subject: Amendments to SJR 100 and SB 102
Date: January 11, 2022

As referenced in prior communications, SJR 100, Joint Resolution of Apportionment, and SB 102, Establishing the Congressional Districts of the State, were noticed for Thursday's meeting of the Committee on Reapportionment.

I would like to commend the members of the Select Subcommittees on Congressional and Legislative Reapportionment for their efforts in developing plans consistent with all legal requirements and with the directives issued to staff by the full committee. After reviewing the recommendations of the select subcommittees with staff and counsel, I have filed amendments to SJR 100 and SB 102 for review, discussion, and consideration by the full committee on Thursday, January 13. The substance of my amendments are Congressional plan S000C8040 and Senate plan S000S8046, which I believe most consistently adhere to the directives issued to staff by the full committee.

Committee members may also file amendments. Due to the highly technical nature and complex legal requirements, drafting maps can take a considerable amount of time. As such, I am requesting that any Senators in need of assistance reach out to staff as soon as possible to ensure ample time for staff to address your request, draft your map, and post it to the website for review prior to the next committee meeting. I would respectfully ask Senators to follow the example set by committee staff in preparing and publishing their proposed amendments well before the amendment deadline of January 12th to ensure that our colleagues and the public have ample time to review them before the committee meets.

The Committee will take up any timely filed amendments, questions, debate, and public testimony on both the state senate and congressional maps. The congressional map will be considered first, before moving on to consideration of the Senate map.

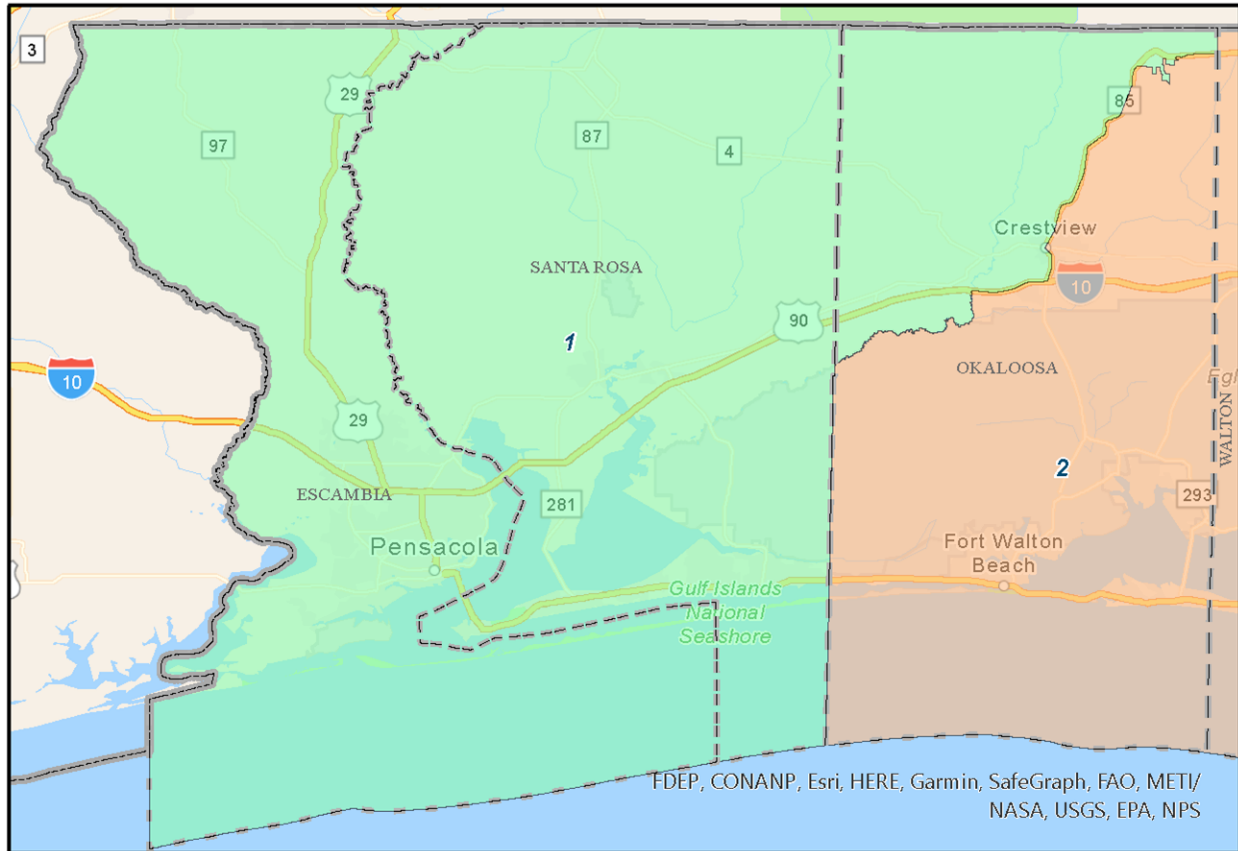

As noted in prior communications, for the Senate map, I will propose to the committee that we follow the Supreme Court's precedent by numbering districts in an incumbent neutral manner. The Court has accepted a random-numbering process as compliant with its precedent. Accordingly, once we have concluded our consideration on the geographical makeup of the Senate map, we will randomly number the Senate map.

Forty cards have been produced. Each card is the same size and weight. There are 20 cards labeled "even" and 20 cards labeled "odd". Each card will be placed in an envelope. There are no distinguishing features on any envelope. No card is visible in any way from the outside of any envelope.

The Secretary of the Senate will place the envelopes in a glass container with a lid and manually mix the cards before and after placing them in the container to ensure there was no possibility of an intentional pattern with which the cards were laid in the container. The Secretary will present the closed container to the committee on Thursday.

Prior to the committee's final vote on the Senate map, each district will have a card drawn from the container to designate it as an odd or even numbered district. After the random numbering has been completed, we will have an informal recess so that committee staff can prepare an amendment to overlay the new district numbers on the finalized map. From a process standpoint, the numbering overlay will take the form of a late-filed substitute amendment. Please be prepared for a recess of approximately one hour before the Committee's final procedural vote on the Senate map as randomly renumbered.

District 5

District 5 is an effective minority district protected from diminishment under Tier-One of Article III Section 21 of the Florida Constitution. While the BVAP is slightly reduced from the benchmark (43.06% to 41.62%), a functional analysis confirms that the district does not deny or abridge the opportunity for African-Americans to participate in the political process and does not diminish their ability to elect candidates of their choice.

District 5 is wholly contained within Duval County.

The boundary primarily follows State Road 23 (First Coast Expressway), Interstate 10, Interstate 295, State Road 113 (Southside Connector Boulevard), State Road 115 (Southside Boulevard.), State Road 152 (Baymeadows Road), and the St. Johns River, departing from these geographic features where necessary to balance population and to maintain the ability to elect in this Tier-One district.

District 40 is a majority-minority district protected from diminishment under Tier-One of Article III Section 21 of the Florida Constitution. The HVAP of the district slightly increases from the benchmark (69.78% to 71.50%), and a functional analysis confirms that the district does not deny or abridge the opportunity for Hispanics to participate in the political process and does not diminish their ability to elect candidates of their choice.

District 40 contains all of Monroe County and part of Miami-Dade County.

In Miami-Dade County, the boundary primarily follows State Road 997 (Krome Ave.), U.S. Highway 41, State Road 985 (S.W. 107th Avenue), State Road 976 (S.W. 40th Street), the Florida Turnpike, the Seaboard Coast Line Railroad, and the municipal boundary of Homestead, departing from geographic features where necessary to maintain the ability to elect in this Tier-One protected district.
